### 3. Selling water leak monitoring device, "L-chaser"

**LED**

LED blinking  
in detecting leakage

[Collaboration with meter reading]

Install L-chaser to the meter lid.

When the meter reader checks the water meter, checks L-chaser also at the same time.

It shows that there is water leaks or not. It is very efficient to conduct not only a meter read but also check for monitoring leakage

### 4. Recent track records in overseas
