

March 2025  
Tokyo Metropolitan Government

# シン・トセイ X SHIN-TOSEI X

Strategy for the Structural Reform of TMG to Upgrade QOS 2.0

Foreword From SHIN-TOSEI to “SHIN-TOSEI X”	3
<b>Chapter 1 General statement</b>	4
1. History of SHIN-TOSEI	
2. SHIN-TOSEI X Implementation Policy	
<b>Chapter 2 Policy DX</b>	18
<b>Policy DX -1 Leading projects</b>	19
1. Childcare	
① Respond to the desire of all children to “learn more” and “receive advice” through digital tools	
② Realize all childcare support services on a Once-Only and One-Stop basis	
2. Education	
① Support learning of children and empower teachers through DX in education	
3. Healthcare and welfare	
① Realize “connected healthcare” by further promoting DX in healthcare	
② Expand the TMG’s guidance and inspection system as a “Japan model” nationwide	
③ Realize Once Only and One-stop services for information on business places in the healthcare and welfare fields	
④ Provide required support through digital tools and enhance watching over of the elderly	
4. Disaster prevention	
① Reinforce the capabilities of protecting the lives and life of the citizens of Tokyo through the integrated and seamless utilization of disaster information	
② Realize seamless support by integrated management of information on disaster victims	
5. Urban development	
① Solve urban problems by developing an environment where diverse geospatial data can be utilized seamlessly	
② Realize a one-stop service for real estate procedures in throughout Tokyo	
6. Environment	
① Realize DX in procedures and information management related to industrial waste	
② Collect, analyze, and transmit information on natural environments in wide areas	
③ Back up environmentally friendly actions throughout Tokyo	
7. Industry	
① Speed up support for the citizens of Tokyo and businesses by introducing AI-based examination of subsidies	
② Establish a platform which “visualizes” startups throughout Japan	

<b>Policy DX-2 Shared DX-framework promotion projects</b>	39
① Development and utilization of AI throughout Tokyo (integration of AI)	
② Apps that integrally connect TMG and the citizens (integration of apps)	
③ Centralized management of administrative procedures (integration of procedures)	
④ Utilization of business database (integration of information on businesses)	
⑤ TOKYO Dashboard (integration of dashboard)	
⑥ Strengthened security throughout Tokyo (integration of security measures)	
<b>Point Future of Policy DX</b>	49
<b>Chapter 3 Core projects</b>	52
<b>Project-1 User participation/collaboration project</b>	53
1. Digitalization of administrative procedures which allows users to feel “the improvement”	
2. Thorough practice of “service design” to provide attractive services based on communications with users	
3. Continuous improvements based on user reviews	
4. Multi-language services and “easy-to-understand public relations” in accordance with the needs of users	
5. Transmit achievements and successful cases of SHIN-TOSEI in an effective and easy-to-understand manner	
6. Drive social transformation from one of support centers for startups	
7. Promote open innovation with the participation of the citizens of Tokyo	
8. Promote the use of data owned by the public and private sectors through the Tokyo Data Platform (TDPF)	
9. Further reinforce a virtuous circle of open data in throughout Tokyo	
10. Collaborate with GovTech Tokyo	
<b>Project-2 Smart work project</b>	67
1. Digitalization of a series of procedures for contract/expenditure	
2. Digitalization of payment of public funds	
3. Review of decision-making systems in the digital era	
4. Efficient back-office operations by TMG employees	
5. Speedy and efficient execution of projects	
6. Further improvement of digital skills of TMG employees	
7. Open & flat	
8. Improvement of an environment where diverse human resources can take advantage of their potential	
<b>Chapter 4 Advancement in the structural reform based on two-way communications</b>	82
1. #SHIN-TOSEI Portal Site, SNS	
2. “Digital Suggestion Box Plus”, SHIN-TOSEI Grand Conference	
3. Opinion Form for Wards and Municipalities regarding digitization	
4. Survey of the citizens of Tokyo and employees regarding the digital environment, etc.	

## From SHIN-TOSEI to “SHIN-TOSEI X”

- “SHIN-TOSEI” launched in August 2020 has promoted the structural reform of TMG based on DX (digital transformation) aimed at **developing an infrastructure for the “digital government of TMG” by FY2025** and **steadily achieved results**.
- In order for “SHIN-TOSEI” to make a further leap toward **improvements in QOS (quality of service) that truly benefit residents**, it is important to introduce DX which has been promoted by **each department/bureau or project across organizations and areas**.
- For these reasons, the TMG **modifies SHIN-TOSEI to “SHIN-TOSEI X”** which targets 2035 in tune with the formulation of the “Tokyo 2050 Strategy” aimed at realizing the vision for the 2050’s and **transforms its structural reform into a next stage**.
- “X” transmits the following concepts.
  - **“Transformation”**: Evolution from **digitalization (D) to digital transformation (DX) for the purpose of realizing the structural reform**
  - **“Cross”**: Creation of new values through **cooperation and collaboration beyond the borders of different organizations and areas**
  - **“Expand”**: Expansion of efforts made by respective departments/bureaus in TMG and **in collaboration with the national government, municipalities, and the private sector**
  - **“Unknown”**: **Courageous challenge for the introduction of new technologies and efforts** to create a future beyond our imagination
- **The pillar of the new structural reform is “Policy DX”**. “Policy DX ” will be promoted in the entire TMG, **starting from the leading projects**, for the purpose of **speeding up problem-solving and improving the efficiency of operations through DX across organizations and areas**, thereby **increasing “you time” (personal time)** of the citizens of Tokyo, businesses, and TMG employees.
- **Building upon the spirit of “SHIN-TOSEI” and the past efforts such as open government and workstyle transformation**, the entire TMG will be committed to tirelessly improving its QOS to improve Quality of Life (QOL) of the citizens of Tokyo in a productive environment where each employee can take advantage of potential under the slogan, **“SHIN-TOSEI X”**.

# Chapter 1 General statement

1. History of SHIN-TOSEI
2. SHIN-TOSEI X Implementation Policy

# 1 History of SHIN-TOSEI

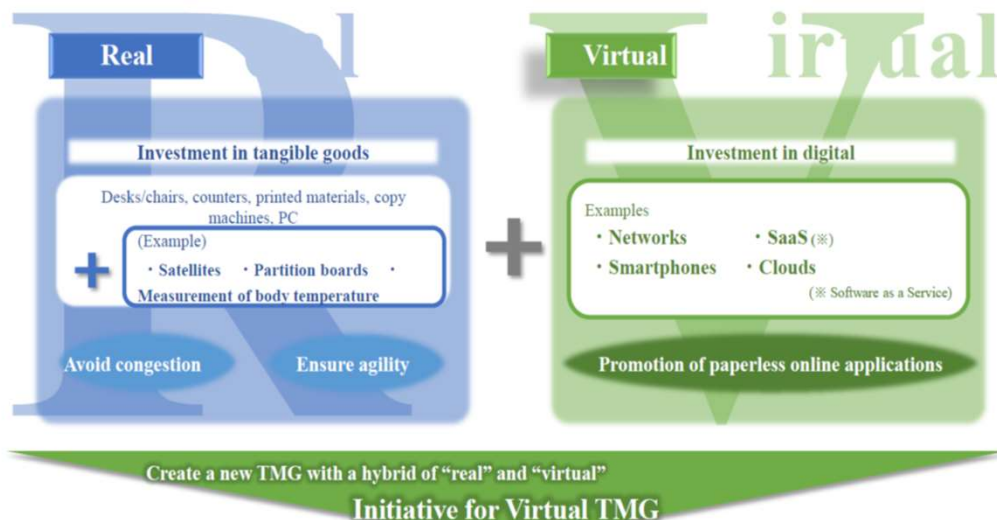

## Achievements of “SHIN-TOSEI”

- The SHIN-TOSEI Strategy for the Structural Reform of TMG to Upgrade QOS announced in March 2021 presented an initiative for “Virtual TMG” to create a new TMG with a hybrid of “real” and “virtual” and listed a goal of **building the infrastructure for the digital government of TMG” by fiscal 2025.**
- We have realized the “**provision of administrative services in digital space**” and “**transfer of working environments to digital space**”, advocated four years ago, thanks to the efforts by the entire TMG and the collaboration with diverse stakeholders. As result, the infrastructure for the digital government was built.

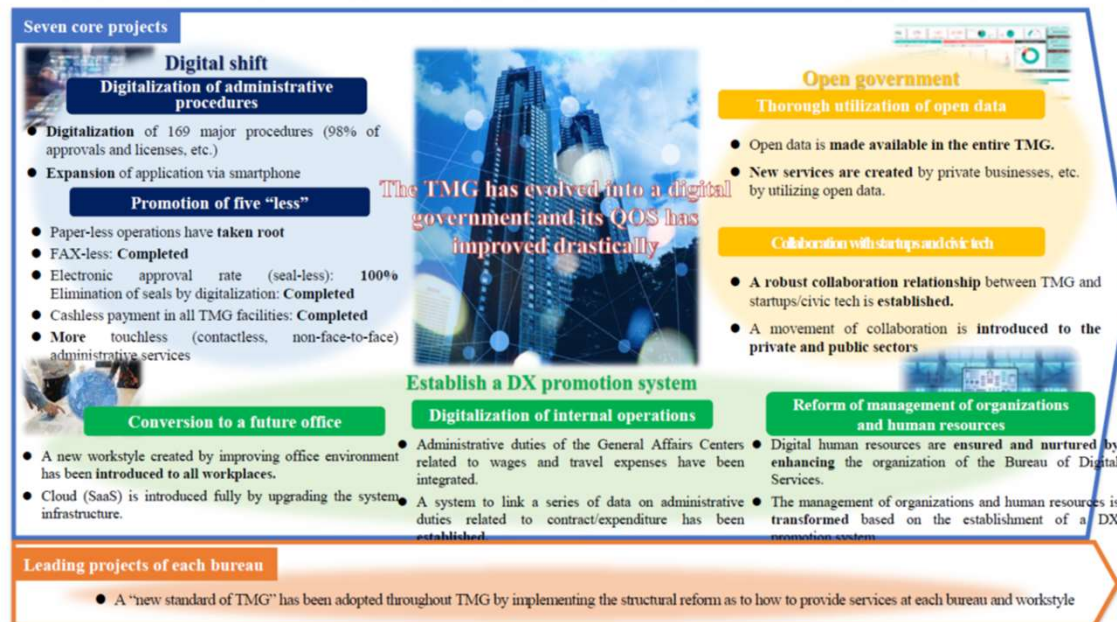

Excerpts from the “SHIN-TOSEI Strategy for the Structural Reform of TMG to Upgrade QOS” (March 2021)

### Initiative for virtual TMG ~Another TMG in digital space~

- ① **Transfer of working environments to digital space:** The “real” and “virtual” TMG are built as two bases for providing services
- ② **Provision of administrative services in digital space:** Services concentrated in “real” are also provided in the “virtual” TMG

### Goals for fiscal 2025 ~ Building the infrastructure for the digital government of TMG ~

# 1 History of SHIN-TOSEI

## Building the infrastructure for the digital government of TMG ① - Core project -

The entire TMG has worked on **the core projects** to promote the structural reform and **reviewed its workstyle in the past from scratch.**

### Digital shift

### Achievements

**Paper-less** < Quantity of copy papers procured >  
  
 About 200 million (Fiscal 2016) **▲72%** About 56.95 million (Fiscal 2022)

**FAX-less** < Number of FAX sent (comparison of March) >  
  
 About 53,000 (Fiscal 2019) **▲99.1%** About 500 (Fiscal 2021)

**Seal-less** < Online approval rate (data of March) >  
 ※ Excluding non-applicable cases  
  
 12.3% (Fiscal 2016) **▲99.8%** (Fiscal 2022)

**Cashless** < 78 facilities used by the citizens of Tokyo >  
  
 46% (Fiscal 2019) **▲100%** (As of the end of fiscal 2021)

**Touchless** Administrative consultation meeting:  
  
 About 100  
 Explanatory meeting/lecture: About 300  
 (As of the end of September 2022)

### Major efforts

October 2020: The principle for thorough introduction of five “less” was formulated. Based on this principle, the entire TMG has accelerated the efforts.

A dashboard was made public to visualize the progress of the efforts (November 2020)

It has been upgraded in accordance with the progress

A new workstyle has been introduced so that employees can carry out their operations digitally

Introduction of monitors and PCs for online meetings

Implementation of digital tools and cloud storage

## Digital shift

### Digitalization of administrative procedures

### Improvement of counter service

### Thorough service design

## Achievements

### Digitalization rate of administrative procedures

5%

(As of the end of September 2020)

82%

(As of the end of December 2024)

The digitalization rate of the procedures which can be handled by the TMG: **100% by fiscal 2026**

### Number of counters where improvement measures have been taken

BPR is introduced at the prototype counters (about 120)

Fiscal 2023

All counters (about 1,000) were reformed in fiscal 2025

**“No waiting, no writing, and cashless” counter service is realized**

### Number of user tests conducted

48

(Fiscal 2021)

190

(Fiscal 2023)

User testing is conducted on all digital services from fiscal 2024

## Major efforts

April 2021

Enforcement of the TMG Ordinance on Digital First Initiatives  
**All administrative procedures have been digitalized**

July 2021

Formulation of the TMG Digital First Promotion Plan

By improving the application platform, etc.

**70%** of the goal for the first phase was achieved

March 2024 A plan for the second phase was formulated

**“Guideline for Efforts for Improvement of Counter Service” was formulated (March 2024)**

**A circle of improving counter service has expanded by applying the guideline extensively and taking advantage of creativity at each workplace**

To realize “no waiting, no writing, and cashless” counter service, an online reservation system and cashless terminals were introduced, and tablets which allow users to fill in application forms at counter were introduced.

August 2021

The User Test Guideline was formulated

January 2023

The Guideline was revised

• “Research” and “prototyping” conducted in the upstream processes of development were newly included in the user testing conducted by TMG.

• In addition, the standard operating procedure for user testing was created.

March 2024

The User Test Guideline was integrated into the Service Design Guideline

## Open government

### Collaboration with startups

#### Achievements

Number of collaboration cases

17

(Fiscal 2022)

186

(As of the end of December 2024)

The effort is accelerated by raising the target of collaboration with startups five times through enhancing the project to support public-private collaboration.

#### Major efforts

Since fiscal 2023  
A total of 30 projects have been carried out.

Since fiscal 2019  
A total of 16 startups have been selected.

Each Bureau examines proposals without obligation solicited from startups and introduces them on a pilot basis.

Since fiscal 2019  
44 times in total  
Number of projects created  
50 in total  
(As of the end of December 2024)

### Governor's Cup Open Data Hackathon

Number of proposals submitted in the Governor's Cup Open Data Hackathon

41

(Fiscal 2021)

106

(Fiscal 2024)

Number of applicants Since fiscal 2021 2,193 in total  
Number of services launched Since fiscal 2021 19 in total

### Open data

Number of cases in which data is disclosed on the catalogue site

About 40,000

(As of the end of March 2021)

About 72,000

(As of the end of December 2024)

Rate of disclosure of internal data with strong demand in the private sector

33.5%

(About 7,700 cases)

(Fiscal 2023)

60%

(About 13,800 cases)

(Fiscal 2024)

Internal data on about 23,000 cases with high demand in the private sector will be disclosed 100% by fiscal 2025.

March 2017  
The catalogue site was launched

民間ニーズを把握

- Use cases of open data are introduced
- The check function is introduced to improve data quality

The site was upgraded in March 2022

Example of the development of services using data

Round table  
(Fiscal 2020~)

Tokyo Open Data Community

A search site in which users can search for sport facilities that match their conditions

## Establishment of a DX promotion system

### Development of futuristic Office

### Introduction of digital tools

### Utilization of Teams

## Achievements

Total number of departments which have been converted into futuristic Office

In fiscal 2025, all departments in TMG (expected to be 123 departments※) will be converted futuristic Office

※ As of the end of 2025

Number of digital tools introduced

Since fiscal 2024

A total of 10 tools are in operation

Dashboard, no-code development tool, AI chatbot, AI speech-to-text tool, etc.

Number of Web meetings

About 87,000 times

(First half of fiscal 2024)

About 28,000 times

(Latter half of fiscal 2022)

## Major efforts

A futuristic Office has been introduced whose layout can be modified flexibly by transforming the workstyle which used to be restricted by desks, land-line phones, and paper

Before

After

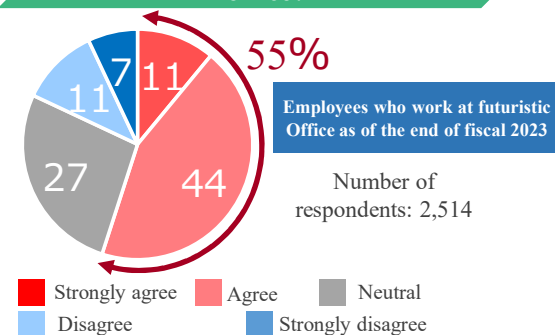

Satisfaction level of physical office environment

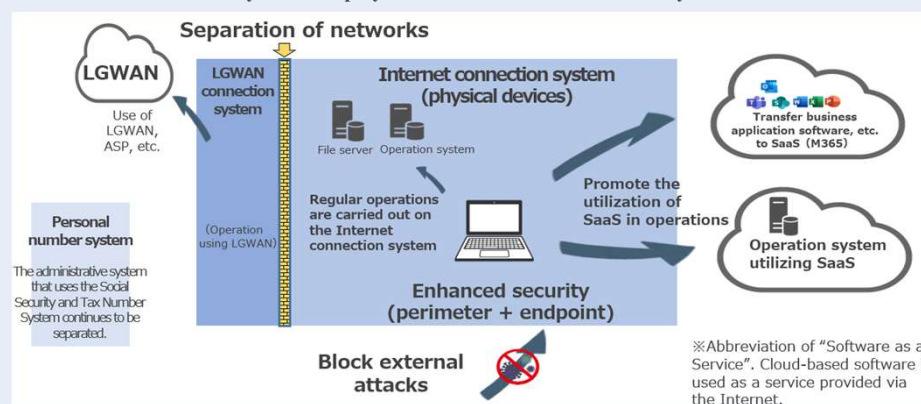

<Major opinions>

- I can work in a quiet booth when I need to concentrate.
- There are sufficient meeting spaces.

Has productivity of operations improved compared to the former office?

The systems infrastructure used by TMG employees has been converted drastically into a convenient cloud environment

# Establishment of a DX promotion system

Business Process Re-engineering at business places

Achievements

Number of business places that work on Business Process Re-engineering

**About 250**  
(Fiscal 2023)

**About 480**  
(Fiscal 2024)

**Total**

The reforms will be introduced in all (about 600) business places in fiscal 2025.

Review of analogue regulations

Regulations reviewed

Among regulations that require visual inspections or presentation of paper documents under ordinances, etc., about 80% have been reviewed.

**409**  
(As of the end of March 2024)

**1,052**  
(As of the end of November 2024)

**Analogue regulations will be reviewed by the end of fiscal 2025**

Securing of digital human resources

Number of ICT employees

※ Including GovTech Tokyo

**7**  
(As of August 1, 2019)

**260**  
(As of December 1, 2024)

Major efforts

The business places on the frontline of service have worked on Business Process Re-engineering utilizing digital tools.

The practical guide on cases of efforts for promoting DX at business places was created and publicized (November 2024).

Dashboard that visualizes the progress was released

Number of regulations reviewed: 1,052

Regulations to be reviewed: 1,399

Regulations not subject to review: 324

Number of regulations investigated: 1,723

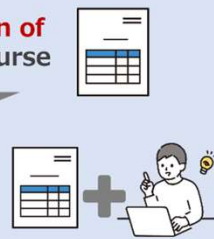

As of the end of November 2024

Example of review of the obligation to present documents

Official documents as a special tax collector can be presented at a golf course or on the website.

**(Before) Presentation of document at a golf course**

**(After) Posted also on the website**

➢ The Digital Service Bureau was established in April 2021, and the GovTech Tokyo in July 2023.

➢ The Basic Principle was revised in response to the establishment of GovTech Tokyo, etc. (March 2024).

➢ The Digital Service Bureau and GovTech Tokyo strengthened the effort for nurturing digital human resources who lead DX throughout Tokyo.

## 1 History of SHIN-TOSEI

# Building the infrastructure for the digital government of TMG ② - Independent efforts by each Bureau -

The structural reform as to how to **provide services** at each Bureau and **workstyle** has progressed thanks to independent efforts made by each bureau. As a result, a “new standard for metropolitan administration” has been adopted throughout TMG

## ■ Major efforts for transforming how to provide services such as enhanced convenience of services for the citizens of Tokyo

### Project to promote the utilization of the TMG Bureau of Waterworks app [Bureau of Waterworks]

The procedures can be carried out at **any time from smartphones (on a 24-hour basis)**, for example, the start of use of water when someone moves to another house.

Its functions have been enhanced and UI/UX improved based on opinions sent by users!  
User review: App Store 4.5 points  
Google Play 4.2 points  
(As of the end of December 2024)

About 1.97 million users have subscribed!

As of the end of 2024

### “Smart metropolitan tax” project [Bureau of Taxation]

Cashless payment is accepted to pay metropolitan tax anywhere and anytime!

Cashless payment rate of metropolitan tax  
**48.5%**

Performance in fiscal 2023

【Cashless payment of fee】  
The fee for issuance of certificates, etc. can now be paid cashless!

40.0%  
Performance in fiscal 2019

Up 8.5% in four years!

### Project of online application for public housing [Office for Housing Policy]

It has become possible to **apply for public housing online!**

**Project to improve the comprehensive public housing management system**  
A system for procedures used by those who live in **about 250,000 public housing complexes** is under construction.

Online application rate  
About **90%**  
(solicited every month)

Performance in fiscal 2023

### Commuter pass Web reservation system [Bureau of Transportation]

Your commuter pass can be issued by automatic ticket machine by pre-booking through smartphone/PC.

【Place of purchase】  
Commuter pass counters (13 stations)  
➡ **Automatic ticket machines (109 stations)**

【Time for purchase】  
Within the working hours of counters  
➡ **From the first train to the last train**

Your commuter pass is issued instantly without forming a line at the counter

## ■ Major efforts for transforming workstyle through efficient operations

### DX project at ports of isolated islands [Bureau of Port and Harbor]

Image sent from live camera  
(Oshima Motomachi port)

Drone

Number of days required to assess  
the situations after a disaster  
**Target: 10 days  
shorter**

※ Estimation based on an  
example of the calculated  
timeline

Data on disaster-affected areas is integrated swiftly from live cameras and drones and shared on a real-time basis to streamline disaster recovery works

### Project to link the social security and tax number system to administrative works of Tokyo Metropolitan University, etc. for administrative duties related to the reduction and exemption of tuition fees [Bureau of General Affairs]

Reduction in  
application documents  
**36,000 per  
year**

The introduction of online application and linkage of information using the social security and tax number help the procedures for application and administrative duties for examination be streamlined!

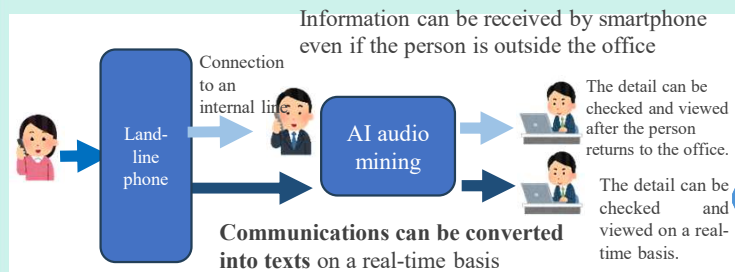

### Project to operate the Expropriation Commission utilizing digital tools [Expropriation Commission Secretariat]

For example...  
Reduction in the time  
required for holding the  
Expropriation  
Commission: About 50  
hours/year

New digital tools are introduced to the Expropriation Commission to realize more effective sharing of information and materials

### Project to streamline operations of child consultation centers utilizing digital tools [Bureau of Social Welfare]

Reduction in the time  
for creating records  
of phone calls  
**5500 hours per year  
(estimation)**

The efficiency of operations of child consultation centers has improved by utilizing AI audio mining tool.

※ Example of Tachikawa  
Child Consultation Center

## 1 History of SHIN-TOSEI 1

# From “SHIN-TOSEI” to “SHIN-TOSEI X”

# QOS

Dramatic improvement of service quality through “Policy DX”

### Phase 3.0

“Policy DX” across organizations and areas

- BPX (Business Process Transformation across organizations and areas)
- three basic digital principles (Digital First, Once Only, Connected/One-Stop), etc.

March 2025

### Phase 2.0

High-quality services

- Digitalized administrative procedures
- Improvement of counter service
- Implementation of user testing, etc.

January 2024

March 2023

Building the infrastructure for the digital government of TMG

### Phase 1.0

Departure from analogue environment

- Paper-less, FAX-less, seal-less, cashless, etc.

March 2021

February 2022

August 2020: Kickoff

## 2. SHIN-TOSEI X Implementation Policy – Advancing “policy DX” to dramatically improve the QOS of the TMG –

Under the SHIN-TOSEI X strategy, the Tokyo Metropolitan Government (TMG) will carry on and enhance existing structural reforms and the **measures laid out in the original SHIN-TOSEI strategy, centering on core projects** for advancing TMG-wide reforms. The TMG will also strongly drive “**policy DX**” across organizations and areas for improvements in QOS (quality of service) that truly benefit residents.

All digital services upgraded to be more **user-friendly and appealing**

Citizens,  
businesses

More “**you time**” (personal time) for citizens and businesses

### Policy DX

- Advance DX efforts that have been independently advanced by individual bureaus/projects as “**policy DX**” that crosses organizations and areas
- Realize **business process transformation (BPX)** across organizations and three basic digital principles (Digital First, Once Only, Connected One-Stop)

### Leading projects driving cross-organizational policy DX

- Leading projects will pave the way for **bold efforts to tackle various challenges** and the promotion of policy DX across the TMG.

### Shared DX-framework promotion projects advancing the consolidation of operations across organizations

- **Shared use of systems and digital tools** among the TMG bureaus, municipalities in Tokyo, and other organizations in their common areas of services and operations, as infrastructure supporting the realization of policy DX.

#### [Core Project] User Participation and Collaboration Project

Improving QOS and solving societal issues through collaboration with a diversity of players including citizens

- Realize **even higher-quality services** through **dialogue with users**
- **Work with a diversity of players to create new services and generate further innovation**

#### [Core Project] Smart Work Project

Building an environment where productivity at the TMG and the motivation and skills of employees will continue to improve

- Achieve **greater improvements in productivity while also leveraging AI and other digital technologies**
- Adopt an **open & flat** organizational culture that enables employees to excel and thrive

Point!

## Increase in “you time” by DX

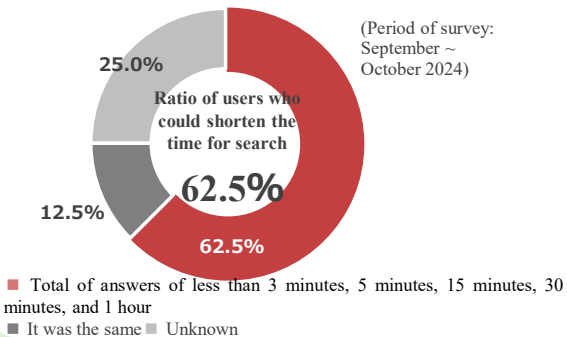

### ■ The efforts for DX by TMG contribute to the increase in “you time” (personal time)

#### ○ DX in childcare

【Push-type childcare service】

By receiving necessary information from apps in advance, users can avoid the lack of information or forgetting to submit applications.

More than 60% of users answer that the time for searching nursery schools was shorter than searching for them by themselves.

【One-stop childcare service】

The procedures from search for nursery schools to admission can be completed online on a one-stop basis.

#### Opinions from parents

It is convenient because I can make a reservation for on-site visit at any time during childaring.

The time for searching nursery schools will be reduced significantly.

(Period of survey: November 2024)

Satisfaction level of users (parents)

**4.3 points** (out of 5)

【Improvement of user-friendliness of the procedures for payment of benefits】

A system was introduced which allows users to apply for benefits by passing a my-number card over a smartphone in “018 Support”.

The time required for procedures has been reduced significantly

(Period of survey: June ~ December 2024)

#### ○ Electronic inspection of construction plan outlines

About 15,000 construction plan outlines are viewed annually. A system to allow users to view them online was established.

It was necessary to visit the TMG office and wait long time at the counter, but DX allows users to **view those documents at their home or office, reducing the time required for viewing them significantly.**

#### ○ Gradual introduction of electronic contract

Electronic contract has been introduced gradually for contracting duties which were made on a paper basis

Opinions from users (citizens of Tokyo)

- Time to travel to the TMG office: Reduction in about **three hours**
- Time to create documents (printing/bookbinding): Reduction in about **one hour**

#### ○ Utilization of DX in maintenance of firefighting equipment at stations

Digital devices are utilized for the management of firefighting equipment at 102 stations of Toei Subway lines to streamline on-site inspections and improve the capability of responding to any abnormality

About **100 hours** for inspections are saved annually. When any trouble occurs, it can be handled by a smartphone.

■ 70% of employees who have used generative AI feel that the time required for work has been reduced

- By making maximum use of AI, one hour is save per week. Annually, “you time” (personal time) equivalent to six working days increases.

\*Reduction in working hours in a week: 1 hour  
× 50 week a year =  
Increase in “you time” of 50 hours

\*50 hours / Daily working hours (8) ≒ 6 days

“By using Microsoft Copilot, how much has your working hour been reduced in total in a week?”

Results of the questionnaire survey for TMG employees (September 2024)

■ Time for commuting is used as free time by introducing telework

- If an employee works remotely 1 day per week, “you time” (personal time) equivalent to 10 working days increases in one year.

\* 50 days a year × commuting time to work of one day (1 hour and 35 minutes) ≒  
Increase in “you time” (personal time) of 79 hours

\* 79 hours ÷ 8 hours per day ≒ 10 working days

Average time for commuting to work/school by prefecture (2021) – weekdays

Ran- king	Prefecture	Commuting time to work or school (Hour/minutes)
	National average	1. 19
1	Kanagawa	1. 40
2	Chiba	1. 35
2	Tokyo	1. 35
4	Saitama	1. 34

(Source) Statistics Bureau, Ministry of Internal Affairs and Communications “Results of the 2021 Survey on Time Use and Leisure Activities” (August 2022)

DX is further promoted using the increase in “you time” as an indicator

■ The time for commuting saved by telework is used to enrich one’s life such as childcare, personal development, sleeping, and hobbies.

- Those who have worked remotely (telework) can **spend more time for sleeping and hobbies** and less time for commuting to work or school.
- While the time for commuting to work has been reduced by telework, the TMG employees aged 25~34 spend more time on sleeping and hobbies, those aged 35~44 on childcare, and those aged 45~54 on sleeping and meals, respectively.

(Source) Statistics Bureau, Ministry of Internal Affairs and Communications “Results of the 2021 Survey on Time Use and Leisure Activities” (August 2022)

- **About 80%** of TMG employees who have introduced telework answer that their **satisfaction level on work-life balance has improved.**

(Opinions from employees)

- I really appreciate that the commuting time saved can be spent for **childcare or nursing care.**
- It became unnecessary to commute long distance on a day that I work remotely, **so I can sleep more and I feel less tired.**

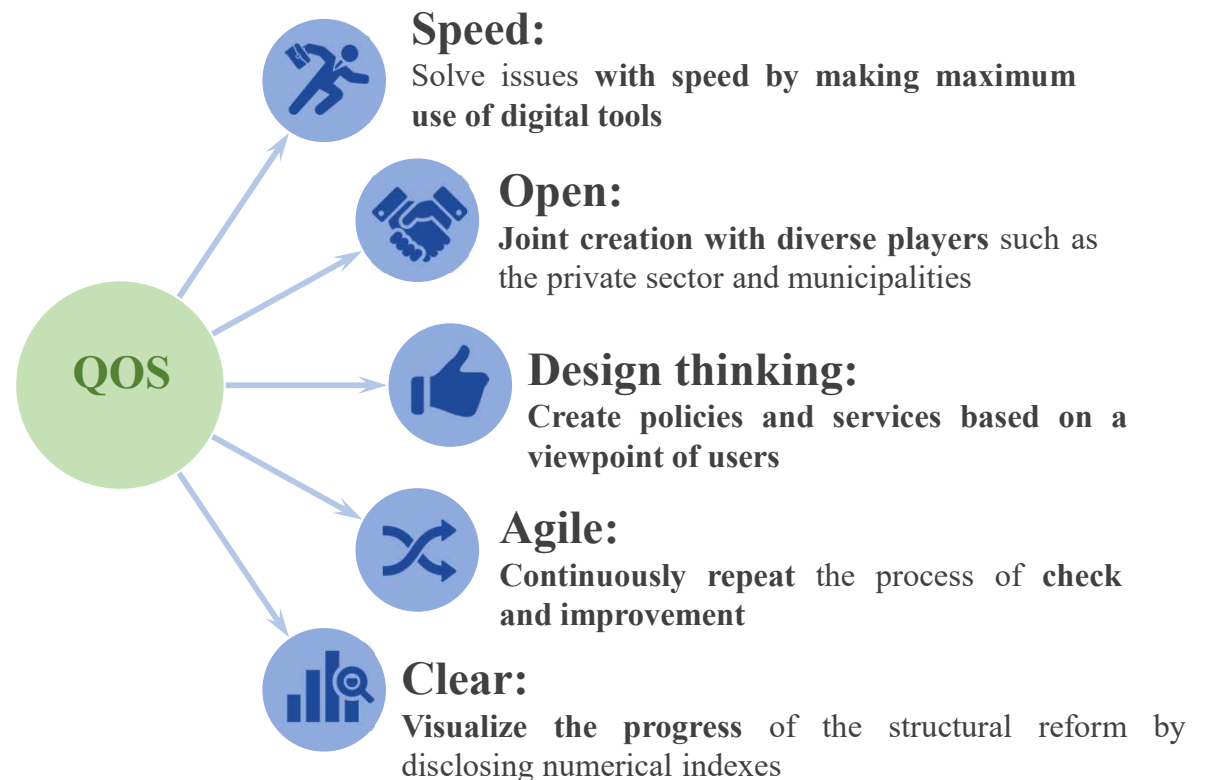

Results of the survey on satisfaction level of employees with telework (July 2024)

# Change TMG through implementing the structural reform

SHIN-TOSEI X is promoted under five keywords, namely, **speed, open, design thinking, agile, and clear.**

TMG, its organizations, and employees will change by turning obstacles and issues encountered in the process of the structural reform into **a transformation of systems and frameworks with flexible ideas and approaches.**

TMG is committed to challenging **the further improvement of the QOS of TMG** by gaining more successful cases and getting them entrenched as the new standards of TMG together with the keywords.

# Chapter 2 Policy DX

- TMG **drives** DX which has been promoted by project as **“Policy DX”** across **organizations and areas**.
- Here, **a future image** which TMG aims for is described, **including goals difficult to be achieved** taking into account the current legal system and social environments.
- To enhance an effect of policies with the help of the potential of digital tools and promote BPX under various collaborations, it is essential to **keep fighting against various obstacles in anticipation of 10 years from now or even further** without giving up with the spirit of **“No More Shoganai (Oh well)”**, even if there are goals which cannot be achieved right now.
- TMG is committed to promoting and accelerating Policy DX aimed at realizing the future image described here **by bouncing ideas off across organizations and areas**.
- TMG will **deploy “Policy DX”** not only in the fields mentioned here but also **in wider fields**, promote **BPX** to improve the QOS of TMG, and realize the **three basic digital principles**

**Policy DX-1 Leading projects**

**Policy DX-2 Shared DX-framework promotion projects**

## Policy DX-1

# Leading projects

1. Childcare
  - ① Respond to the desire of all children to “learn more” and “receive advice” through digital tools
  - ② Realize all childcare support services on a Once-Only and One-Stop basis
2. Education
  - ① Support learning of children and empower teachers through DX in education
3. Healthcare and welfare
  - ① Realize “connected healthcare” by further promoting DX in healthcare
  - ② Expand the TMG’s guidance and inspection system as a “Japan model” nationwide
  - ③ Realize Once Only and One-stop services for information on business places in the healthcare and welfare fields
  - ④ Provide required support through digital tools and enhance watching over of the elderly
4. Disaster prevention
  - ① Reinforce the capabilities of protecting the lives and life of the citizens of Tokyo through the integrated and seamless utilization of disaster information
  - ② Realize seamless support by integrated management of information on disaster victims
5. Urban development
  - ① Solve urban problems by developing an environment where diverse geospatial data can be utilized seamlessly
  - ② Realize a one-stop service for real estate procedures in throughout Tokyo
6. Environment
  - ① Realize DX in procedures and information management related to industrial waste
  - ② Collect, analyze, and transmit information on natural environments in wide areas
  - ③ Back up environmentally friendly actions throughout Tokyo
7. Industry
  - ① Speed up support for the citizens of Tokyo and businesses by introducing AI-based examination of subsidies
  - ② Establish a platform which “visualizes” startups throughout Japan

## Lead “Policy DX” throughout TMG by implementing the leading projects

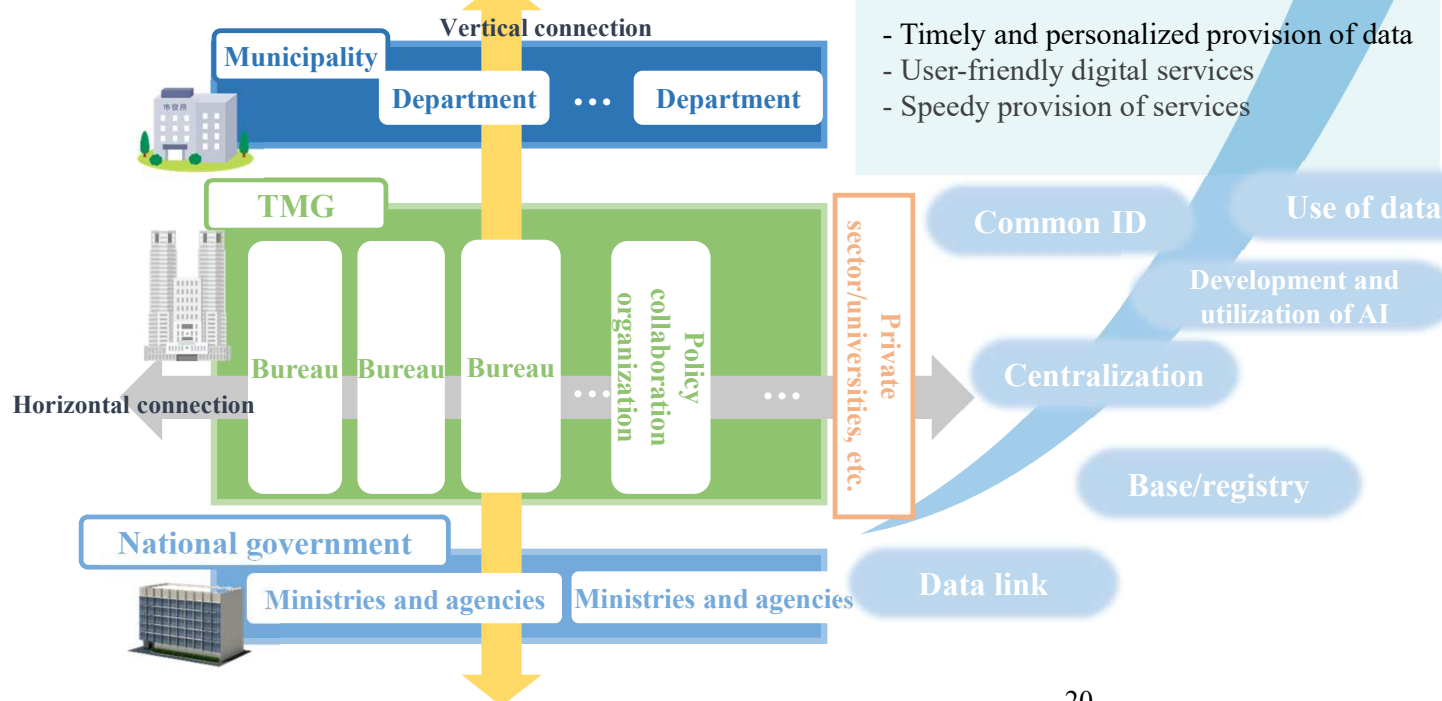

- ✓ It is important to collaboratively deploy procedures and services which are currently provided separately in the national government, TMG, and municipalities **across the borders of local governments** so that **the citizens of Tokyo can feel the improved QOS**.
- ✓ It is essential to **review the TMG’s operations and promote BPR\*** on a larger scale so that the employees can focus on more innovative operations and provision of services to the citizens of Tokyo.
- ➔ **Policy DX is led throughout TMG** building upon this leading project to promote **BPX\*** and realize the three basic digital principles for the purpose of improving the QOS of TMG. As a result, **the quality of services will improve** and **“you time”** (personal time) of employees increase.

### From BPR to BPX

**Business Process Transformation (BPX) beyond the borders of organizations (between the Bureaus in TMG, the national government, and municipalities) are realized with the help of DX.**

\* BPR: Business Process Re-engineering. It refers to the optimization of operating processes.

\* BPX: Business Process Transformation. It refers to the transformation/improvement of operations beyond the borders of organizations.

### Realization of three basic digital principles

**Digital first (right away)**

**Once only (once)**

**Connected/One-stop (at one place)**

**The citizens of Tokyo and businesses can feel the QOS of TMG**

# 1 Childcare

- ① Respond to the desire of all children to “learn more” and “receive advice” through digital tools

Partners

National government/other prefectures

Municipalities

Bureaus in TMG

Policy collaboration organization

Targets

Citizens of Tokyo

Businesses

TMG Employees

## Future image to reach for

- Create digital touch points with all children by connecting each device provided for each student/child to the TMG children website and other websites throughout Tokyo
- Deploy “contents that stimulate intellectual curiosity” and an “environment where children can talk about their anxiety and worries casually and, if necessary, consult to a close professional body or counter” across the border between TMG and municipalities.

### Overall image

Efforts are made separately by each area...

Create direct “digital touch points” with all children

Stay connected

## Desire to “learn more” is supported by digital tools

### Specific approach

## Children can discuss vague anxiety and worries

## Short-term (Fiscal 2025)

- In 46 municipalities, each device provided for children is connected to the Tokyo Children Website
- Production of a website for junior and senior high school students (provisional title)
- Full launch of “Gyutto Chat” where children can casually discuss their anxiety and worries

## Mid-term (Fiscal 2028)

- The connection of “1 device for 1 student” to the Tokyo Children Website and the website for junior and senior high school students (provisional title) is extended throughout Tokyo
- Production of contents for “enjoying learning” by listening to opinions from children on a continuous basis
- A consultation system is optimized by analyzing the content of consultations sent to “Gyutto Chat”

## Long-term (Fiscal 2035)

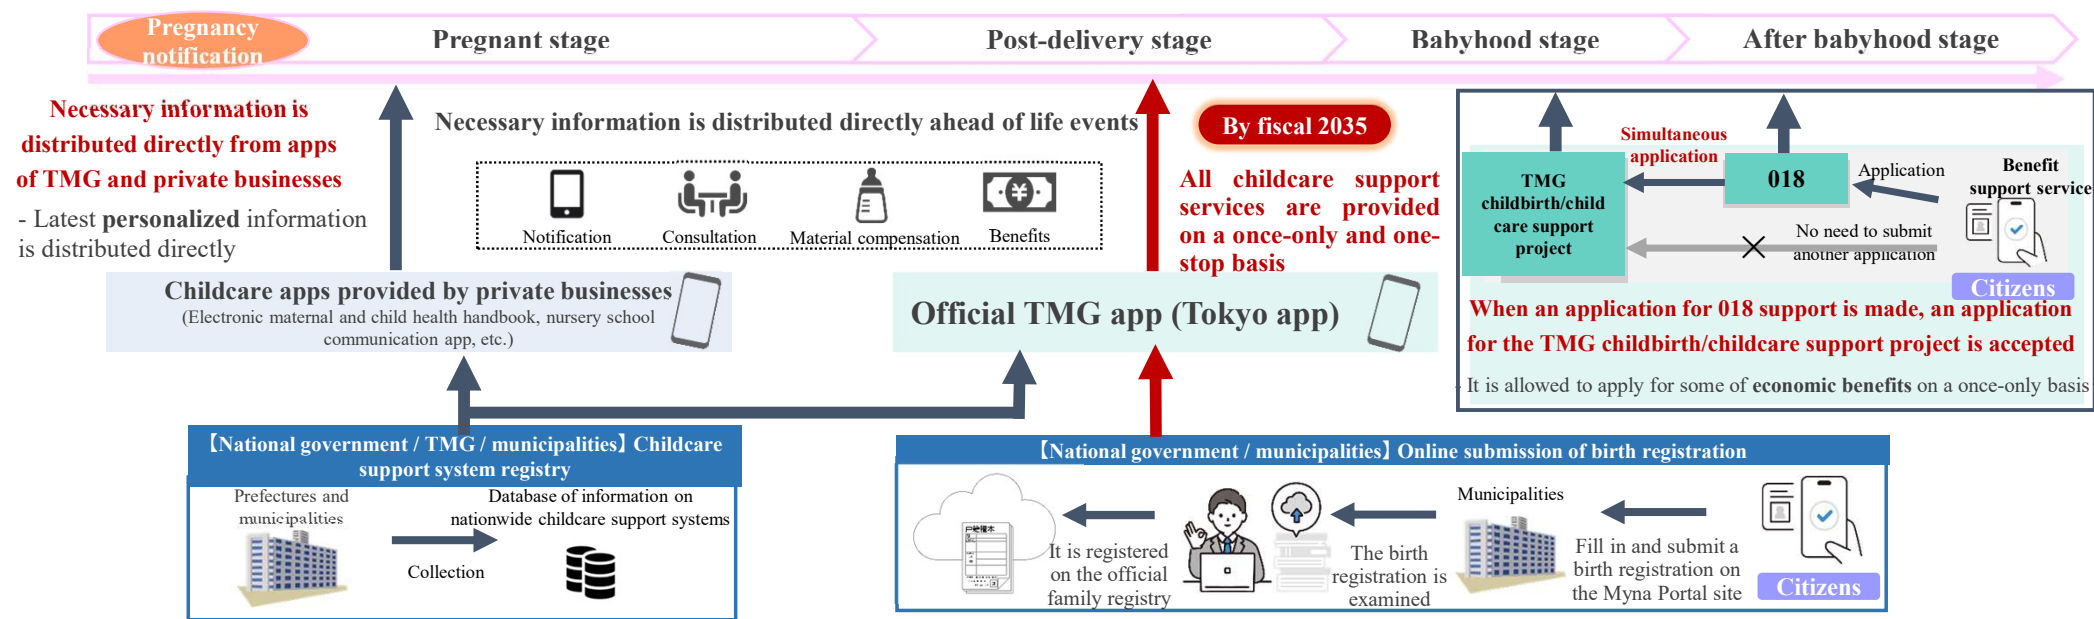

- The desire of all children to “learn more” is supported based on two functions, “safety net for learning” and “exploration of intellectual curiosity”
- Appropriate support is provided on a one-stop basis by connecting consultation counters and professional bodies using “Gyutto Chat” as a core counter

## ② Realize all childcare support services on a Once-Only and One-Stop basis

### Future image to reach for

- In collaboration with the municipalities, **all childcare support services can be provided on a once-only and one-stop basis** at the time when a **birth registration is submitted online**.
- **Necessary information is sent ahead of life events** to prevent the lack of information or omission of application. In addition, **user-friendly and convenient services are provided**.

### Short-term (fiscal 2025)

- When an application for 018 support is made, an application for the TMG childbirth/childcare support project is accepted. Some of services are provided on a once-only basis.

### Mid-term (fiscal 2028)

- Latest personalized information is distributed directly from apps of TMG (Tokyo childcare switch app, etc.) linked to the childcare support system registry.

### Long-term (fiscal 2025)

- In collaboration with the municipalities, all childcare support services are provided on a once-only and one-stop basis at the time when a birth registration is submitted.

## 2 Education

### ① Support learning of children and empower teachers through DX in education

Partners

National government/other prefectures

Municipalities

Bureaus in TMG

Policy collaboration organizations

Targets

Citizens of Tokyo

Businesses

TMG employees

#### Future image to reach for

- **Transform learning style and teaching style** through DX in education to nurture human resources who can take advantage of their capabilities in a society where things are difficult to predict

- Promote the transformation to a “new teaching style” in Tokyo public high schools
- Dedicated generative AI is utilized in all Tokyo public schools to improve AI literacy of children
- **Realize optimal tailor-made learning based on data on education**
- **Children make maximum use of digital tools to decide their learning process**

- **The workstyle reform of teachers will be accelerated with the help of digital tools** to increase the time dedicated to children and improve the quality of education

- A **working environment** will be enhanced so that teachers **can carry out their duties anywhere** (Tokyo public schools)
- **Efficient school affairs** utilizing **digital tools** (Tokyo public schools)
- Promotion of **standardization** of school affair support systems and **data link across the borders of municipalities in Tokyo**

Deepen learning utilizing AI and digital learning materials

Evidence-based teaching

Support for learning of children

#### Deployment and application to municipalities

Improved work efficiency

Joint procurement and standardization of systems

Location free

#### Sharing and collaboration with municipalities

#### Short-term (fiscal 2025)

- Utilization of generative AI in all Tokyo public schools
- “Future learning through digital tools”\* is deployed in all municipalities in Tokyo
- Consideration to standardize integrated school affair support

#### Mid-term (fiscal 2028)

- Introduction of class on generative AI in all Tokyo public schools
- “Future learning through digital tools” is introduced in all Tokyo public schools
- Introduction of standardized school affair support system in antecedent local governments

#### Long-term (fiscal 2035)

- A new learning style making maximums use of generative AI and data on education (dashboard, etc.) becomes a new standard
- All municipalities in Tokyo utilize the standardized school affair support system

\*A teaching style very different from the conventional teaching style to realize proactive and interactive learning with the help of digital tools aimed at improving the potential of each child without no one being left behind

## Challenge toward 2035!

### Learning style and teaching style reforms with digital tools, transformation to a “new educational approach” in Tokyo public schools

■ An era in which it is difficult to predict things such as the explosive evolution of digital technologies has arrived. On the other hand, employment patterns and workstyle are changing drastically as seen in the introduction of telework and the increase in freelancers and career changes. It is necessary for schools to cultivate flexibility, creativity, independence, and a spirit of challenge so that students can adapt to changes.

■ A desirable learning style is reviewed to promote the educational reform in accordance with the interest of each student.

#### 『LPX (Learning Platform Transformation)』 of the learning infrastructure for a “new educational approach”

Conventional school education	
Place/time	Mainly at schools and classrooms Time tied to the schedule
Instructors Content of learning	Mainly by (licensed) teachers Textbooks (Courses of Study)
Evaluation of deliverables	Credits (time spent)
Learning style	Collective teaching by teachers

Future image of school education (updated constantly)	
Place/time	Inside and outside schools (external organizations, online) Anytime
Instructors Content of learning	Experts, business persons, role models + Teachers provide support with expertise in their subject <b>Research on social issues, new values, solutions</b>
Evaluation of deliverables	<b>Deliverables created by students</b> (research papers, participation in competition, etc.) are evaluated
Learning style	<b>Students learn proactively</b> in accordance with the level of knowledge or interest.

Human resources who can create new values and solutions are nurtured in a society where things are difficult to be predicted.

#### DX in education

##### Learning style and teaching style reforms with the help of digital tools

- Utilization of on-demand materials and digital textbooks
- Visualization of learning through digital learning infrastructure (LMS: Learning Management System)

#### System

##### Flexible application of the Courses of Study, etc.

- Hybrid operations of full-time, part-time, and correspondence schools
- The number of classes and the schedule are operated flexibly

#### Teachers and organizations

##### Transformation of teachers and organizations of all Tokyo public schools

- Teachers become “guides of learning of students”
- Fulfilling activities inside and outside schools by connecting schools horizontally

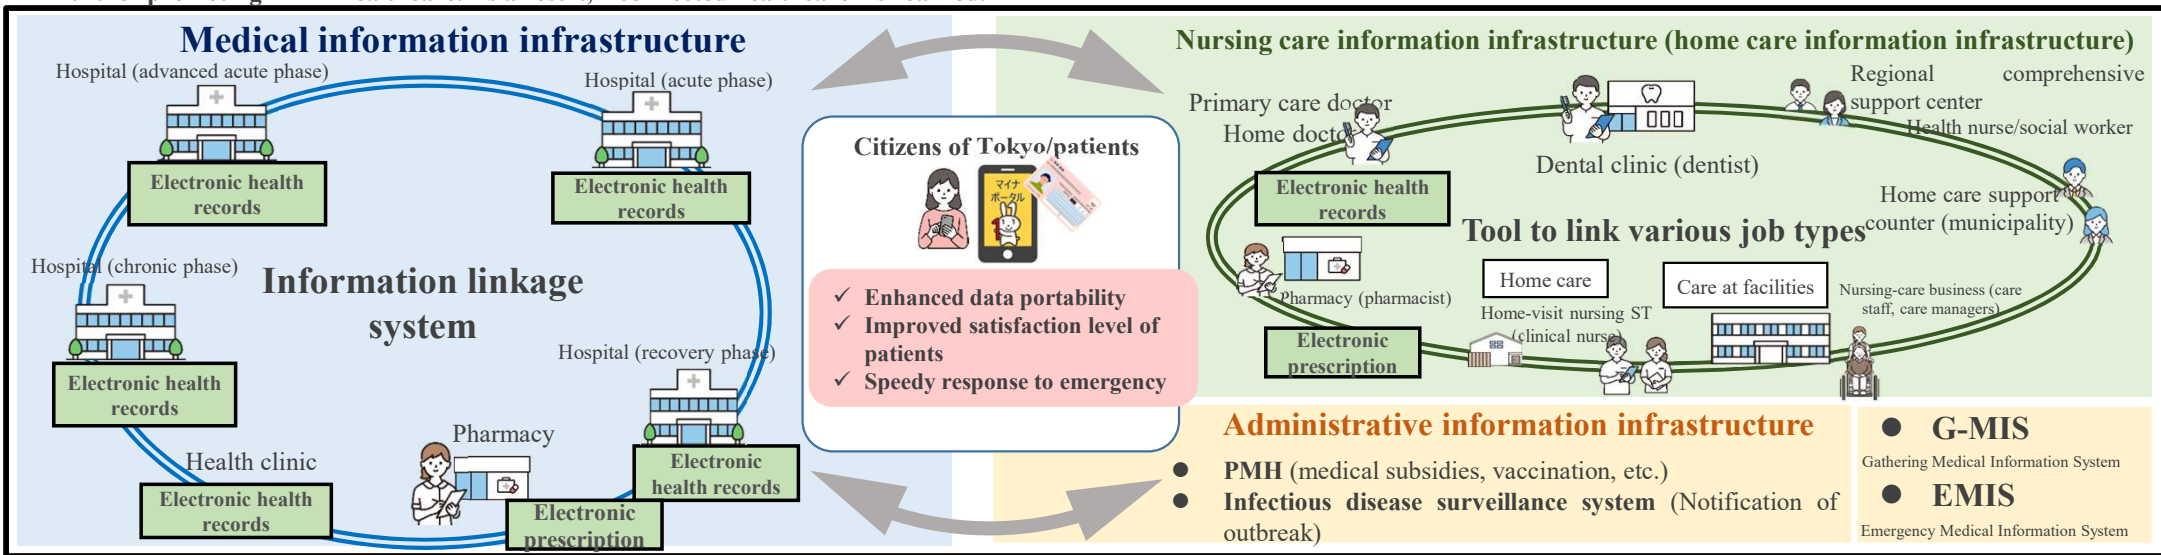

Deployment of new education by the optimal combination of digital and real

# 3 Healthcare and welfare

## ① Realize “connected healthcare” by further promoting DX in healthcare

### Future image to reach for

- Data portability of patient information and a satisfaction level of patients will improve by developing an information linkage infrastructure between the fields of healthcare, nursing care, care for the handicapped, and governments. Moreover, emergencies such as disasters and new infectious diseases are dealt swiftly.
- An information linkage infrastructure between stakeholders is established by introducing electronic health records, information linkage system, electronic prescriptions, and tool to link various job types, linking electronic health records to infectious disease notifications, and connecting information on medical subsidies owned by the government to PMH for the purpose of further promoting DX in healthcare. As a result, “connected healthcare” is realized.

### Short-term (fiscal 2025)

- (System)
- Support for the introduction of electronic health records, etc. to medical institutions
  - Support for the introduction of electronic prescriptions to medical institutions and pharmacies
  - Support for system upgrade to connect PMH to medical institutions
- (Patient service)
- Survey on needs for the improvement of DX environment for patients
- (Response to emergency)
- Improvement of the flow of response to emergencies based on the addition of functions to the administrative information infrastructure

### Mid-term (fiscal 2028)

- (System)
- Rate of introduction of electronic health records and information linkage infrastructure to hospitals: Nearly 100%
  - Introduction of electronic prescriptions to medical institutions and pharmacies: Accomplished
  - Connection of TMG/municipalities to target PMH: Accomplished
  - Establishment of information linkage infrastructure between healthcare, nursing care, care for the handicapped, and governments
- (Patient service)
- Establishment of a role model of DX environment for patients
- (Response to emergency)
- Extension of functions of the administrative information infrastructure in anticipation of emergencies and the launch thereof

### Long-term (fiscal 2035)

- (System)
- Rate of introduction of electronic health records to health clinics and the completion rate of development of the information linkage infrastructure: Nearly 100%
  - Rate of connection of medical institutions to PMH: Nearly 100%
  - Launch of the information linkage infrastructure between healthcare, nursing care, care for the handicapped, and governments (improvement of patient satisfaction level)
- (Patient service)
- A role model of DX environment for patients is deployed to medical institutions
- (Response to emergency)
- Speedy and efficient provision of information on patients and medical resources based on the principles of digital first and once-only in anticipation of emergencies

## ② Expand the TMG's guidance and inspection system as a "Japan model" nationwide

Partners

National government/other prefectures

Municipalities

Bureaus in TMG

Policy collaboration organizations

Targets

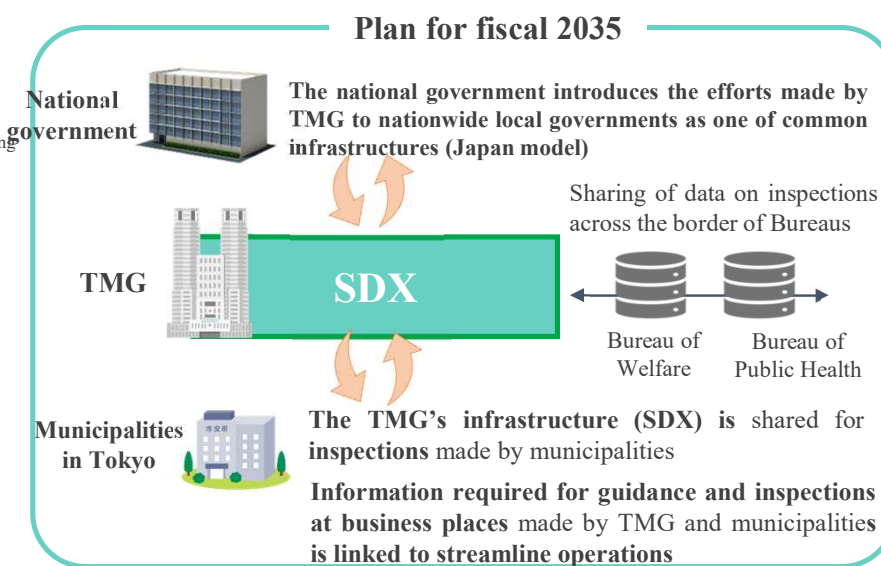

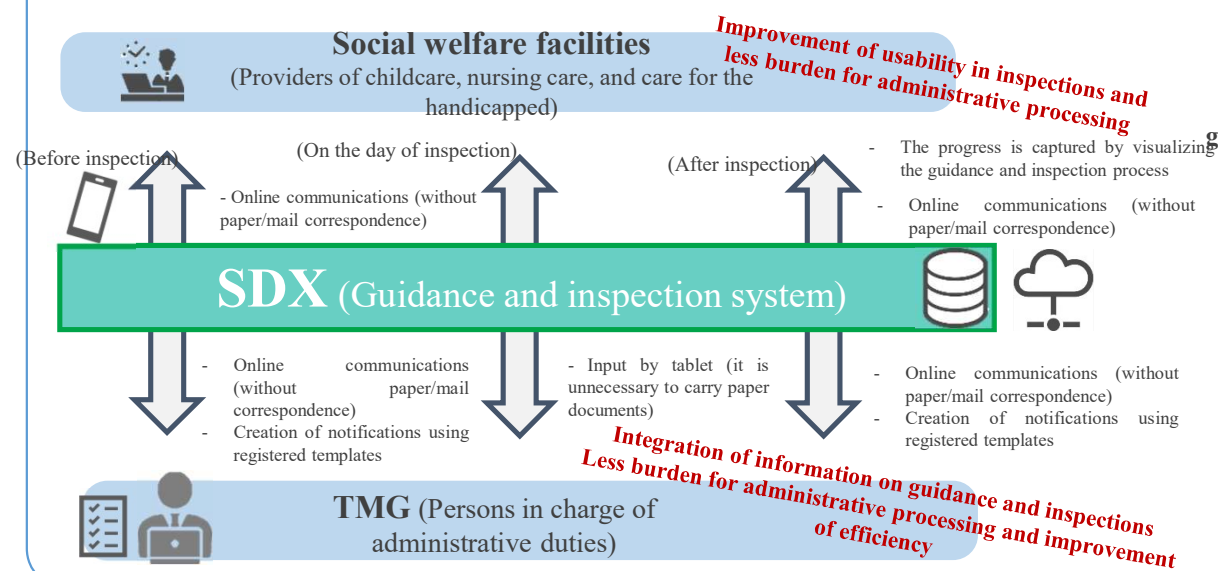

Citizens of Tokyo

Businesses

TMG employees

### Future image to reach for

- The operational process for guidance and inspections at social welfare facilities, etc. is **streamlined utilizing cloud** and this framework is deployed to municipalities in Tokyo.
- The digitalization and integration of data will improve the usability for businesses and alleviate administrative burden for governments. These advanced efforts are introduced nationwide as "Japan models".

### Short-term (fiscal 2025)

- Development for shared use of SDX by municipalities
- Shared use of SDX on a pilot basis

### Mid-term (fiscal 2028)

- Gradual expansion of target municipalities
- Examination of national rollout together with the national government

### Long-term (fiscal 2035)

- Available in all municipalities that desire to introduce this system
- Operations and systems for guidance and inspection in various fields used by nationwide local governments are deployed as "Japan model"

### ③ Realize Once-Only and One-stop services for information on business places in the healthcare and welfare fields

Partners

Targets

National government/other prefectures

Citizens of Tokyo

Municipalities

Businesses

Bureaus in TMG

TMG employees

Policy collaboration organizations

#### Future image to reach for

- Operational efficiency of employees will improve by **integrating data of business places across the fields** of healthcare and welfare. It becomes possible to file applications with different organizations/departments all at once and it will be unnecessary to re-enter information entered once.
- In the future, a **once-only service is realized by linking application information in various fields** through databases of businesses.

#### Business places in Tokyo (businesses)

**Once-only and one-stop applications are realized in the healthcare and welfare fields**

- Several applications can be made all at once
- It is not necessary to re-enter information entered once for other applications

#### Municipalities in Tokyo

Application

My page (DB of business places)

TMG

Digital platform (DPF)

Data link across the borders of Bureaus, fields, and systems

TMG employees

(those in charge of administrative affairs)

**Speedy and efficient administrative processing**

- Information is reflected on departments that receive application
- Information on business place (business) of each system is referred to, checked, or used on a timely basis

DB of businesses

- Link information on businesses in various fields owned by TMG and the national government

※ Refer to the Shared DX-framework promotion projects (p.39)

By fiscal 2028

- Link to major systems in the healthcare and welfare fields

By fiscal 2035

- Link information on applications in various fields through databases owned by businesses

- Sharing of required information on businesses with municipalities in Tokyo

#### Short-term (fiscal 2025)

- A one-stop system (my page) is established so that it becomes unnecessary to re-enter information entered once (once-only) and the procedures can be taken with various organizations/departments with one application (one-stop).

#### Mid-term (fiscal 2028)

- Linked to major systems in the healthcare and welfare fields (nursing care, care for the handicapped, childcare, support for women, welfare, medical care that own basic information on business places)

#### Long-term (fiscal 2035)

- Integration of information on businesses in various fields through databases owned thereby (once-only/one-stop)
- Sharing of necessary information on business places with municipalities in Tokyo

#### ④ Provide required support through digital tools and enhance watching over of the elderly

##### Future image to reach for

- In order to respond to the increase in the elderly population, the system to **watch over the elderly at a local level** and the **collaboration system** are strengthened with the **help of digital devices**, providing required support swiftly.
- Realize a **society where the elderly can live without concerns in local communities** by establishing a detailed watching over system by sharing information on the app.

**Alleviate the burden for watching over supporters by promoting the participation of various players such as life-related companies and organizations**

Watching over and exchange in daily duties and life

How to download and respond is checked

##### Local watching over app (Development / improvement)

- Information on guide to watching over
- Search for actions to be taken when any abnormality is found
- Sharing of information with a regional comprehensive support center, etc.

Differences from normal times or observations such as abnormal signs are shared on the app.  
Shared information is assessed

Watching over consultation counter at regional comprehensive support center

**Timely assessment of situations, smooth information sharing, promotion of active watching over through outreach, etc.**

##### The elderly

##### Enhancement of specialized watching over by government

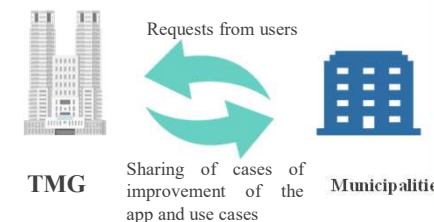

- Promotion of the development of communities where the elderly are watched over
- Detailed response in accordance with situations
- Accurate and speedy response when any abnormality is found

**Security companies can be utilized depending on the capability of each government**

Department in charge at municipality

##### Future developments

- Prior implementation in some municipalities
- Improvement of the functions of the app based on opinions of users

- The number of target local governments will increase gradually and **this system will be introduced in all municipalities in Tokyo around fiscal 2035**

##### Short-term (fiscal 2025)

- Development of app
- Selection of partner local governments/prior implementation

##### Mid-term (fiscal 2028)

- Improvement based on opinions from users
- Expansion of target local governments

##### Long-term (fiscal 2035)

- Active watching over is realized throughout Tokyo by timely assessment of situations using digital tools, smooth sharing of information, and outreach.

## 4. Disaster prevention

**① Reinforce the capabilities of protecting the lives and life of the citizens of Tokyo through the integrated and seamless utilization of disaster information**

## Future image to reach for

- **Disaster information is managed integrally and visualized across the borders of different systems** used by TMG Bureaus, the national government, and municipalities. As a result, operations of disaster countermeasures will **speed up to protect the lives and livelihoods of the citizens of Tokyo**.
- **Accurate information is sent to the citizens of Tokyo on a timely basis through various channels** such as the disaster prevention website and app.

National Government, Self-Defense Force, Japan Coast Guard Municipalities  
Disaster prevention bodies  
Civil information (TDPF)  
SNS  
Metropolitan Police Department  
Tokyo Fire Department  
Bureau of Construction  
Bureau of Port and Harbors

**Disaster information shared across the borders of different systems is consolidated and managed integrally**

TMG

**Thorough review of the TMG Disaster Information System (DIS)**  
DIS that supports accurate operations in times of disaster is rebuilt.

- Easy-to-use app for beginners
- Promotion of consolidation and integrated management of information
- Analyze and visualize information in an easy-to-understand manner to display a list

### TMG Disaster Information System (DIS)

[illegible]

## Speedy disaster operations

Strengthen the capabilities of protecting the lives and livelihoods of the citizens of Tokyo from disasters

- Assess general situations of a disaster accurately and instantly
- Make decisions accurately and swiftly based on consolidated information
- Speed up the transmission of information between stakeholders

## Disaster Management Headquarters

**Timely transmission of information in accordance with its target by each department** (Press/Public Relations Team, TMG Disaster Management Headquarters)

- Transmission of disaster information in an appropriate and timely manner
- Warning for the citizens of Tokyo (prevention of false alarms/panic buying)
- Information on emergency countermeasures that gives the citizens of Tokyo a sense of security

※A system resistant to cyberattacks or disruption of power supply is established

## Media/Citizens of Tokyo

## Promotion of appropriate actions

### Short-term (fiscal 2025)

- Completion of design of the TMG Disaster Information System (DIS) for its reconstruction

**Mid-term (fiscal 2028)**

- The next DIS will be launched (2027) for the purpose of realizing more speedy disaster management operations and smooth provision of information to the citizens of Tokyo

**Long-term (fiscal 2035)**

- Real-time data is utilized seamlessly beyond the border of different systems
- The distribution of information to the citizens of Tokyo is enhanced by using various channels
- A system to support strategy planning and command is established based on information on damage prediction

## ② Realize seamless support by integrated management of information on disaster victims

Partners

National government/other prefectures

Municipalities

Bureaus in TMG

Policy collaboration organizations

Targets

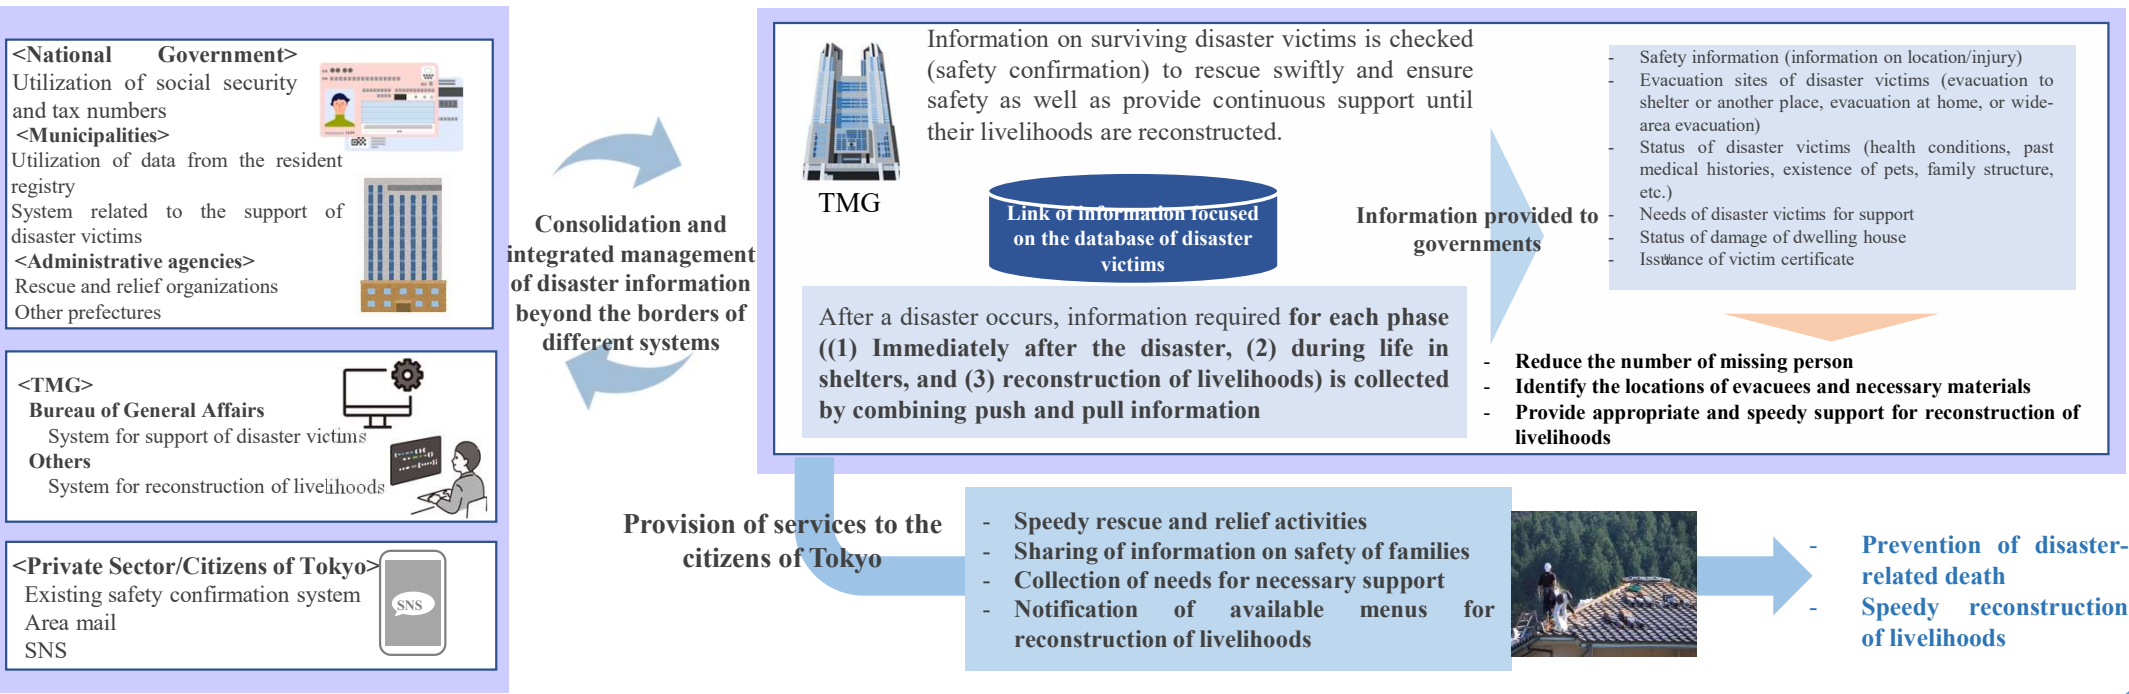

Citizens of Tokyo

Businesses

TMG employees

### Future image to reach for

- Consistent management of information on disaster victims from the safety confirmation phase immediately after a disaster to the reconstruction phase
- The locations of evacuees are identified and necessary support is provided swiftly and orderly.

### Short-term (fiscal 2025)

- Investigation and consideration for establishing a system to consistently manage information from a phase immediately after a disaster

### Mid-term (fiscal 2028)

- Completion of design of a system to consistently manage information from immediately after a disaster occurs

### Long-term (fiscal 2035)

- Information on disaster victims is managed consistently to identify the locations of evacuees and necessary support
- Timely and continuous support is given under the collaboration between municipalities and Bureaus in TMG from the phase immediately after the disaster to the reconstruction phase

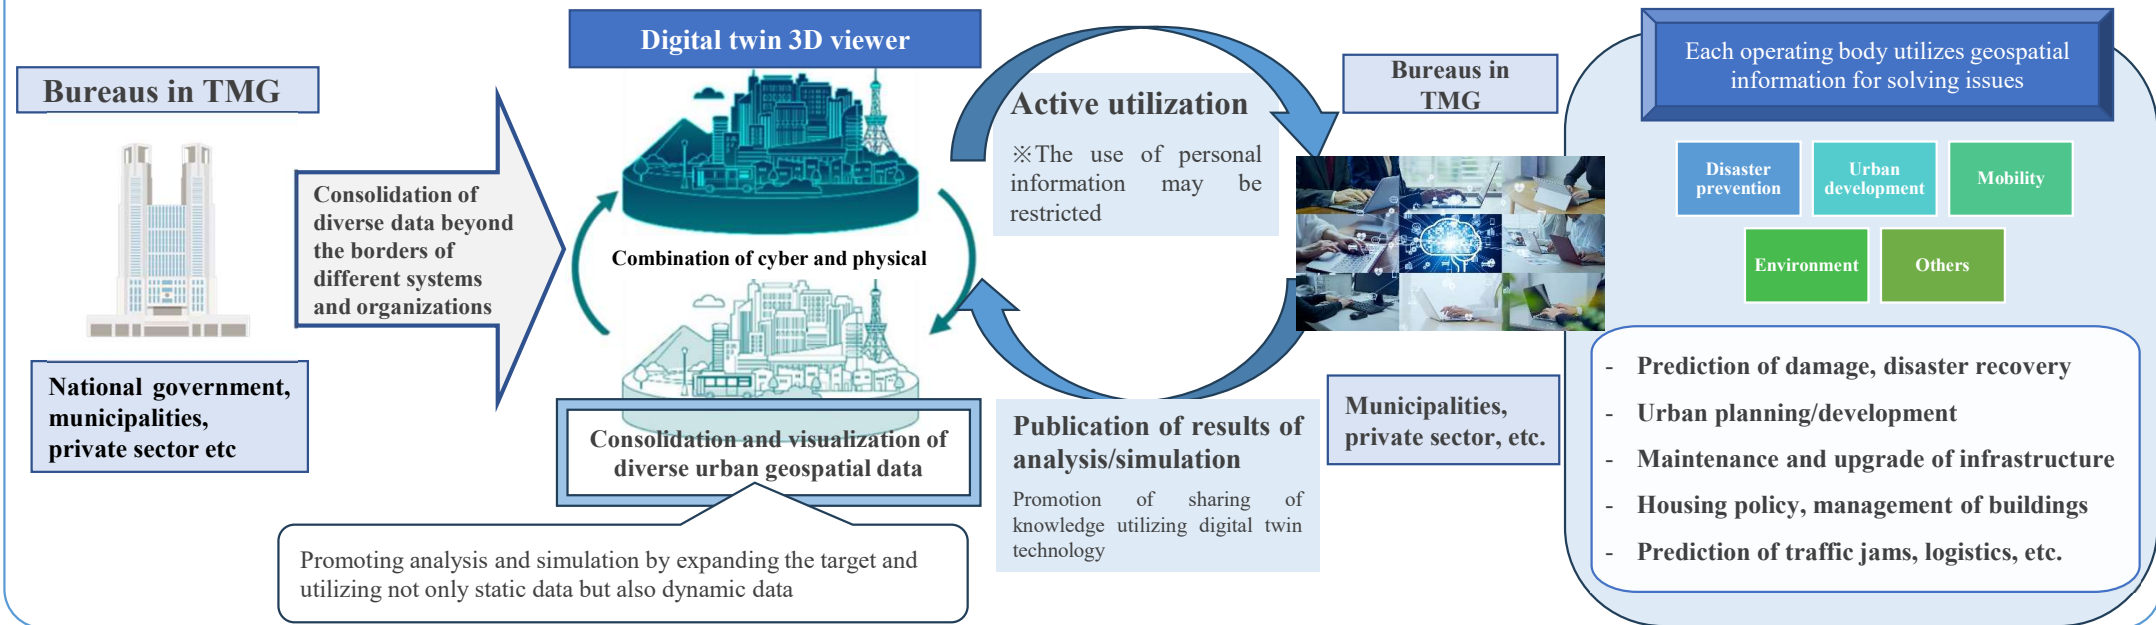

# 5 Urban development

① Solve urban problems by developing an environment where diverse geospatial data can be utilized seamlessly

Future image to reach for

- **Diverse geospatial data** owned by the Bureaus in TMG, the national government, municipalities, and the private sector **is consolidated and visualized by 3D viewer**.
- **Smart Tokyo is realized** in all projects carried out by TMG by combining cyber (virtual) and physical (real). **Its use** by municipalities and the private sector is **promoted**.

## Short-term (fiscal 2025)

- 3D models of all the areas in Tokyo become available by making available 3D models in the islands.
- Geospatial data such as 3D models is used and linked for buildings along roads for emergency transportation, countermeasures against debris flood, and port facilities.

## Mid-term (fiscal 2028)

- The specifications and standards for data are coordinated toward the integration of various digital twins whose scale is different (throughout Tokyo, areas, buildings).
- The utilization of 3D models is promoted at each Bureau so that their effect is seen in various use cases.

## Long-term (fiscal 2035)

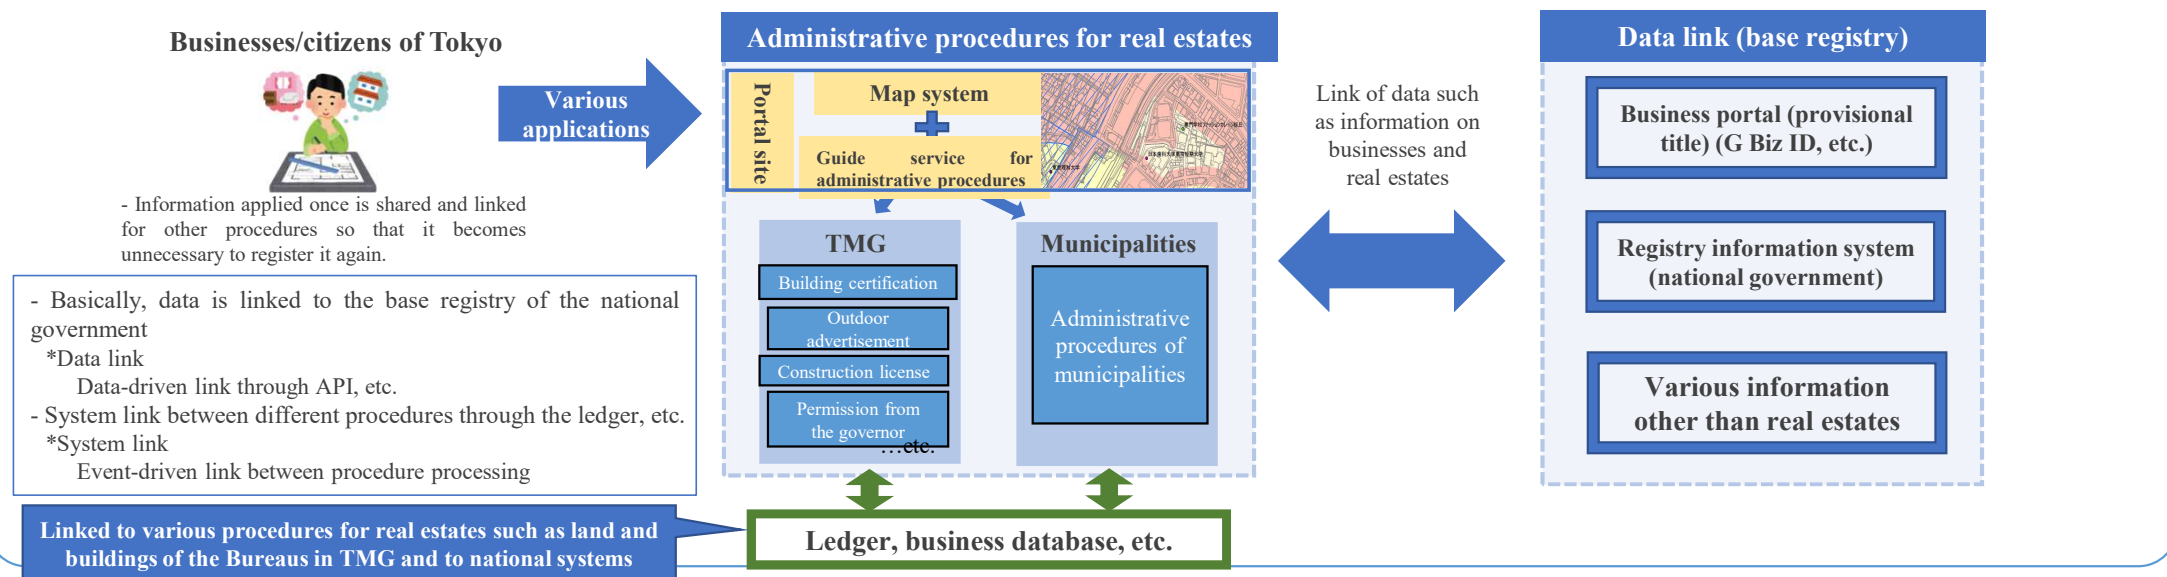

- Utilization of 3D viewer with a view to linking to dynamic data
- An environment where the national government, municipalities, neighboring prefectures, and businesses can utilize geospatial data seamlessly is realized to back up DX in various fields such as disaster prevention and urban development.

## ② Realize a one-stop service for real estate procedures in throughout Tokyo

### Future image to reach for

- **Once-only and one-stop** procedures are realized by linking data and introducing a “guidance service for administrative procedures” which explains necessary procedures in an easy-to-understand manner utilizing **maps and AI**.
- The procedures at the Bureaus in TMG and municipalities will be included with the aim of **speeding up administrative processing and improving its efficiency throughout Tokyo**.
- Smart Tokyo is realized by developing an environment where it is easier for users to examine how to exploit land by obtaining access to various data on land through data link.

### Short-term (fiscal 2025)

- The base registry of applicant information and the portal site are under construction for major procedures of the Bureau of Urban Development.

### Mid-term (fiscal 2028)

- Launch of a portal site utilized to apply for outdoor advertisement registration, construction license, and building certification
- The progress of a “business portal (provisional title)” of the national government is checked to summarize requirements for TMG

### Long-term (fiscal 2035)

- The service is deployed in the Bureaus in TMG and municipalities by linking to the business portal (provisional name) of the national government.
- An environment where land can be used more easily for construction, etc. will be developed by linking information on regulations and various facilities.

# 6 Environment

## ① Realize DX in procedures and information management related to industrial waste

### Future image to reach for

- The procedures for industrial waste are **managed and operated integrally** and **user-friendliness improves** by establishing a model with a view to linking them to the national system and utilizing them in other local governments.
- A system to **share information** on circulation and proper treatment of resources by industrial waste disposers and **promote the transfer to a circular economy** is examined and established

### Effects

- ✓ Improvement of usability of services for related businesses, etc.
- ✓ Improved operational efficiency by integrating industrial waste-related information in collaboration with the national government
- ✓ Promotion of further resource circulation by developing an infrastructure for linking between static industries to dynamic industries
- ✓ Establishment of model cases with a view to utilizing them in other local governments

### <Future developments>

#### Prior establishment of sub-systems which can be developed from an early stage

#### **【Sub-system for online notification of vehicle change】**

The procedure for notification of vehicle change can be made online and it is linked to information on automobiles registered with the national government

#### **【Sub-system for resource circulation sharing】**

The records of industrial waste processed by industrial waste disposers and information on recycling can be viewed and searched by businesses and manufacturers that generate industrial waste

### Rebuilding of the industrial waste information management system

⇒ Promotion of the expansion of collaboration with the national government and local governments

### Short-term (fiscal 2025)

- An automated verification sub-system is established in advance by making available the procedure for notification of change in industrial waste vehicle online and linking it to information on automobiles registered with the national government.
- A sub-system which allows manufactures, etc. to view and search information on records of processing and recycling by industrial waste disposers is established in advance to promote resource circulation.

\*The service of the sub-system established in advance will be launched in fiscal 2026.

### Mid-term (fiscal 2028)

- Rebuilding of the industrial waste information management system with a view to collaborating with the national government (development of principal system)  
\*The service of the whole system will be launched in fiscal 2029
- Collaboration with local governments in Tokyo responsible for the procedure for permission and licensing of industrial waste and policy collaboration organizations responsible for related duties

### Long-term (fiscal 2035)

- Expansion of the collaboration with the national government and other local governments

② Collect, analyze, and transmit information on natural environments in wide areas

Future image to reach for

- A model in the form of maps with information on appearances of wildlife is provided to **neighboring prefectures in Kanto** and **linked to apps provided by private companies**.
- Operational efficiency and user-friendliness for the citizens of Tokyo will improve by establishing a system with a view to linking data to nationwide local governments.

TOKYO Kumap (information on sightings of black bears)

Different colors depending on the period of sightings

Timely information provision

Provision of detailed information in lists

Effects

- ✓ Creation of **user-friendly and convenient maps** based on opinions from users and TMG employees
- ✓ **Timely information provision** by increasing the frequency of information update through better operational efficiency
- ✓ In the future, **information will be transmitted to other prefectures** in collaboration with local governments in neighboring prefectures in Kanto

Prevention of damage on humans by wildlife such as bears

Future developments

The initiative of TMG is shared as a common infrastructure

- Trial and collaboration for shared use
- Improvement of operability based on questionnaire
- Reports of sightings can be registered in the future (by municipalities, etc.)
- Large beasts other than bears will be included
- Data link to nationwide local governments

Short-term (fiscal 2025)

- Further improvement of operability by utilizing the survey function added to TOKYO Kumap
- Consideration toward the establishment of a new system with a view to sharing it with neighboring prefectures

Mid-term (fiscal 2028)

- A new system is established and used on a trial basis with one neighboring prefecture
- Addition of a function of registering information on sightings of bears by municipalities
- Push notification of information on sightings of bears

Long-term (fiscal 2035)

- Further collaboration with nationwide local governments and apps provided by private businesses
- Large beasts other than bears (boars, etc.) will be registered

### ③ Back up environmentally friendly actions throughout Tokyo

#### Future image to reach for

- More events held by the national government and municipalities in Tokyo and facilities for environmental learning will be included in **the program in which anyone can enjoy and continue eco-actions** through environmentally-friendly learning and experiences.
- TMG backs up environmentally-friendly actions** by the citizens of Tokyo in collaboration with Tokyo Point (TP) and **spreads eco-actions with the participation of the citizens of Tokyo** “TOKYO-ecosteps” is a membership program in which anyone can enjoy and continue eco-actions through eco-friendly learning and experiences.

→ The members receive latest information on events and facilities for environmental learning and earn points in accordance with eco-actions.

#### Effects

- ✓ Expansion of participants and eco-actions through the collaboration with the national government, Bureaus in TMG, and municipalities in Tokyo
- ✓ Improvement of usability for the citizens of Tokyo by integrating points

#### Partners

National government/other prefectures

Municipalities

Bureaus in TMG

Policy collaboration organizations

#### Targets

Citizens of Tokyo

Businesses

TMG employees

Expansion of the collaboration with the national government, bureaus in TMG, and municipalities in Tokyo

Collaboration with Tokyo Point (TP)

#### Short-term (fiscal 2025)

■ More events held by the national government, Bureaus in TMG, and municipalities in Tokyo and facilities for environmental learning will be included in this program (Collaboration with municipalities: 20 local governments)

#### Mid-term (fiscal 2028)

■ Collaboration with Tokyo Point (TP)  
■ More events held by the national government, Bureaus in TMG, and municipalities in Tokyo and facilities for environmental learning will be included in this program (Collaboration with municipalities: 40 local governments)

#### Long-term (fiscal 2035)

■ More events held by the national government, Bureaus in TMG, and municipalities in Tokyo and facilities for environmental learning will be included in this program (Collaboration with municipalities: 62 local governments)

# 7 Industry

## ① Speed up support for the citizens of Tokyo and businesses by introducing AI-based examination of subsidies

Partners

Targets

National government/other prefectures

Citizens of Tokyo

Municipalities

Businesses

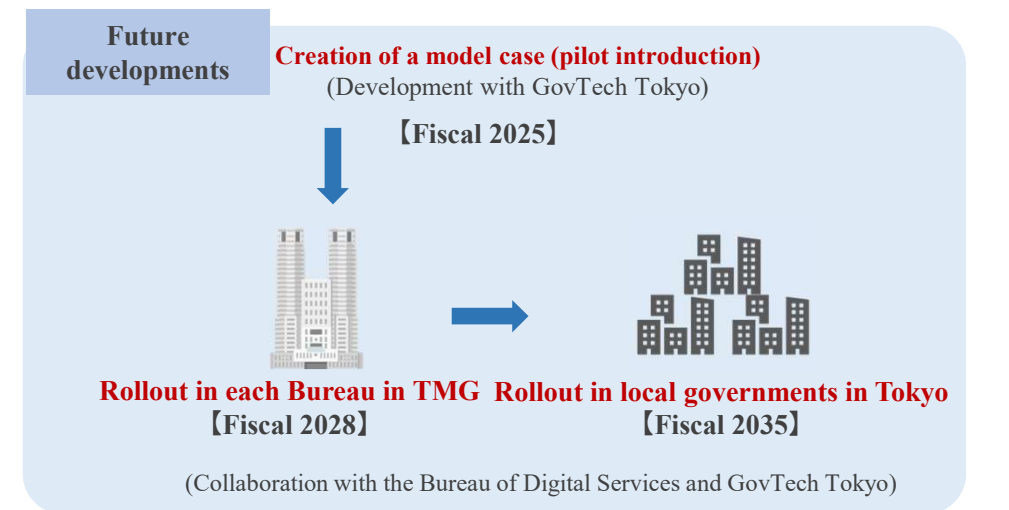

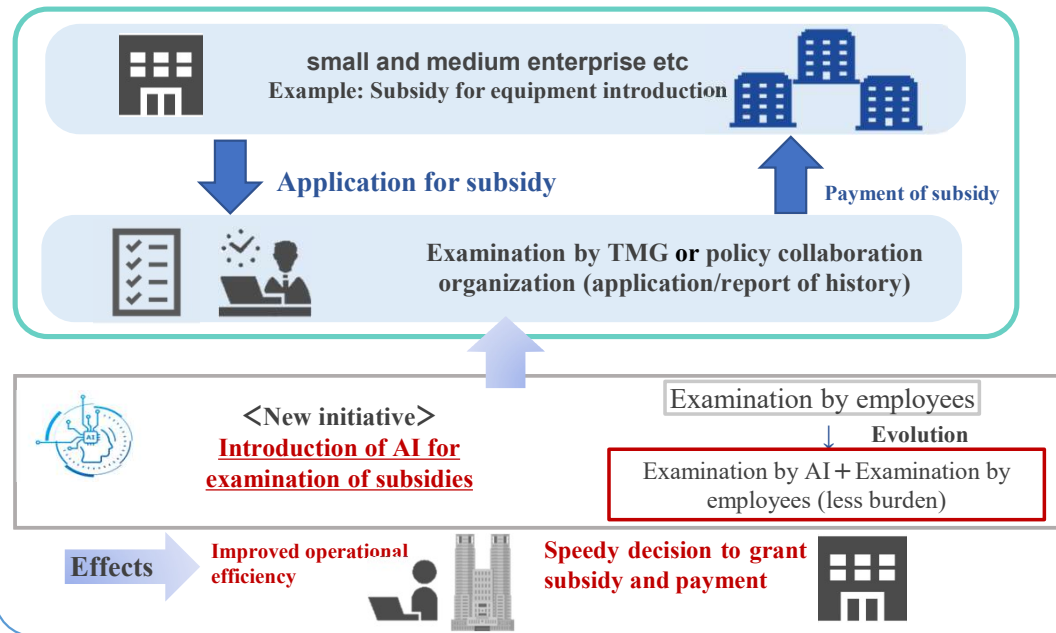

Bureaus in TMG

TMG employees

Policy collaboration organizations

Future image to reach for

- **Model cases in which AI is utilized for examination of subsidies** applied by small and medium enterprise are created and then **deployed in the Bureaus in TMG and other local governments.**
- **Operational burden is reduced** and decisions to grant and pay subsidies to the citizens of Tokyo and businesses **will speed up.**

Short-term (fiscal 2025)

- Start of development of model cases
- Pilot introduction (about 3 projects)
- Verification and improvement for full-scale rollout in fiscal 2026
- Transmission of the progress of development to each Bureau in TMG

Mid-term (fiscal 2028)

- **Start of utilization in Bureaus in TMG** that desire to use the system
- Improvement of examination precision by AI after the full-scale introduction

Long-term (fiscal 2035)

- **Wider use** in the Bureaus in TMG
- **Expansion of use in local governments in Tokyo**

## ② Establish a platform which “visualizes” startups throughout Japan

### Future image to reach for

#### Partners

#### Targets

National government/other prefectures

Citizens of Tokyo

Municipalities

Businesses

Bureaus in TMG

TMG employees

Policy collaboration organizations

- Establish a platform that visualizes nationwide startups engaged in solving social issues together with the national government, municipalities, and local governments and with the help of governments.
- Record the history of support provided to each startup and the status of growth. This data is utilized to capture a whole image such as the scale of economic impact. Moreover, this data is transmitted globally to promote the ecosystem of Tokyo and Japan.
- A system to realize once-only and one-stop procedures for supporting startups is established by linking this platform to apps for startups (TIB app, etc.) and G Biz ID.
- As a first step, a platform that visualizes startups that have connection with TMG is established based on TiB and deployed nationwide.

#### <Common platform>

##### Visualization of startups nationwide

- A list of startups is created and disclosed on a website, etc.
- Records of activities such as support given and participation in events are accumulated from a stage before starting a business to a stage after exit
- Periodic survey of information on market value and financing
- Grant of common codes to link to G Biz ID, etc. (through apps)
- Sharing of necessary data nationwide

\*Operated by each prefecture

Provision of information from startups, member registration, and collaboration with other initiatives

#### Global transmission

- Expositions held nationwide
- Link to global databases

#### Once-only and one-stop procedures

- Utilization of apps (TIB app, etc.)
- Link to G Biz ID and jGrants

#### Short-term and mid-term efforts

# TiB

“Visualization” based on the TIB app  
Building a platform

#### Long-term efforts

Nationwide rollout

#### Short-term (fiscal 2025)

- Summarization of historical data of collaboration with startups in TMG and creation of a list
- Design of link to the TIB app (member information registration function, etc.)

#### Mid-term (fiscal 2028)

- A system of consolidating information based on the TIB app is established and operated.
- Link to global major databases
- Participation in expositions held worldwide and promotion activities at SusHi Tech Tokyo and other events (total amount of funds raised, market capitalization, the number of employees, list of alumni, etc.)

#### Long-term (fiscal 2035)

- Once-only and one-stop procedures utilizing common codes and apps when receiving public procurement or support from TMG
- Standardization at a national level

## Policy DX-2

# Shared DX-framework promotion projects

- ① Development and utilization of AI throughout Tokyo (integration of AI)
- ② Apps that integrally connect TMG and the citizens (integration of apps)
- ③ Centralized management of administrative procedures (integration of procedures)
- ④ Utilization of business database (integration of information on businesses)
- ⑤ TOKYO Dashboard (integration of dashboard)
- ⑥ Strengthened security throughout Tokyo (integration of security measures)

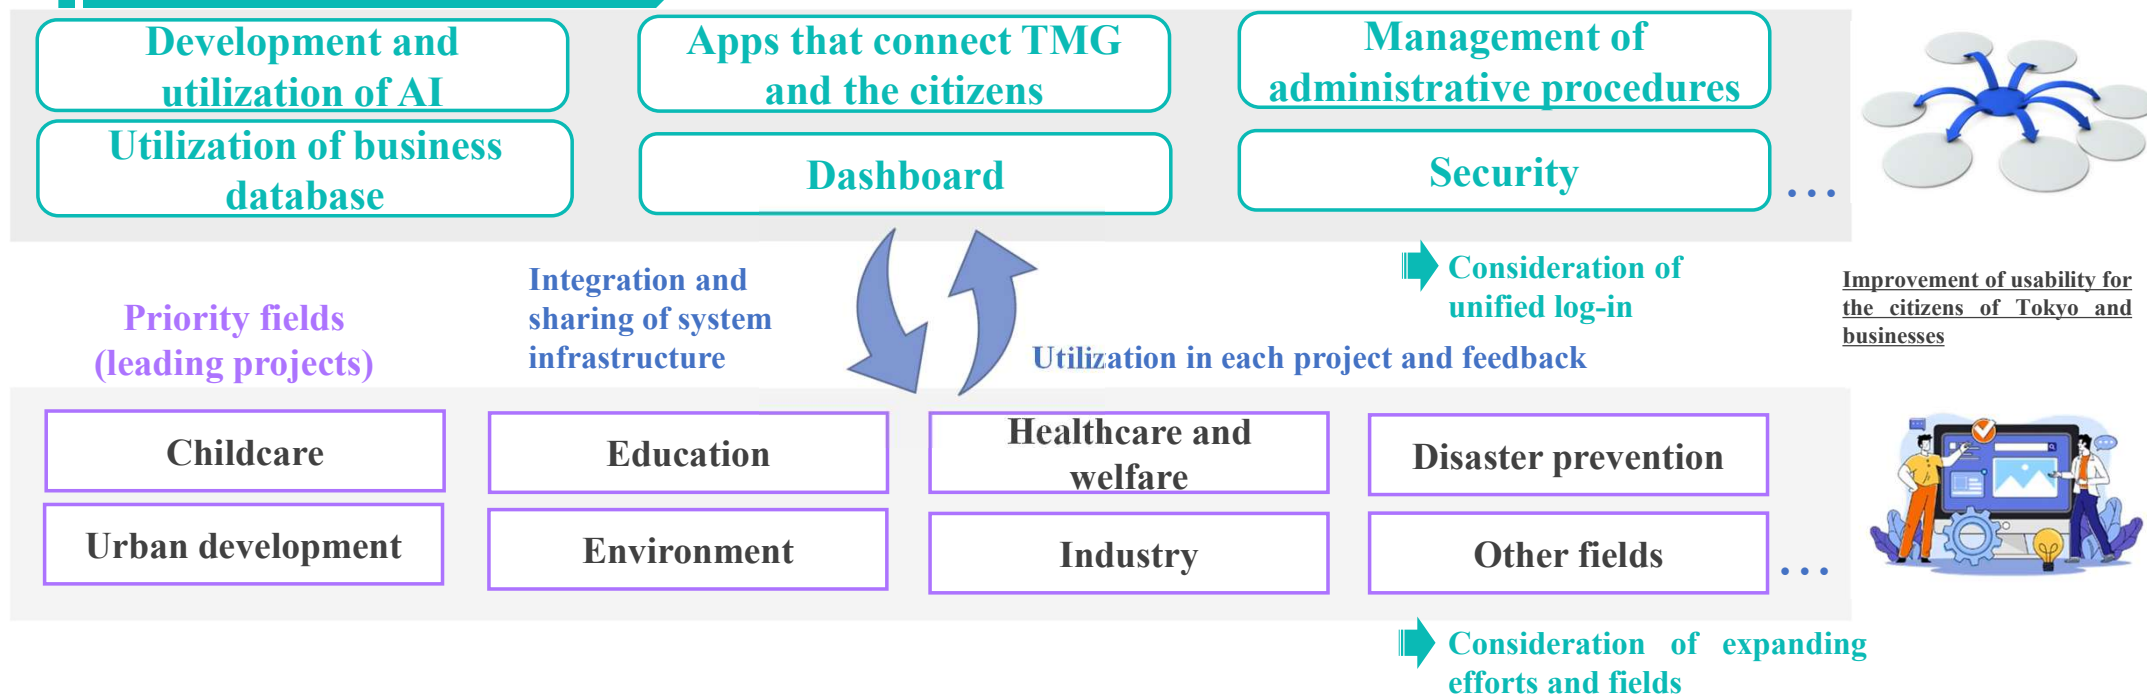

## Shared DX-framework promotion projects

When the operational reform (BPX) beyond the borders of governments is carried out utilizing digital tools, it is effective to **share use of systems and digital tools used in common or similar operations out of those carried out by the Bureaus in TMG and municipalities as the infrastructure that backs up Policy DX.**

Firstly, TMG will focus on six breakthrough fields and realize the three basic digital principles (digital first, once-only, connected/one-stop) utilizing the common infrastructure, thereby improving the usability for the citizens of Tokyo and businesses and streamlining internal operations. It is important to make efforts in line with the reality of operations of each Bureau utilizing the common infrastructure.

Six breakthrough fields toward the integration of system infrastructure

Effects of shared use ⇒ Improvement of efficiency by centralization and of quality by enhanced expertise

# Shared DX-framework promotion projects

## ① Development and utilization of AI throughout Tokyo (integration of AI)

### Future image to reach for

- A control tower function for the development and exploitation of AI evolving every day is introduced to thoroughly utilize AI throughout Tokyo. As a result, DX will be taken into the next stage and operational efficiency of TMG employees and the quality of services provided to the citizens of Tokyo will improve dramatically.

### Summary of issues to formulate AI strategy

#### Outline of the summary of issues (Basic idea)

##### I Creating a “Japanese model” of utilizing AI at a government level

- There are only a few cases where a city works on utilizing AI in a comprehensive manner. Moreover, TMG including municipalities face issues related to the utilization of AI common to all nationwide local governments.
- The challenge of TMG will contribute to solving issues of the whole country by sharing the efforts made and their process.
- The know-how and knowledge about how to introduce and utilize AI will be shared with nationwide local governments and the world as a “Japanese model” of utilizing AI at a government level.

##### II Promoting the efforts strategically from three perspectives. Governance and rules that support those efforts are established

###### 1 “Ability” to use AI

Reinforcing the ability to develop AI at a government level and promoting the utilization in fields in which AI functions more effectively at a government level and service transformation

###### 2 “Ability” to listen through AI

Improving communications with the citizens of Tokyo by enhancing the systems for public relations and front service provided by TMG and municipalities

###### 3 Ability to create AI

TMG contributes to AI industry and basic research with the aim of raising the level of the capability to develop AI of Tokyo and Japan

#### Responsible AI

Governance and rules for AI are established by local governments so that AI is utilized in a way that the citizens of Tokyo can feel trust and security.

### Summer 2025 Formulation of TMG AI Strategy

In February 2025, the “summary of issues to formulate AI strategy” was prepared at the TMG AI Strategy Meeting established in December 2024 based on opinions submitted from experts.

#### Four principles for the utilization and development of AI (draft)

- The Bureau of Digital Services supervises the efforts of the entire TMG.
- Common AI tools are utilized for common operations.
- AI applications are developed for common utilization in the entire TMG.
- The AI governance rules are implemented thoroughly.

(First TMG AI Strategy Meeting)

### Building and utilization of generative AI platform

- GovTech Tokyo will build a generative AI platform
- A generative AI application is produced internally based on common operations in TMG and applications used separately by the Bureaus will be integrated gradually
- The platform will be expanded to the municipalities in Tokyo and to nationwide local governments around fiscal 2035.

#### Short-term (fiscal 2025)

- Formulation of TMG AI strategy
- Building of a generative AI platform in collaboration with GovTech Tokyo
- Internal production and utilization of applications
- Introduction of broad listening and expansion of target

#### Mid-term (fiscal 2028)

- Expansion of the utilization of the generative AI platform in the entire TMG and municipalities
  - ✓ Common operations in TMG, operations of each Bureau, operations of municipalities
- Expansion of the target of AI digital broad listening
- Advanced front service

#### Long-term (fiscal 2035)

- The generative AI platform is also utilized in nationwide local governments
- Operations of TMG employees are assisted by this platform to dramatically improve their productivity
- The service transformation is realized in all administration fields

**Point !**

## Expanding the utilization of AI in the fields of TMG

### Bureau of Taxation

Utilization of AI to evaluate houses and buildings/Support for employees through a cross-sectoral information search tool utilizing generative AI

#### Before

Employees had to check the quantity of each material/equipment used based on plan views and enter data manually

#### After

**Image recognition AI reads plan views** to automate and streamline the manual entry process

#### Before

A lot of time is required to search materials, because necessary information is scattered across laws and regulations, notices, and manuals

#### After

**Generative AI is utilized** to help employees to swiftly acquire operational knowledge so that they can respond to taxpayers properly and swiftly

### Bureau of Construction

Detection of damaged roads by AI

#### Before

Damaged and deteriorated road surfaces were inspected visually from road patrol vehicles

#### After

Smartphones that detect damaged road surfaces by AI are installed on patrol vehicles. **AI is utilized as tools to assist and support road patrol inspections**

### Bureau of Waterworks

Support the work of injecting necessary chemicals for water purification by AI

#### Before

The amount of chemicals used at water treatment plants was judged based on a rule of thumb of experienced employees in accordance with raw water quality

#### After

**AI helps less experienced employees to make judgment** by learning historical records of injection of experienced employees and predicting the quantity to be injected

### Bureau of Sewerage

Creation of draft answers to questions about construction by AI

#### Before

Employees had to create answers in 2 or 3 days to a few hundreds of questions made when a work is ordered

#### After

**AI in development creates draft answers** and employees verify them, supporting efficient operations

Realize the increase in “you time” (personal time) and advanced and speedy project execution due to improved operational efficiency

## ② Apps that integrally connect TMG and the citizens (integration of apps)

Partners

National government/other prefectures

Municipalities

Bureaus in TMG

Policy collaboration organizations

Targets

Citizens of Tokyo

Businesses

TMG employees

### Future image to reach for

- The point systems of different Bureaus are consolidated, and social good actions are visualized. The participation in those actions is promoted by **granting points to socially-significant activities**.
- Building on the point app, the apps, **various procedures**, and the reservation function of facilities provided by different Bureaus will be integrated to be an app that makes people's life more convenient and help them feel TMG closer.

### Short-term (fiscal 2025)

- Rollout of point app service** (utilized in around 50 projects of different Bureaus)
- “Connected Campaign” (provisional title)** will be run in autumn when the certification system based on social security and tax number is implemented (Target: Citizens of Tokyo aged 15 years or higher)

### Mid-term (fiscal 2028)

- Consolidate the point projects of different Bureaus and expand their utilization** (Utilized in projects carried out by different Bureaus, policy collaboration organizations, and municipalities)
- Apps provided by several Bureaus are integrated to one point app**

### Long-term (fiscal 2035)

- The point app will be utilized by **all Bureaus and municipalities**
- Various procedures and the reservation function** of facilities are integrated to be a super app (convenient and familiar app used by many citizens of Tokyo)

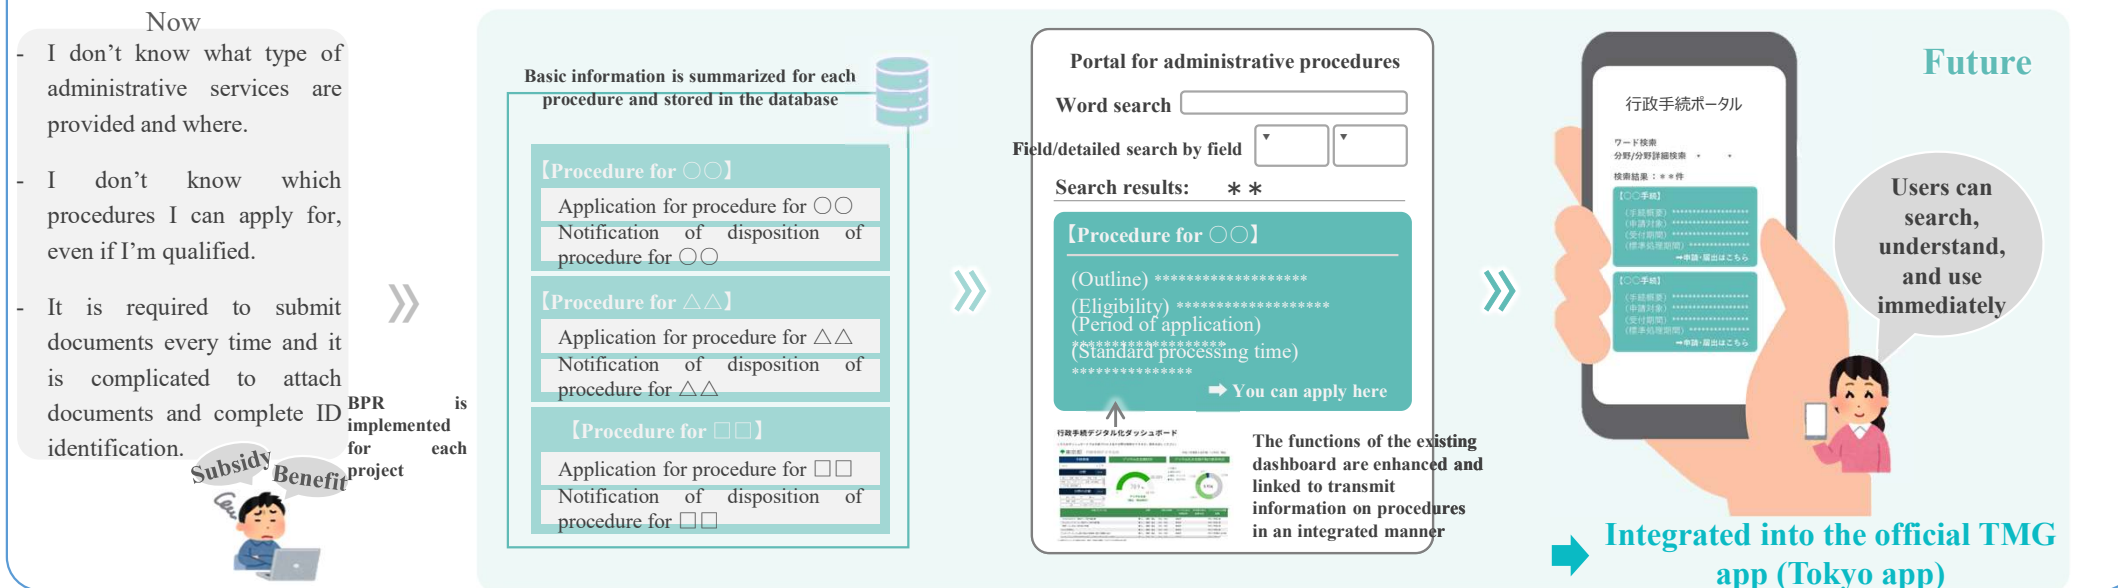

### ③ Centralized management of administrative procedures (integration of procedures)

#### Future image to reach for

- A database for integrated management of basic information on procedures will be developed for the purpose of improving the convenience of administrative procedures, which are the most common touch point for the citizens of Tokyo and businesses with TMG. Then, **a portal for integrated procedures with detailed information required for application will be launched to realize digital procedures which users can “search, understand, and use immediately”** in accordance with their needs and situations.

#### Short-term (fiscal 2025)

- A database that integrally manages basic information on procedures will be built
  - ✓ Basic data on administrative procedures is summarized for each procedure assuming that it is used by the citizens of Tokyo and businesses.
- Rules for how to update the database and maintain information will be established.

#### Mid-term (fiscal 2028)

- The functions of the database will be enhanced to register the procedures
  - ✓ The conditions for application, eligibility, and period of application will be included.
- The registry of procedures will be utilized to accept application from the portal.
  - ✓ A robust ID check function will be implemented.

#### Long-term (fiscal 2035)

- One-stop service will be provided via the official TMG app (Tokyo app).
- The data link function will be implemented to reduce attached documents.

#### ④ Utilization of business database (integration of information on businesses)

Partners

National government/other prefectures

Municipalities

Bureaus in TMG

Policy collaboration organizations

Targets

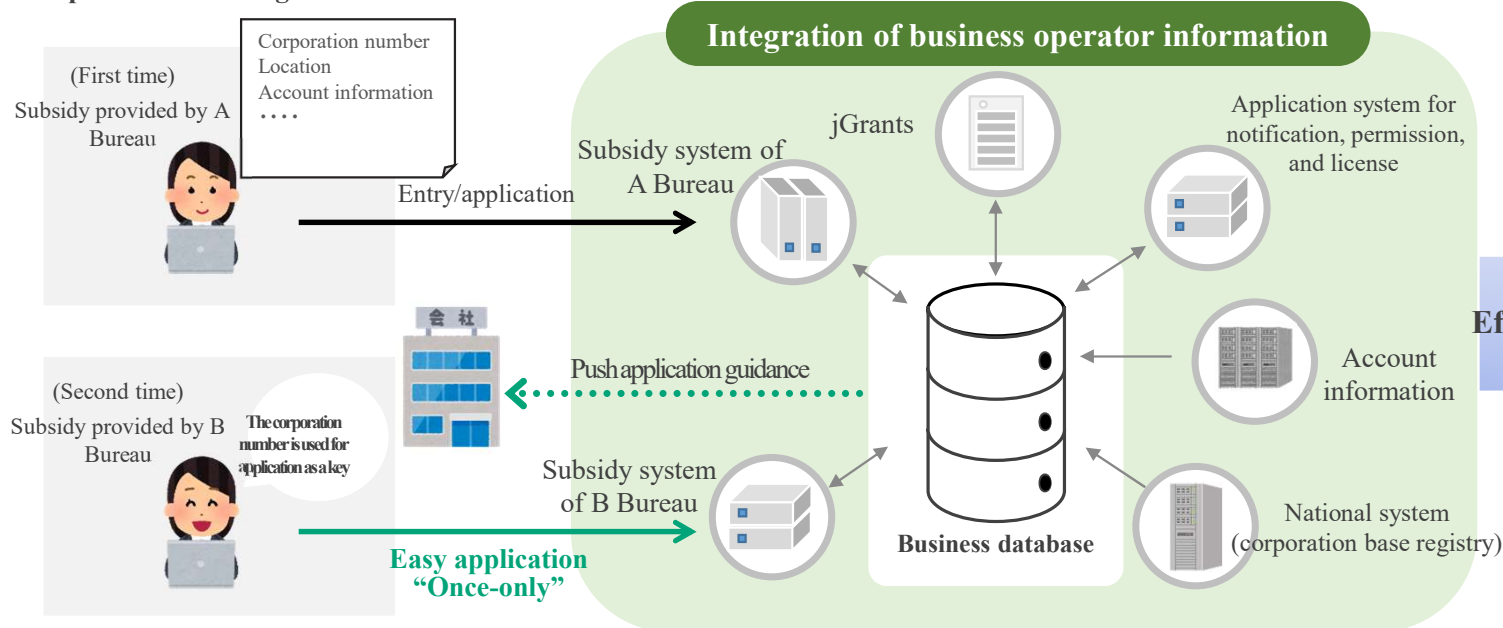

Citizens of Tokyo

Businesses

TMG employees

##### Future image to reach for

- A TMG business operator base registry will be built, which serves as a base of accumulating and linking basic information on business operators, to improve the usability for business operators and operational efficiency in TMG. This speedy procedure project is promoted for the purpose of realizing once-only and one-stop in all procedures throughout TMG.

##### Effect

##### ● Simplified administrative procedures

Once-only is realized for all procedures for application by business operators to reduce their burden

##### ● Efficient operations

Information required for examination, etc. is consolidated to the business operator base registry and the check of application information is streamlined

##### Short-term (fiscal 2025)

- Once-only procedures for subsidy projects, etc. for businesses throughout TMG
  - ✓ Rollout of a business database
  - ✓ Link of information to the national subsidy application system (jGrants)

##### Mid-term (fiscal 2028)

- Once-only will be applied to all procedures for business operators
  - ✓ Expansion of the database to notifications, permissions, and licenses
- Efficient examination duties of procedures throughout TMG

##### Long-term (fiscal 2035)

- Link to the corporation base registry of the national government
  - ✓ Automated link to information managed by the national government such as registry information
- Complete once-only and one-stop procedures linked to the procedures of the national government

## ⑤ TOKYO Dashboard (integration of dashboard)

Partners

National government/other prefectures

Municipalities

Bureaus in TMG

Policy collaboration organizations

Targets

Citizens of Tokyo

Businesses

TMG employees

### Future image to reach for

- The dashboards used in TMG are **systemized and integrated** in accordance with policies. Moreover, data is transmitted to the citizens of Tokyo in an easy-to-understand manner **utilizing latest technologies**.
- In the future, TMG will aim to build and disseminate a **Japanese model of transmitting policies based on the dashboard in collaboration with the national government**, etc.

### TOKYO dashboard (image)

#### ① Important policy themes

<Easy-to-understand analysis>

<Visualized data>

#### ② Visualization based on AI

<Broad listening>

<Text mining>

### What is dashboard?

- A tool to consolidate various data to one screen and display it in an easily visible manner
- In TMG, each Bureau used to visualize and publicize the current situations of Tokyo and the progress of policies

### Future developments

- “TOKYO Dashboard” that integrates different dashboards used in TMG will be publicized.

#### Integration

The dashboards used in TMG will be consolidated to transmit information on a one-stop basis. A system to automatically reflect latest data on the dashboard will be built.

#### Transmission of important policy themes

The progress of important policy themes will be transmitted by field based on the efforts for Policy DX and the dashboards used in TMG

#### Visualization utilizing AI

The opinions and interests of the citizens of Tokyo will be visualized based on questionnaire surveys utilizing broad listening and text mining.

### Short-term (fiscal 2025)

#### - Launch of TOKYO dashboard

- ✓ The existing dashboards are consolidated so that the citizens of Tokyo can access integrally.
- ✓ Opinions of the citizens of Tokyo are visualized and publicized utilizing broad listening.

### Mid-term (fiscal 2028)

- The transmission of policies will be reinforced by **enhancing the utilization of data in the private sector**
- **Data will be reflected automatically** through a dashboard infrastructure that collects and accumulates various types of data.

### Long-term (fiscal 2035)

- A Japanese model of transmitting policies based on the dashboard will be established and disseminated in collaboration with the national government, etc.

## ⑥ Strengthened security throughout Tokyo (integration of security measures)

Partners

National government/other prefectures

Municipalities

Bureaus in TMG

Policy collaboration organizations

Targets

Citizens of Tokyo

Businesses

TMG employees

### Future image to reach for

- A joint cyber security center will be established to protect sensitive information of the citizens of Tokyo and the important infrastructure that supports their livelihoods from more advanced and sophisticated cyberattacks. TMG aims to take cyber security measures throughout Tokyo.

### Advanced initiative

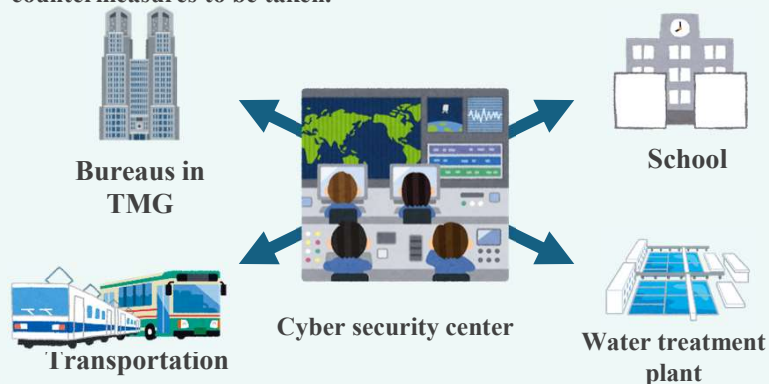

#### In the state of New York

- The state government plays a leading role in operating a joint cyber security center together with several local governments.
- The effect of measures is maximized by integrating necessary human resources and technologies.

### Integrated security measures

- Integrated response to cyberattacks by introducing the most advanced tools
- A dedicated team of GovTech Tokyo provides support to countermeasures to be taken.

- The measures will be expanded to policy collaboration organizations and local incorporated administrative agencies on the front line of services provided to the citizens of Tokyo
- Consideration of collaboration with municipalities

### Effect

- Promote “centralization” of human resources and technologies required for security measures and reinforce the defensive capacity against cyberattacks throughout Tokyo.
- A base (hub) of nurturing scarce human resources specialized in security

### Short-term (fiscal 2025)

- Establishment of a cyber security center
- Introduction of advanced security tools

### Mid-term (fiscal 2028)

- The cyber security center will be expanded to policy collaboration organizations and local incorporated administrative agencies.

### Long-term (fiscal 2035)

- The joint cyber security center will play a core role in realizing advanced security measures throughout Tokyo.

**Point**

**How to promote Policy DX in the future**

## How to promote Policy DX in the future

We promote BPX, implement the Three Basic Digital Principles , **improvements in QOS (quality of service) that truly benefit residents about** and increase “you time” (personal time) for the citizens of Tokyo , businesses, and employees. In addition, in order to **contribute to the nation** as the capital, Tokyo, we promote agency-wide efforts based on the following three points.

### 1 Design services from the customer's perspective

- **Brushing up services from the customer's perspective** by gathering the concerned parties and listening to the opinions of the parties related to services
- Assess the effects of the business before and after, such as service satisfaction and time-saving effects and lead to further efforts

### 2 Pursue the ideal from a long-term perspective

- Even if it is difficult to achieve in the short term, we think about things in the long term, such as 3 or 10 years from now and **create a big vision.**
- In cooperation with the national government, we review systems and mechanisms that act as barriers and promote social change and transformation with bold ideas.

### 3 Co-create across organizations

- **Promote Policy DX in all areas** to further enhance the QOL of the citizens of Tokyo
- **Open up knowledge on the status and results of TMG's efforts** and **involve the national government, municipalities and the privates.**
- In addition to the Tokyo model, we **promote the use in other prefectures and nationwide.**

## Chapter 3 Core project

- Core project is the core project for promoting agency-wide reform.
- This section presents the **concept and outline of each effort and the development of each effort over the next three years.**
- There are **things we need to work on continuously** to establish **new and strengthened efforts** as the organizational culture of TMG's.
- Structural reform efforts should not be promoted only by specific departments. In order to improve QOS of TMG's and enhance QOL of the citizens of Tokyo, the **significance and goals** of the project are shared by all concerned parties and we work **together to put the spirit of SHIN-TOSEI X into practice.**

Project-1 User Participation and Collaboration Projects  
Project-2 Smartwork Project

## Project-1

# User Participation and Collaboration Projects

- DX of TMG is moving beyond mere digitalization to the improvement of the quality of services.  
In order to provide better services, it is important to constantly review services through dialogue with users, such as the implementation of user reviews.
- As the social situation changes rapidly, towards the creation of new services and further innovation, it is necessary to further strengthen efforts involving various entities including the citizens of Tokyo and businesses such as open data initiatives and co-creation among government officials, government academias and the public and private.

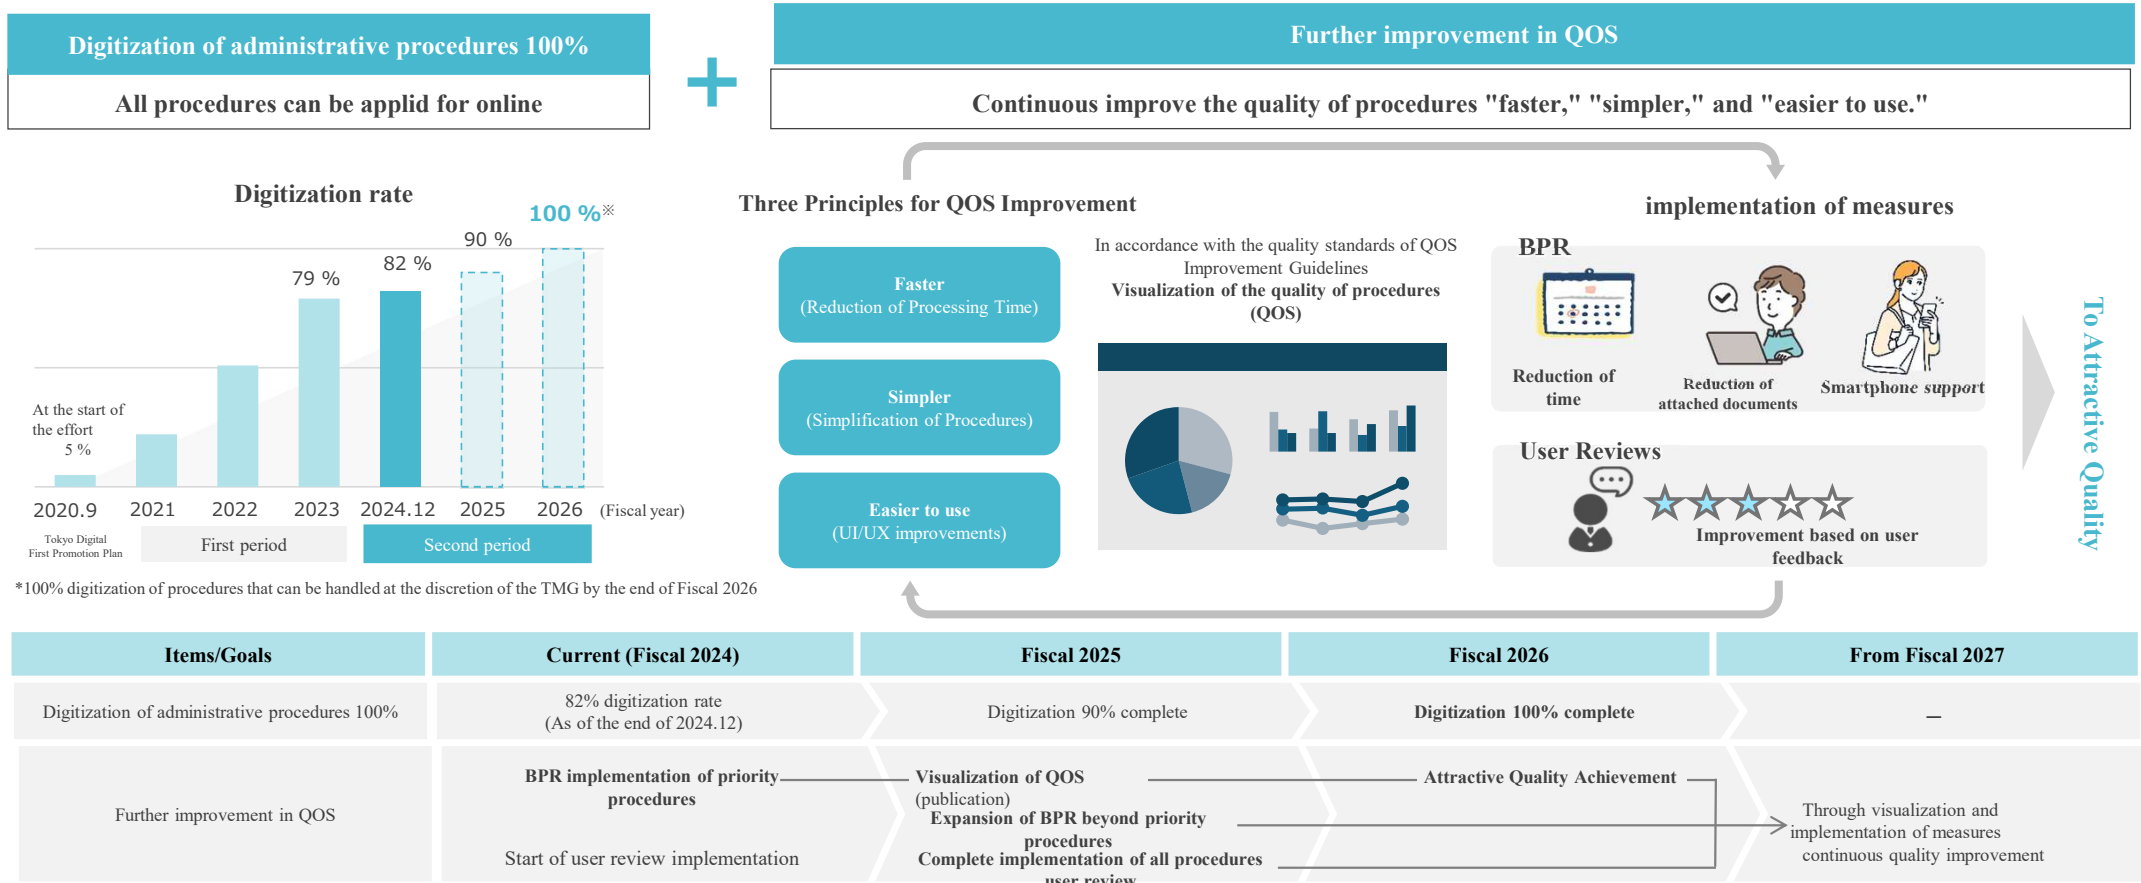

- 1 Digitization of administrative procedures that make people feel "convenient"
- 2 Thorough implementation of "Service Design" to create attractive services through dialogue with users
- 3 Continuous improvement based on user reviews
- 4 Development of multilingual support and "Public relations that can be conveyed" according to user needs
- 5 Disseminate SHIN TOSEI's achievements and good cases in an easy-to-understand and effective manner
- 6 Create social change from a major support base for startups
- 7 Promote Open innovation through the participation of the citizens of Tokyo
- 8 Promote data utilization and use of public and private with Tokyo Data Platform (TDPF)
- 9 Promote a virtuous cycle of open data by All Tokyo
- 10 Collaboration with GovTechTokyo

# 1 Digitization of administrative procedures that make people feel "convenient"

## 100% digitization of administrative procedures and continuous improvement of the quality of procedures (QOS)

- All Bureaus work together and promote efforts to achieve **100% digitization of administrative procedures by the end of Fiscal 2026**.
- We **improve QOS** through **thorough BPR and visualization of the quality of procedures** with a focus on priority procedures that account for 90% of the total number of annual applications.

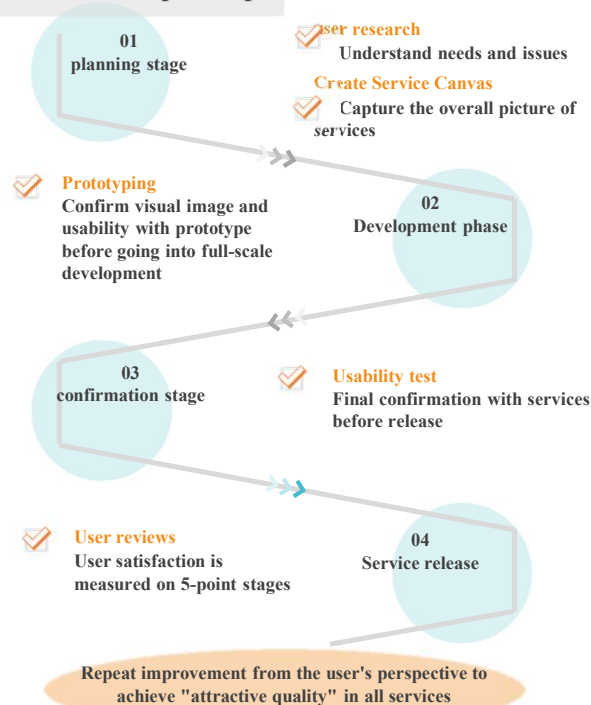

## 2 Thorough implementation of "Service Design" to create attractive services through dialogue with users

We further accelerate the development and improvement of services from the viewpoint of users in order to deliver attractive services

- We further accelerate efforts to reflect the needs of users in our services, such as Tokyo Metropolitan Service Canvas, which captures the overall picture of our services and user tests conducted at each process.

### Service development process

### Foster awareness of service design

- ✓ Create service canvases and hold workshops where users can experience user testing
- ✓ Delivery of **e-learning content** to learn service design guidelines through cartoons
- ✓ **Create case studies** to share best practices so that users can imagine how to use service design

### Upgrading of user test implementation procedures

The three user test implementation procedures were integrated into one, and the key points of each test were explained based on specific user test cases, this version was updated to make it easier for development staff members to use

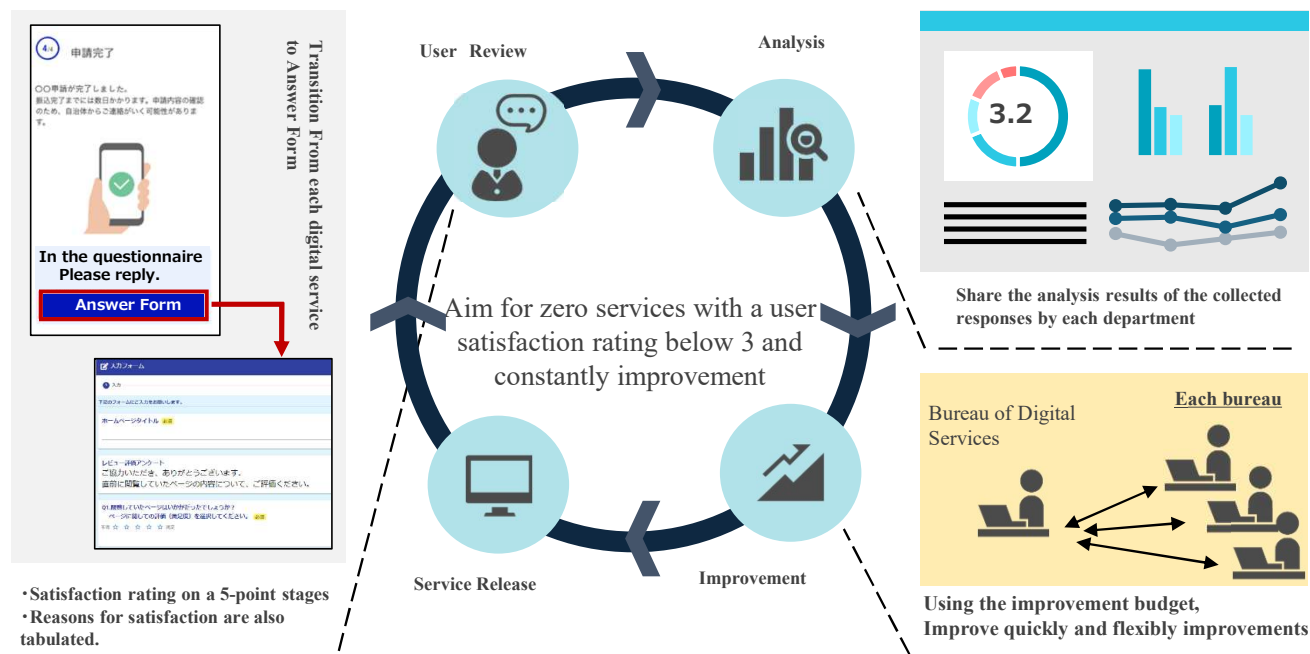

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	From Fiscal 2027
user satisfaction	For all services such as administrative procedures (online) and HP Implement user reviews sequentially			Zero services with a user satisfaction rating below 3

### 3 Continuous improvement based on user reviews

#### Improve TMG's digital services to "Attractive Quality" by improving them from the user's perspective

- Implement user reviews across all digital services to **visualize satisfaction** and continue improving.
- Utilize the improvement budget secured in advance by Bureau of Digital services, we implement swift and flexible service improvements based on the opinions of users.
- **In addition to improving UI of the review form, we develop a new system that automatically analyzes collected feedback to accelerate the improvement cycle.**

#### Examples of improvement requests from user reviews

- ▶ We would like you to show the waiting time and number of people and take measures to avoid waiting such as online reservation.
- ▶ Eliminate unnecessary page transitions and make it easy to access information.

#### ● Agencies deployment schedules

	Current (Fiscal 2024)	From Fiscal 2025
Administrativ procedures (Online)	▶ Implement procedures of many number of applications first	▶ Complete implementing in all procedures by the end of Fiscal 2025
Points of contact	▶ Completed implementing at all points of contact. Share answers and continually improve in each department	
contracts and expenditures	▶ Implement review function for system release (Scope of implementation is expanded gradually)	
HP	▶ Completed implementing to each Bureau's main HP	▶ Gradually expanded to individual HP operated by each Bureau

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	From Fiscal 2027
New system development	Consider new system plan	Design and development	Implement in all services	Continuous operation and system improvement

## 4 Development of multilingual support and "public relations that can be conveyed" according to user needs

### Completion of English language support for high-priority administrative procedures in Fiscal 2025. Strengthen multilingual support throughout Tokyo

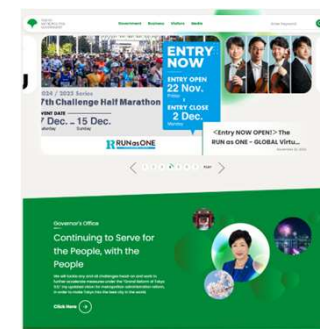

- We promote **multilingual support** so that foreigners do not feel a "language barrier" in business and life in Tokyo.

#### Multilingual support of administrative procedures

- Promote **multilingual support for high-priority administrative procedures**, such as those with many foreign users  
**Complete all necessary English language support in Fiscal 2025** (84 businesses, 56 million projects), utilizing AI and other latest technologies.
- We have newly started **Accompanied support** such as **consultation and accompanying for life-related procedures by support advisors in English**.
- **Strengthen multilingual support** throughout Tokyo by **grasping and analyzing the needs and feedback of foreigners** at administrative counters and feeding them back to all 62 wards/cities/towns/villages in Tokyo.

Multilingual translation display

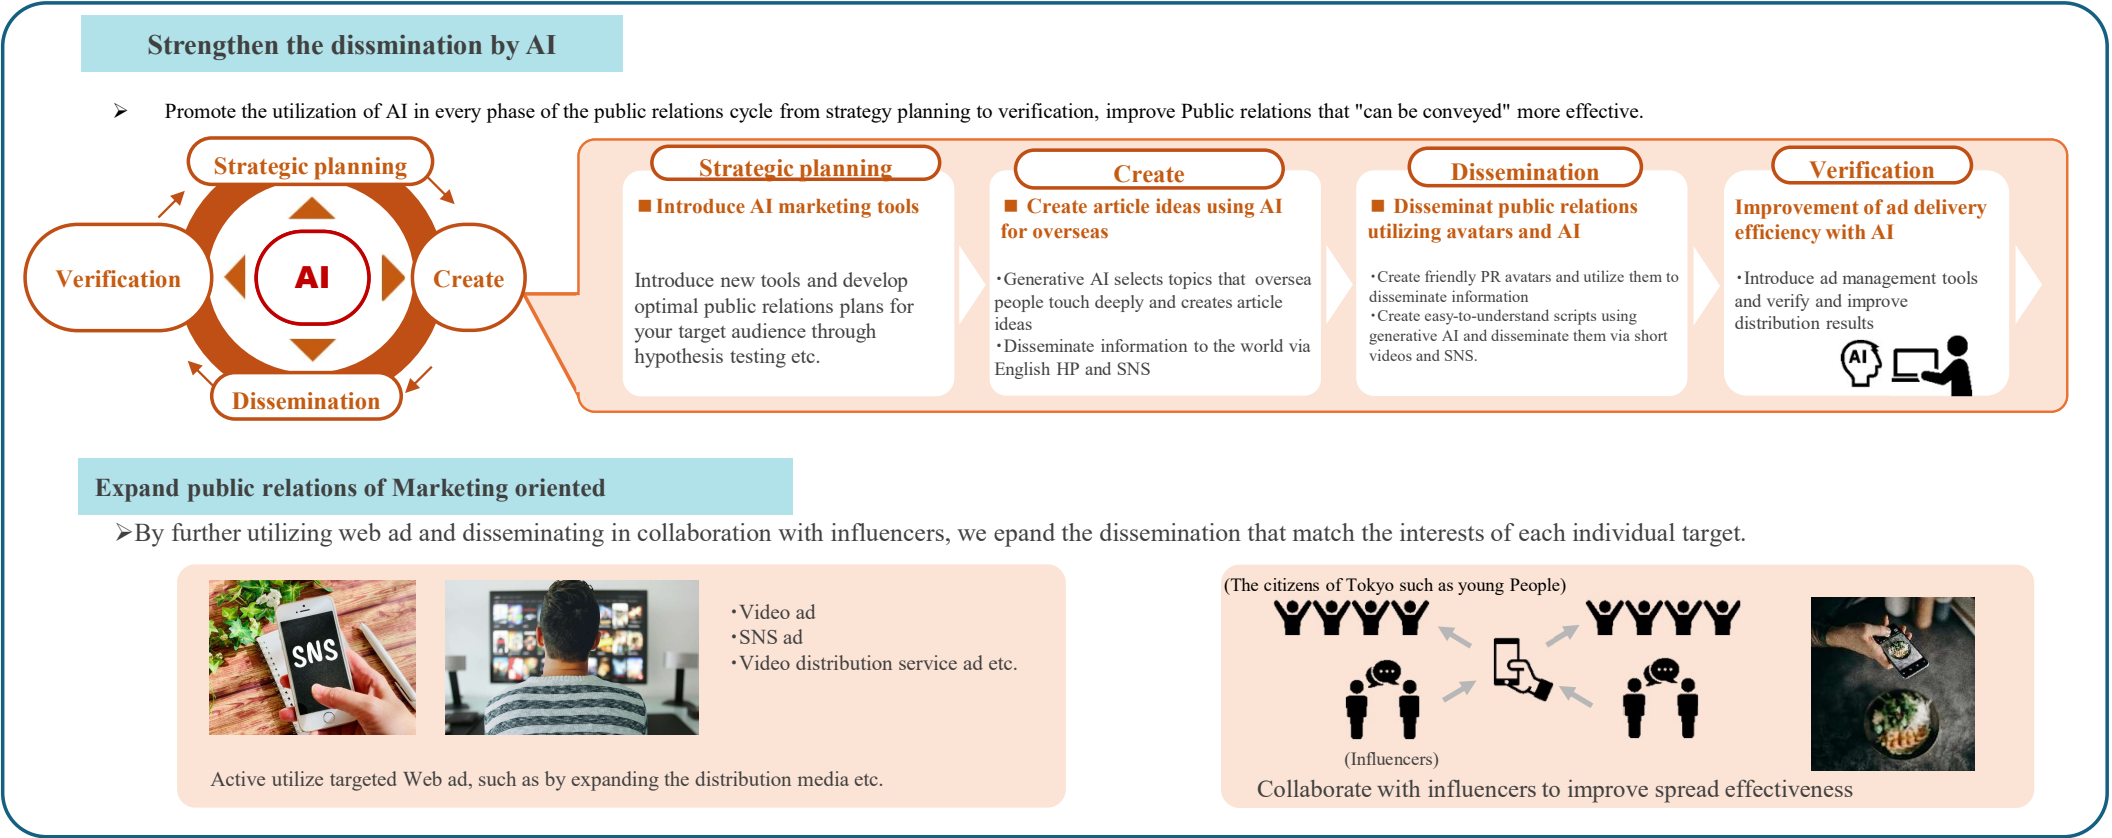

TMG's comprehensive English site

#### Multilingual dissemination of TMG information

- Each Bureau English site is **integrated into TMG's comprehensive site** to improve its ability to disseminate information overseas and to promote the dissemination of information through English-language media such as the online magazine "Tokyo UPDATES" and the SNS "Tokyo Gov" for foreigners.
- In addition to **translating Tokyo ordinances and plans into English**, we **disseminate** a list of TMG's **multilingual support programs** in easy-to-understand **English**.

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	Fiscal 2027
Multilingual support of administrative procedures	Survey on the status and priority of English support	Accompanied support and feedback from the field Complete English support of high-priority procedures	Further improvement of multilingual support, including for local governments in Tokyo	
Multilingual dissemination of TMG information	Construction and operation of the new TMG's English site (from October 2024) and information dissemination through English media English translation of new ordinances and updating and dissemination of lists etc. of English-language support programs			

# Enhance the quality and quantity of dissmination and further strengthen strategic public relations by promoting the utilizing of AI and digital technologies

# 5 Disseminate SHIN-TOSEI's achievements and good cases in an easy-to-understand and effective manner

We disseminate information that contributes to the improvement of life of the citizens of Tokyo and we also disseminate the results of our reforms to other local governments and overseas cities.

- Improve Quality of Life of the citizens of Tokyo by **providing easy-to-understand videos with information on improving the citizens of Tokyo services.**
- **We further expand the circle of reform inside and outside TMG and update our efforts by deepening cooperation with overseas cities.**

**Conventional** Disseminate information based on text and pictures

進捗状況（2024年7～9月）

都庁全体へサービスデザインを浸透させていくための各種取組の推進

- 職員がサービスデザインの活用方法をイメージできるよう、優れた実践事例を庁内、事例集の企画制作を進めました。具体的には、優れた実践事例の抽出やユーの準備等を行いました。また、サービスデザインプロセス全体の流れを理解イラストを活用したeラーニングコンテンツの企画制作を実施しました。
- サービスデザインガイドラインを活用し、より良いサービスデザインを実施する員向け、第1回ワークショップ（サービスキャンパス作成編）を8月に実施しました。第1回ワークショップの対象者を全庁職員に拡大し、様々な部署や職種の方が参した。

DXでもっと遠くへ。「都庁DXアワード2024」開催！

44

SHIN-TOSEI 都庁の職員のDX推進チーム（東京都 12/10）  
2024年7月25日 16:20

今年もこのイベントがやってまいりました！  
都庁現場で生まれたDXの取組が集結するイベント、「都庁DXアワード」です。2022年から始まった都庁DXアワードも、今回で3回目の開催となります。今年度は23局から31件がエントリーされるなど、開催規模がどんどん大きくなり、注目度も高まっています！

- “Visualize” the progress of structural reforms utilizing SHIN-TOSEI portal site and note etc. by disseminate information on based texts and pictures.

**In future** Disseminate information utilizing video content

- Disseminate information to users in an easy-to-understand manner, such as "how life will become more convenient" and "what will change from the past"
- Promoting the spread and dissemination of the results of structural reform through video and English and exchanging opinions with overseas cities

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	Fiscal 2027
The number of video views	—	Total 5,000 times	Total 10,000 times	Total 20,000 times

## 6 Create social change from a major support base for startups

### Make Tokyo Innovation Base (TIB) a node for innovation around the world

- At TIB, we **start new efforts** such as **the formation of a community of diverse entities** to support the growth of startups in all directions and the mutual dispatch of startups by **building a network to bases around the world**, which leads **to the production of startups that create social change**.
- Take advantage of the characteristics of TIB as the node, we make TIB **a starting point to support all challengers and create innovation through flat discussions among startups, private companies, national and local governments, students and young people etc. all over the world**.
- Through the active participation of employees in TIB events and programs, we will make TIB **a place for the implementation of policy innovation** through public-private collaboration.

Continue to expand gradually cooperation with startup bases around the world such as ASEAN and Europe

We hold events in cooperation with overseas and create social change from new encounters unique to TIB

On TIB Global Day 2024, Speakers from 20 countries and cities around the world took to the stage

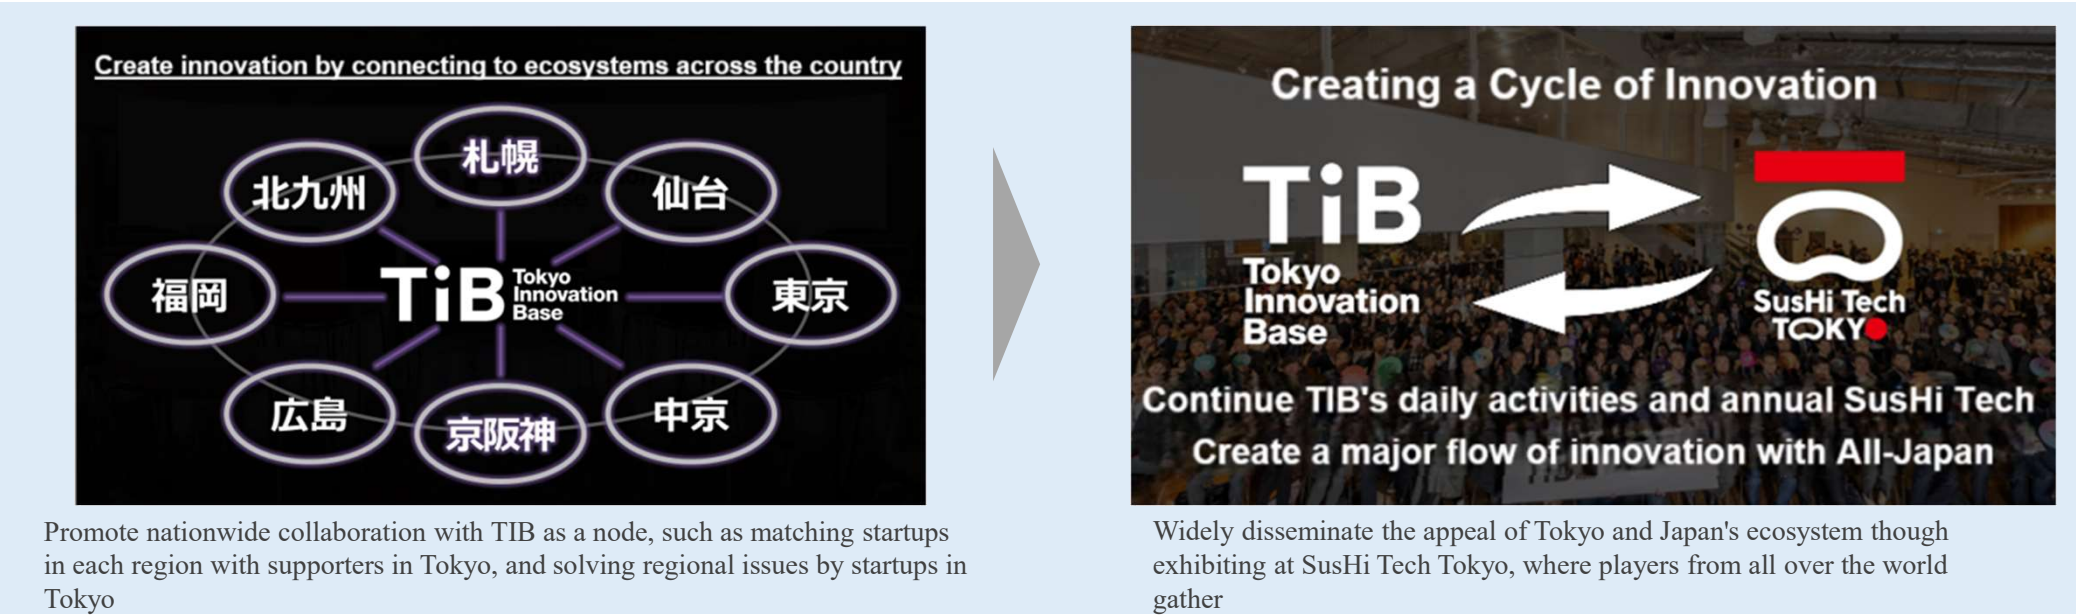

70 companies including overseas startups gathered at Japan-Taiwan Innovation Summit

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	Fiscal 2027
The number of collaborations with overseas institutions	204 (as of the end of November)	270	330	400

TIB promotes pan-Japan innovation by connecting ecosystems across Japan.

- By **connecting startups and supporters across Japan**, without regional boundaries, **we create innovation and lead to social change**.
- We further **accelerate public-private collaboration** to boldly incorporate startup products and services as first customers.
- We also utilize the system to **share cases of cooperation with local governments across Japan** to expand public-private collaboration efforts.
- We **disseminate our innovation efforts and results all over Japan to world through SusHi Tech Tokyo** etc.

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	Fiscal 2027
The number of cooperations with local governments nationwide	45 (as of the end of December)	80	115	150
The number of public-private collaborations	186 (as of the end of December)	300	400	500

# 7 Promote Open innovation through the participation of the citizens of Tokyo

## Promote Open Data Use and Utilization through the efforts of public-private collaborations at Tokyo Governor's Cup Open Data Hackathon

- We further promote public-private collaborations efforts aimed at creating new services by soliciting free proposals from participants to address issues presented by each bureau and local governments and bringing together local government employees and CivicTech, private businesses to pool their knowledge.
- In cooperation with GovTech Tokyo, we strengthen technical support and support the social implementation of the results produced in the hackathon.

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	Fiscal 2027
The number of service proposals (The number of prototypes)	106	120	135	150
Participant satisfaction (out of 10)	8.5 (as of October Final Stage)	Maintain a high level of satisfaction		

Utilize Digital technology to reflect opinions of the citizens of Tokyo in Town development

➤ By utilizing communication tools, digital twins and AI, we create opportunities for the citizens of Tokyo to participate in the town development of Nishi-Shinjuku.

< Use and utilization of Open space by Digital Twin >

By utilizing high-definition digital twins to create cozy spaces in the workshop and implement efforts such as realizing the results of questionnaire votes at events

Reflect opinions of the citizens of Tokyo on how to use open spaces in Nishi-Shinjuku

< The citizens of Tokyo vote on Operation route >

- The citizens of Tokyo solicit opinions of departure and arrival locations about operation routes of autonomous taxis
- People vote on the place they want to use among the candidate sites and this is reflected in the transportation service in the town

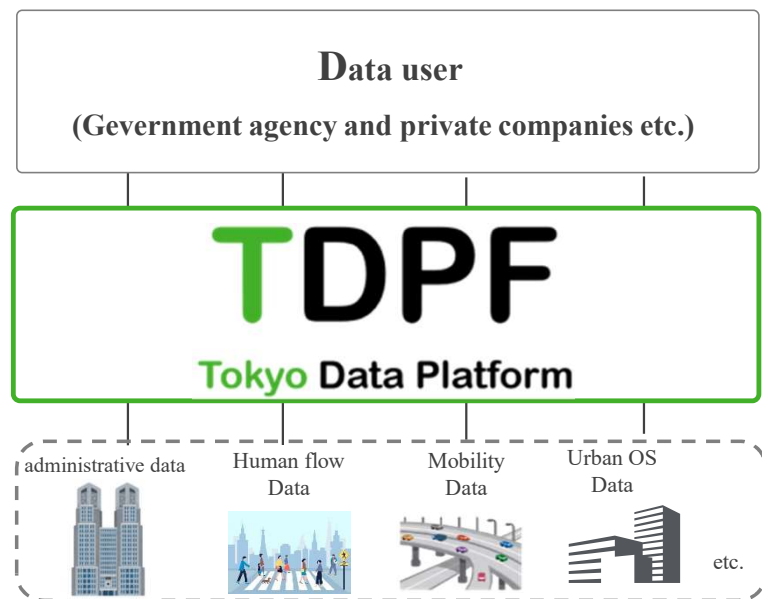

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	Fiscal 2027
Reflect the opinions of the citizens of Tokyo in how to use open spaces	For use of space during events, utilize two-way communication to participate in town development	Utilize two-way communication to reflect the opinions of the citizens of Tokyo in the operation routes of transportation services and the ways of use of open spaces	Reflect the opinions of the citizens of Tokyo Enhance the efforts	<div></div>
Reflect the opinions of the citizens of Tokyo in the transportation service in the town				

## 8 Promote the utilization of data of public and private with Tokyo Data Platform (TDPF)

**"TDPF" connects various data of private companies, national and local governments and supports the creation of new services**

- TMG creates a virtuous cycle of data use and utilization that contributes to the improvement of QOL of the citizens of Tokyo by providing a safe and secure place where private and public data are distributed and by forming a community where data users and providers can connect.

As part of TDPF's community activities, implement the accompanied support such as advice and matching etc. and visualization of data with high needs

### Measures for Further Promotion

1

**Creating cases of data use and utilization through the formation of communities**  
By forming a public and private community centered on five fields, including disaster prevention, tourism, energy and transportation and the addition of wellness, we create advanced data use and utilization cases and expand to the entire Tokyo area.

2

**Collaborate with private companies and national governments to expand public and private data in various fields**  
Public and private sector data in various fields developed by private companies and national and local governments such as wide-area data on human flows and community-based data, are installed in sequence.

**Announce advanced efforts of Data utilization at community activities**

**Promote safe, secure and active data distribution under the leadership of TMG**

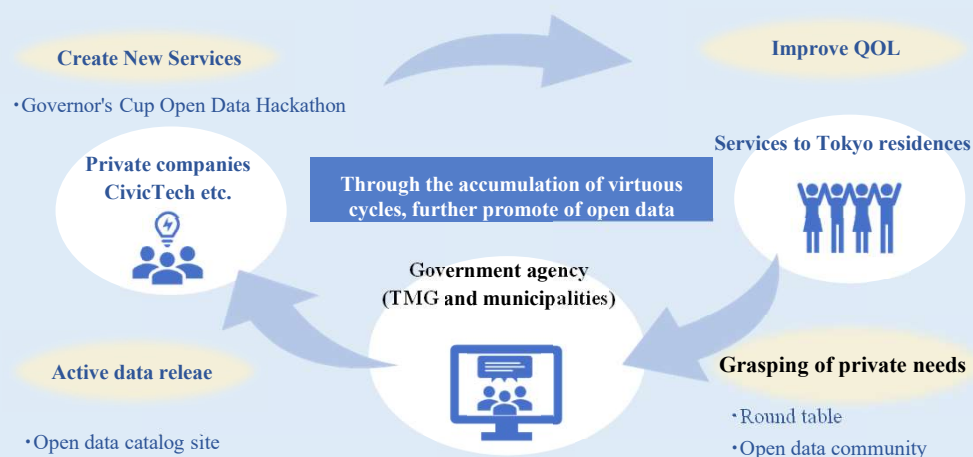

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	Fiscal 2027
The number of data utilization cases created	15 (as of the end of February)	20	25	30

## 9 Promote a virtuous cycle of open data by All Tokyo

### Promote the creation of new services and improve QOL of the citizens of Tokyo by releasing open data with high needs

- We continue to grasp the needs of open data users and promote the release of data needed for the enhancement of services in cooperation with TMG and municipalities.
- We promote the use and utilization of open data by strengthening the dissemination of cases of open data visualization and utilization.

#### Promote a virtuous cycle of data release and use and utilization

#### Measures for further promotion

- Further expansion of highly needed data**  
Based on roundtables with private companies and universities and the requests received in the open data community and the opinion exchange meeting with finalists of Governor's Cup Open Data Hackathon, we expand the data with high needs.
- Improvement of open data provision environment**  
Improve the open data catalog site based on user opinions and we promote the development of data that is easy to use and utilization such as standardization of formats.
- Strengthen dissemination of cases utilizing open data**  
By proactively disseminating cases of visualization and use and utilization by CivicTech etc., promote the use and utilization of open data

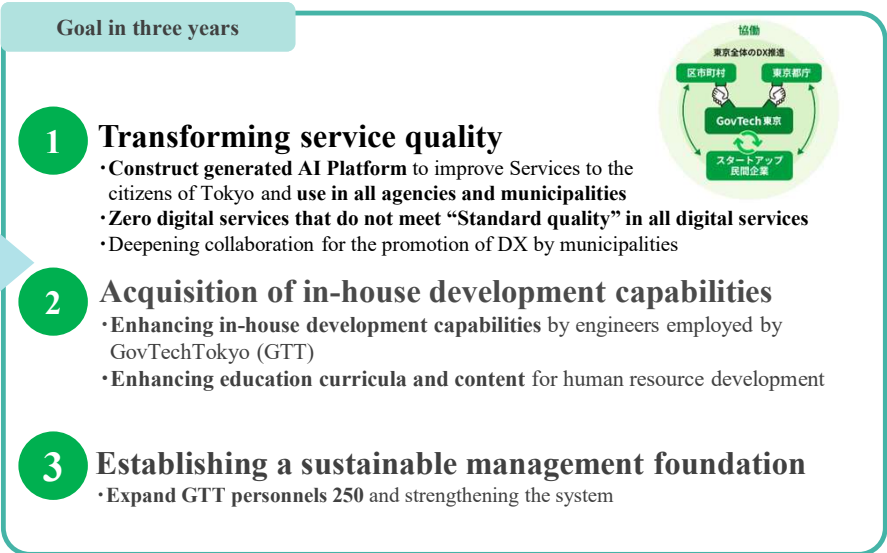

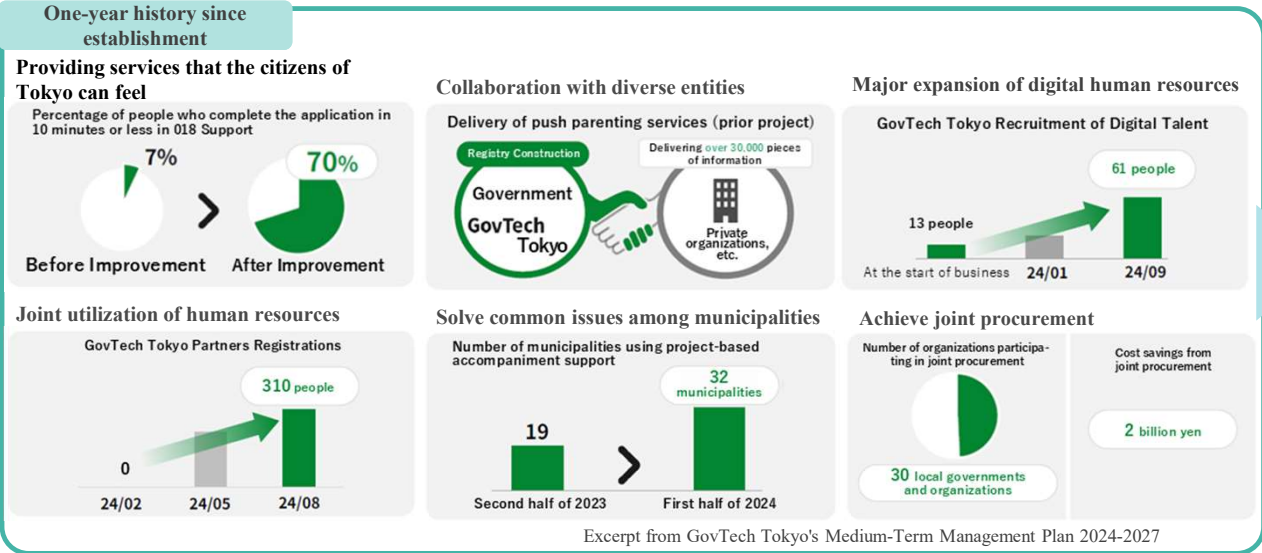

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	Fiscal 2027
Release rate of highly needed in-agencies data*	60% (Working toward the end of fiscal year)	100%	Based on user needs Publish new data	
The number of cases of visualization and utilization	16 (as of the end of February)	20	25	30

\* Data on items "under consideration" in the inventory, data that is needed by communities and roundtables and can be made public and standard open datasets for local governments

# 10 Collaboration with GovTech Tokyo

## TMG and GovTech Tokyo are working together to speed up DX throughout Tokyo.

- While enriching life of the citizens of Tokyo through the power of digital technology, we also vigorously promote various efforts utilizing information technology
- We aim to provide faster, wider and higher quality digital services based on the key words of cooperation between people and things and the feeling of the citizens of Tokyo

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	Fiscal 2027
Qualy transformation of digital servicesit	<div>• Involvement from the business planning stage through technical evaluation and project supervision</div>	<div>• Enhancing quality control</div>		<div>•Zero digital services that do not meet “Standard quality” in all digital services</div>
Promotion of municipal DX	<div>•Started human resource introduction (GTT Partners)</div> <div>•Full-scale implementation of joint procurement and accompanied support</div>	<div>• GTT's services (collaborative projects)</div> <div>Enhance scale and content</div>		<div>•Every municipality in Tokyo uses some kinds of collaborative projects</div>
Expansion of GTT personnels	<div>• Digital personnel 61 (as of September)</div>			<div>• Expand to 250</div>

## Project-2

# Smart Work Project

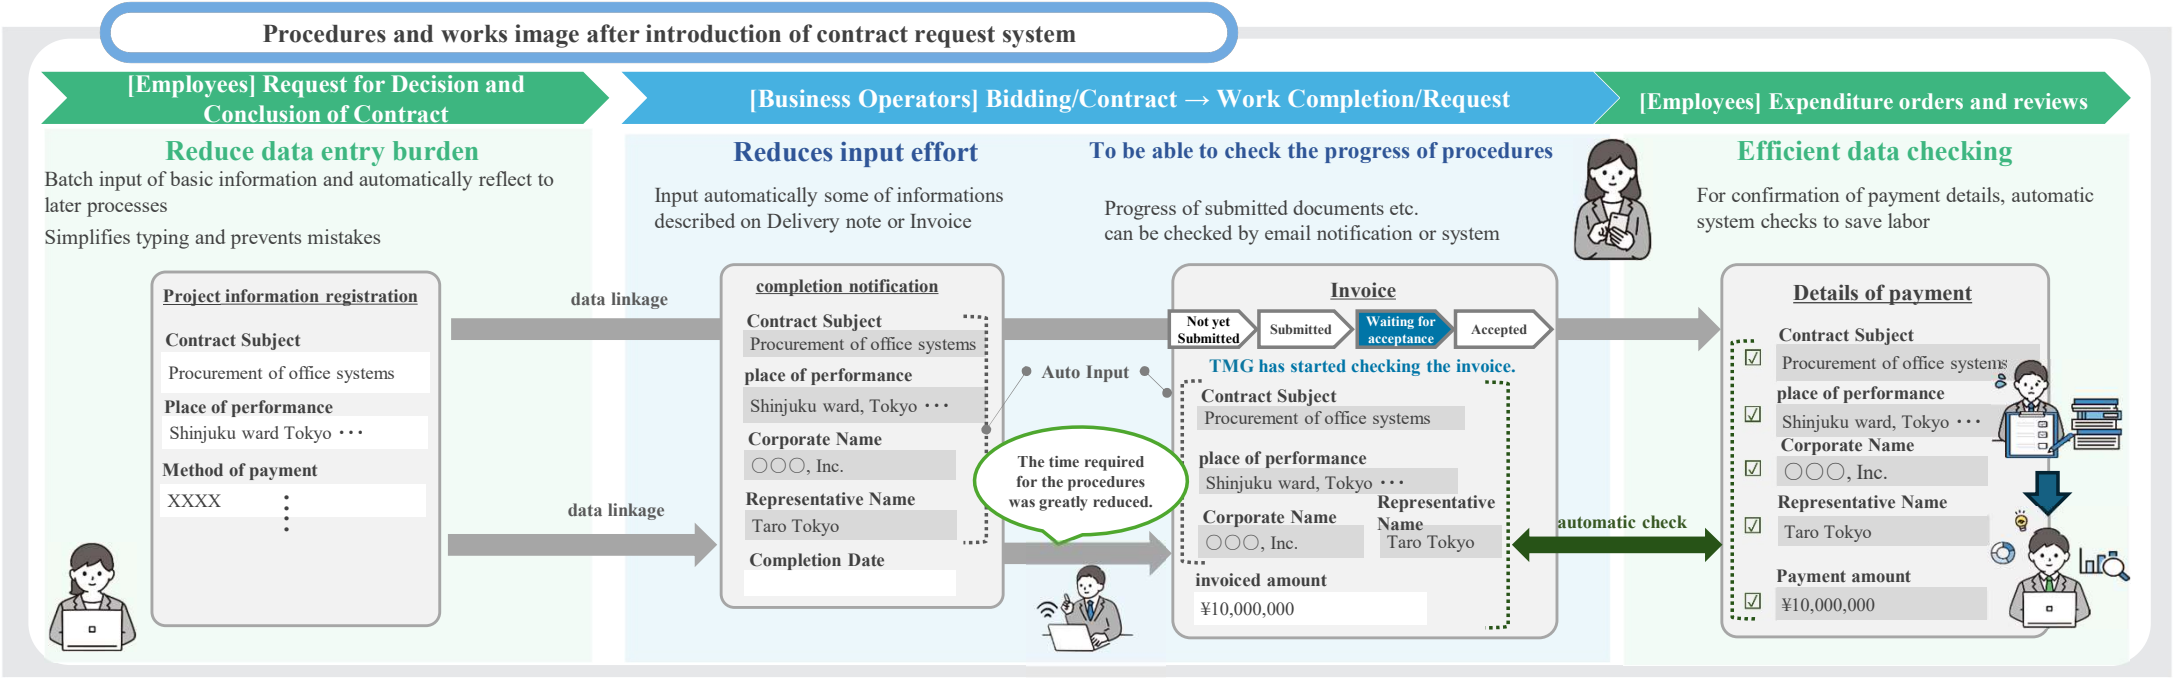

- In order to improve QOS of TMG, while we make use of AI and other digital tools, we improve productivity such as drastically review works and It is important to constantly execute business quickly.
- In addition, in order to provide innovative and effective policies and services, we must have space and time in an open and flat organizational culture. In an environment where employees can practice high-quality ways of working that effectively utilize places and times, employees who are in charge of administrative services can enjoy a sense of fulfillment and growth and need to able to exert the strength.

- 1 Digitize a series of procedures related to contracts and expenditures
- 2 Digitization of public funds collection
- 3 Review of decision making systems in the digital age
- 4 Efficiency of back-office works for employees
- 5 Accelerating and Improving the efficiency of Business execution
- 6 Further enhancing the Digital capabilities of employees
- 7 Open & Flat
- 8 Development of an environment where diverse human resources can flourish

# 1 Digitize a series of procedures related to contracts and expenditures

## Digitization of TMG employees' Internal affairs starts in the Second half of Fiscal 2025

- Digitalization reduces the time required to process internal affairs of TMG employees such as approving contract implementation and reviewing expenditures.
- Reduces the use of paper documents by sending and receiving the necessary documents on the system for contracts and request procedures of business operators and construction contracts.

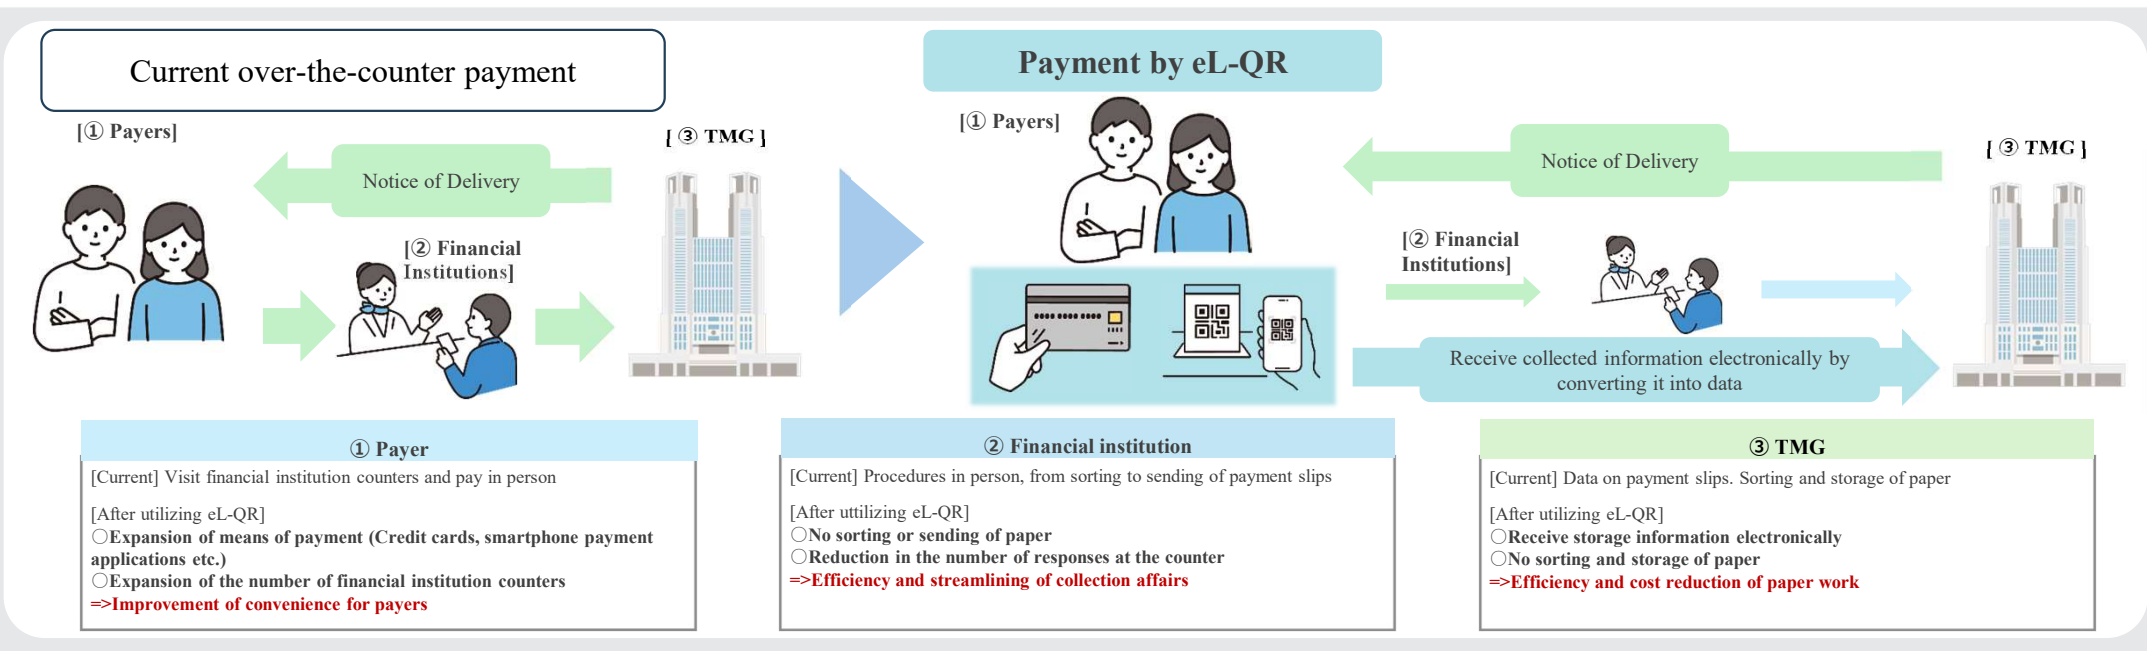

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	From Fiscal 2027
Develop to Governor's Departments etc.	Introduce from goods and consignment contracts of Digital Services Bureau and Local Finance Bureau	• Start use in all Governor's Departments etc. (advance operation) • Expand the scope of contracts to include construction contracts	• Gradually expand target projects (full-scale operation) • Use in all organizations of Governors' Departments etc.	
Develop to Public Corporations Bureaus etc.	Survey and analysis to expand coverage	Begin to define requirements	Design and development	Aim to start using it in Fiscal 2028

## 2 Digitization of public funds collection

### e-LTAX enables electronic payment of various public funds

- Start in September 2026, public funds such as occupancy fees for roads and parks will be allowed to be collected through eLTAX \*.  
\*eLTAX is currently a system that uses the Internet to electronically handle local tax payments and other procedures.  
A law revising Local Government Act allows the use of public fund other than taxes
- By utilizing eL-QR (Local Tax Uniform QR Code) for public funds collection, payers can pay public funds anytime and anywhere.

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	From Fiscal 2027
Utilizing eLTAX	Preparation of requirements for system improvement	system improvement	Test	Gradually start operation, promote cashless collection utilizing eLTAX

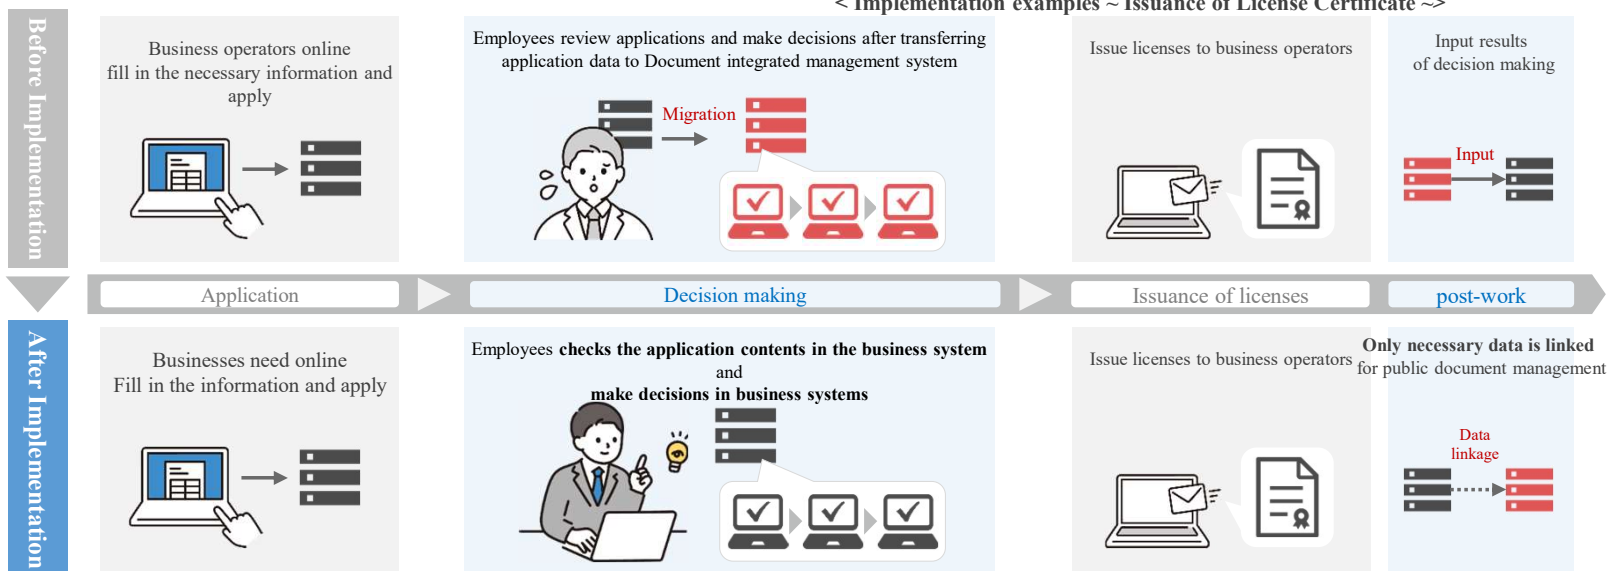

### 3 Review of decision making systems in the digital age

#### We promote efficiency and labor saving by enabling decision making based on business systems

By the first quarter of fiscal 2026, in addition to conventional decision making, we start operating a decision-making system suitable for the digital age (decision-making by business systems) in multiple business systems.

#### < Implementation examples ~ Issuance of License Certificate ~>

#### In addition, we review document-related affairs.

Review Document-related affairs (a series of flow from acceptance to enforcement and public), develop systems and workflows suited to the digital age as well as build a system to realize them.

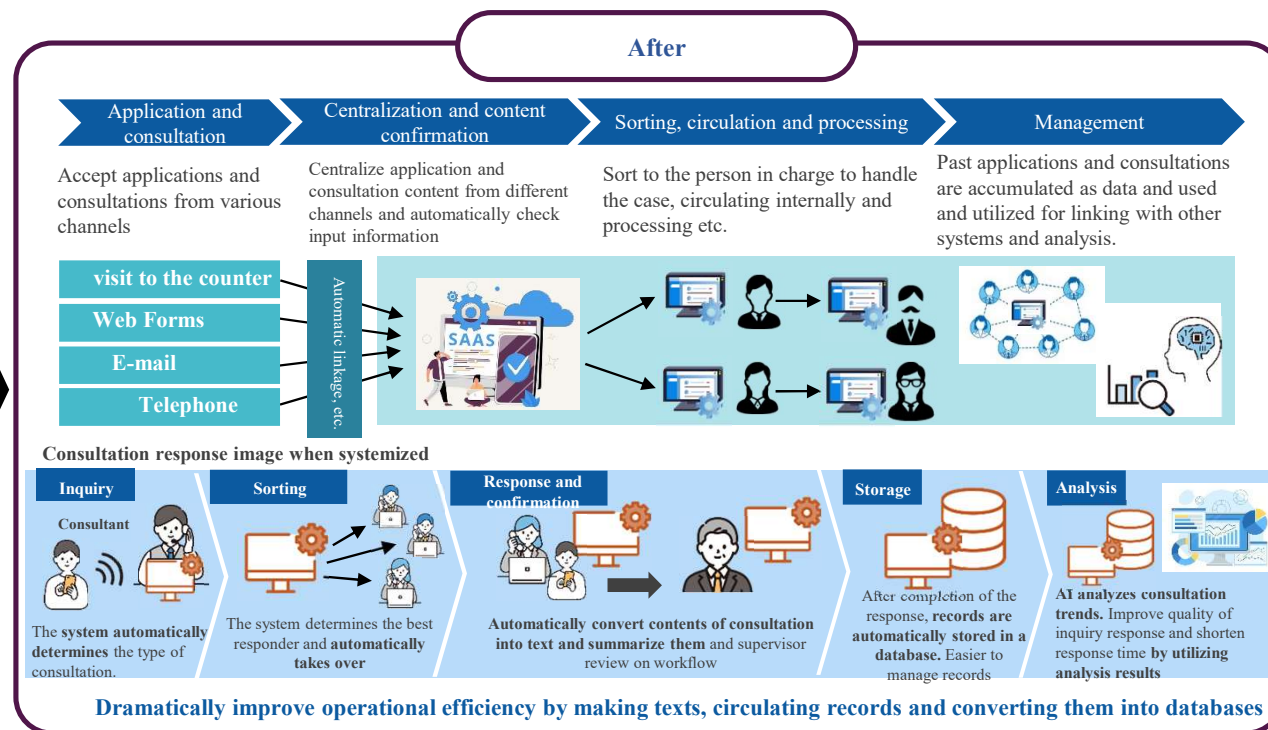

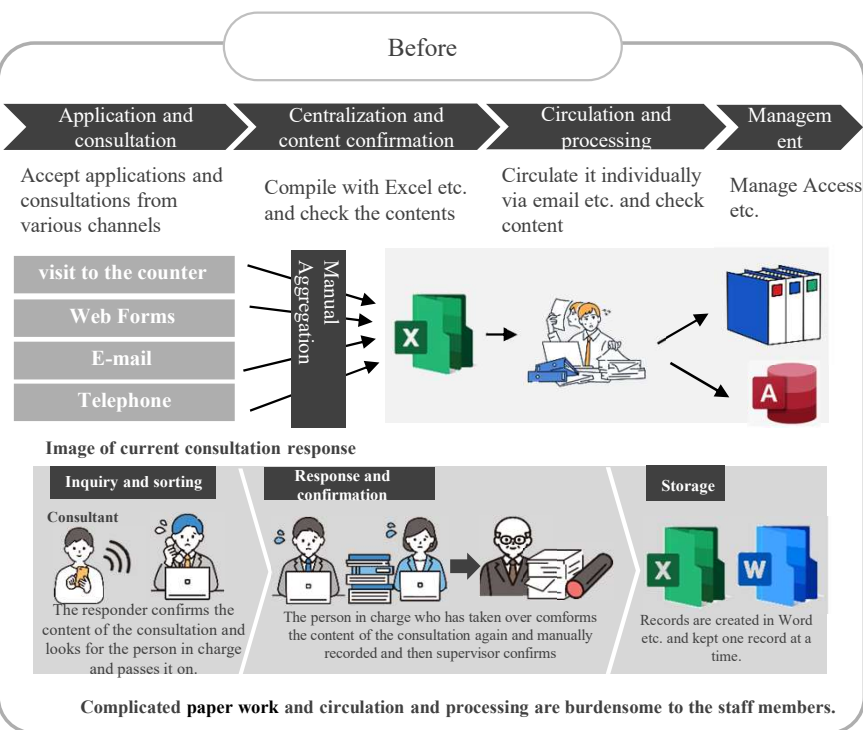

**Building of new Document integrated management system** equipped with functions suited to the digital age

## 4 Efficiency of back-office works for employees

### Improve overall services at the counter by improving back office operations for employees

- Reduce the burden on employees by streamlining back-office operations such as data input and circulation after application and consultation and further improve our service at the counter by providing more detailed service to the citizens of Tokyo and businesses.

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	Fiscal 2027
Improve works at the counter back office	Considering and planning of workimprovement at the counter back office	Development of work improvement plans (3 models)	Practice work improvement of counter back offices at each bureau	

# 5 Accelerating and Improving the efficiency of Business execution

## Further strengthen execution capabilities by speeding up operations and improving efficiency

- We continue our efforts to **return the effects of our projects to Tokyo residences at an early stage** by utilizing the "Speed up menu," which has become established as a method for speeding up project execution.
- In addition, we promote active utilization of digital technology, reduction and simplification and digitization of various documents, cooperation with the private and review of existing systems and operations to improve the efficiency of works of both contractor-contractee and to **reconduct work styles reform and productivity improvement**.

### Speed up menu

I Budgetary measures	II Contracting procedures	III Business execution
1_Expand use of Zero Metropolitan Bonds	4_Financial bureau contracts with flexible operation of bring-in deadlines, etc.	7_Advancement of procedures, etc. for subsidized projects
2_Establishing debt service obligations for software projects, etc.	5_Expanded authority to place orders with bureaus for outsourcing, etc.	8_Review of System Assessment
	6_Extend coverage of scheduled price adjustment methods	9_Review of construction methods, etc.
3_Set a carryover limit for sponsored projects	10_Introduction of ECI method	12_Strengthen agency support and collaboration in building and facilities construction
	11_implication of estimation	13_Review of Personnel Changes

### Proactive utilization of digital technology

Utilize **digital technologies** such as remote reality, drones and AI and work to improve the level of **sophistication and efficiency** of infrastructure businesses

#### Examples of Efforts

\*Scenes from the "Aoyama Park improvement project"

construction site

workplace

Efficient confirmation of construction status by **remote presence** using wearable cameras etc.

### Reduction and simplification and digitization of various documents

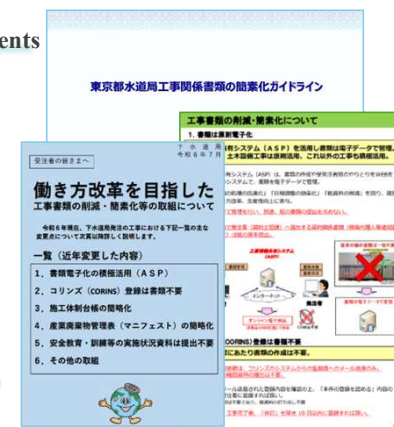

#### Examples of Efforts

In civil engineering work, part of supporting data at the time of inspection is omitted.

Reduction and simplification of construction documents such as partial abolition of the unified format

Use construction information sharing system and digitize construction documents

In the future, by expanding TMG Contract Request System to include construction contracts, construction contract related documents equivalent to several hundred pages \* can be sent and received in electronic files etc. \*Figures vary according to type and content of construction.

We continue our efforts to **reduce the burden on both contractor-contractee**

### Efforts from the perspective of collaboration with privates and review of existing systems and operations

We **strengthen our execution capabilities** by utilizing various methods such as **simplifying estimates** by utilizing new estimation methods such as the outline ordering method and **expanding the outsourcing of works**.

## 6 Further enhancing the Digital capabilities of employees

### We further strengthen human resource development to realize high-quality digital services

Under a training system that matches the level of digital skills of employees, there is a need to **improve the skills of employees who can use the latest technologies such as AI and digital tools in their work and contribute to the work transformation of the workplace!**

**Further enhance the Tokyo Digital Academy's efforts based on Tokyo Basic Policy for Securing and Developing Digital Human Resources version 2.0**

- **Bureau of Digital Services and GovTech Tokyo strengthen efforts as an organization to train digital human resources** to lead DX in all Tokyo
- Expand Digital Skill Map (DSM), which visualizes the digital capabilities of employees and **add indicators on digital tools**

#### ICT professionals

With regard to the **specialized training for ICT professionals** who are driving All Tokyo's DX, in order to make the content more in line with the actual work of the TMG, the curriculum, etc. will be gradually **shifted to an in-house type**, utilizing GovTech Tokyo's high level of expertise.

#### Reskilling human resources

For **DX ambassadors** and other employees who are in charge of promoting DX in the workplace, for **practical training** on how to use digital tools, we have **expanded the number and scale of courses in AI etc.**, in addition to **BPR and data analysis**.

#### All employees

**TDA portal site**, which has a community function to disseminate digital learning and allow employees of TMG and municipalities etc. to interact with each other, **was newly expanded to include employees of policy cooperation organizations etc. and content was expanded.**

Scenes from Special training for ICT professionals

<https://digi-acad.metro.tokyo.lg.jp/>

TDA portal site

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	Fiscal 2027
Further improvement of employees of the digital skills	DSM Extensions (Add Digital tool index)	DSM Extensions (Expand target tools)	Development of nurturing measures based on the revised basic policy	
	BPR promotion/data analysis Conduct training etc.	AI courses etc. scale up	Expansion of training to enhance practical skills	
	Start Registration of employees of policy cooperation organizations	Expand coverage to Business cooperation organizations etc.	Operation and content enhancement of Tokyo Digital Academy (TDA) portal site	

## 7 Open & Flat

### Promote communication within TMG, create "Open & Flat" organization and realize an innovative TMG

**In order to provide better services to the citizens of Tokyo, we create "Open & Flat" TMG office in which ideas that transcend positions and affiliations are exchanged and each and every employee can demonstrate his or her abilities in a lively manner.**

**Open = diversity**  
Everything is open, and everyone has the opportunity  
and can participate

**Flat = psychological safety**  
Can express opinions with ease and communicate smoothly

Expected effects of realizing the  
"Open & Flat" concept

- Communication in the workplace becomes more active and the workplace becomes a comfortable place to work **where people can ask for help and feel safe.**
- You are able to actively express your opinions and you are able to actively participate in the work, so **you feel a sense of fulfillment.**
- Being exposed to a wide variety of ideas broadens your thinking and **makes you feel like you're growing.**

➤ In order to establish "Open & Flat" as an organizational culture of TMG, further efforts must be made in the future.

Voice of Employees

- **I would like management to change more awareness!**
- **I would like to have more opportunities to discuss with a variety of employees other than affiliation!**
- **I want to disseminate my opinions and ideas more flatly!**

➡ Based on these comments, we continue to promote efforts to raise employee awareness and encourage active discussions in the workplace!

Further Promotion efforts to Create an Open & Flat organization

Open & Flat Training

Understanding and practice

○ **On-demand training** to promote understanding of concepts and learning tips for concrete actions

**In the future** Promote **management training and introduction of good cases** that can be used in the workplace

SHIN-TOSEI Grand Conference

Places for cross-agency discussions

○ Create **places for discussion across job categories and affiliations, including managers. Collecting Diverse Opinions and Ideas** from Participating Employees

**In the future** Newly create a **place for discussion** for **online discussions as well as targeted discussions**

Portal site for employees

Places where proposals and lively discussions can be held on a daily basis

< **Digital Proposal Box +** > **From August 2021**  
A bulletin board where all employees can suggest for improvement for the structural reform of TMG

< **SHIN-QA** > **From February 2022**  
A bulletin board where employees can ask questions and solve problems

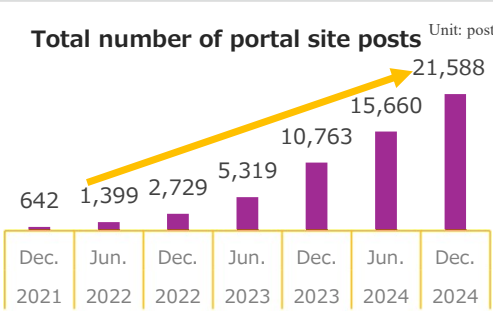

< **SHIN TOSEI Square** > **From April 2024**  
A bulletin board where employees with common background such as those in the same job category, can interact

< **SHIN TOSEI Lounge** > **From December 2024**  
A bulletin board where employees can interact with each other in a secure environment where personal information is protected

**In the future** We will add features to make it easier for users to use and more interactive

The number of proposals posted ➡ **1,439**  
(August 2021 to December 2024)  
Of which **proposals have moved towards realization and Issues solved ➡ about 60% of the total**

Total number of portal site posts Unit: posts

Period	Posts
Dec. 2021	642
Jun. 2022	1,399
Dec. 2022	2,729
Jun. 2023	5,319
Dec. 2023	10,763
Jun. 2024	15,660
Dec. 2024	21,588

We will continue to promote the creation of "Open & Flat" organization and make **active discussions among employees the norm**, thereby **realizing TMG office where employees can feel comfortable working, rewarding, and growing** and working to **improve the performance of employees who are in charge of administrative services**

Items/Goals	Current (Fiscal 2024)	Fiscal 2025	Fiscal 2026	Fiscal 2027

## 8 Development of an environment where diverse human resources can flourish

- We aim to create an environment where all employees can work energetically in order to provide enhanced services to the citizens of Tokyo.

### Support employees to work in an optimal way according to their life stages

#### Partial childcare leave

- For employees raising children from 1st to 3rd grade, introduce **"Partial childcare leave"** that can be taken within 2 hours at the beginning and the end of working hours (from April 1, 2025)
- Difficulty balancing work and child-rearing after children enter elementary school, **support for staff facing, the so-called, "First Grade Barrier"** (Sending children after entering elementary school, eliminate situations where children are left alone such as picking them up.)
- By promoting flexible ways of working according to the age of children, support further the compatibility of childcare and work

#### Effort to Establish and Support Mens' childcare leave

- Achieve the goal of **increasing the rate of men employees taking childcare leave to "90% (one week or more) by Fiscal 2025,"** we work to further promote parental leave by enhancing Pre-dad support course and strengthen the dissemination of role models.
- The rate of male employees taking childcare leave in Fiscal 2023 is 86.6% (one week or more: 83.3%), **a significant increase from 55.4% in Fiscal 2022.**

#### < Pre-Dad Support Course >

Promote flexible and diverse work styles that allow employees to choose their working hours and locations

Promotion of TMG’s ABW (Activity Based Working)

- Work styles that allows you to choose the time and place according to your work content and purpose, promote **TMG’s ABW (Activity Based Working)**
- The effects and achievements of **TMG’s ABW** are disseminated and TMG’s flexible and diverse are realized!

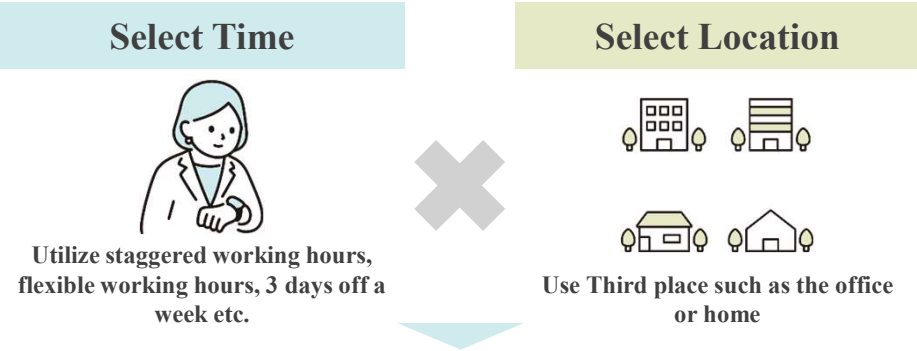

■ Select Working Hours

- There is a **staggered work schedule** that allows you to set the starting and ending times from nine different patterns and **flextime system**, which allows you to assign working hours to each day, establish a **working hours system that enables flexible working styles** in accordance with employee and workplace conditions.
- Utilize the flextime system and changing the allocation of working hours, each week takes **three days off** (from April 1, 2025)  
Additional time off can be used for childcare and nursing care as well as for reskilling and skill upgrading.

■ Select work location

- Depend on the circumstances of the employee and the nature of his/her work, develop an environment that enables **teleworking at third places such as home or private share office**.
- When you go to the office, **future-oriented offices** are deployed throughout all offices that you can choose a location that suits your business purpose. when daycare was closed, also develop the space I take my kids for commuting to work (**Workspace for commuting to work with children**).

<< Image of TMG’s ABW >>

Disseminate the effects and results of TMG’s ABW such as visualization of “you time”

« Overall satisfaction level of telework »

Against the goals of achieving “80% or more of employee satisfaction with telework in Fiscal 2025 (either satisfied or somewhat satisfied),” the level of satisfaction with telework in Fiscal 2024 was **approximately 79%, up 6 points** from approximately 73% in Fiscal 2023.

## We support the success of our employees by establishing a system for detailed appointment and a sustainable execution system

### Promote the development and promotion of Specialized human resources

- The appointment of Specialized managers (Public Administration Specialists) are **greatly expanded** and **relax age requirements** to enable early promotion

< Number of successful candidates for administrative professionals >

Average of 24 in the past 5 years

⇒ **2024: Large increase to 87**

- While honing their expertise in the field of TMG, expand employment routes that allow employees to advance their careers to general managers

### Support young and mid-level employees

- Promote appointment to senior staff member and deputy director so that employees with motivation and ability can demonstrate their abilities to the fullest.

### Support for overseas study

- Support **the globalization of teachers** in charge of **global education** in Tokyo and **the resilience** of Tokyo, in order to **develop specialized human resources** who can learn advanced knowledge and technology from around the world and play an active role from a global perspective, TMG's teachers and technical and professional occupations in general are invited to participate in the overseas established a study **abroad program** to send students to graduate schools

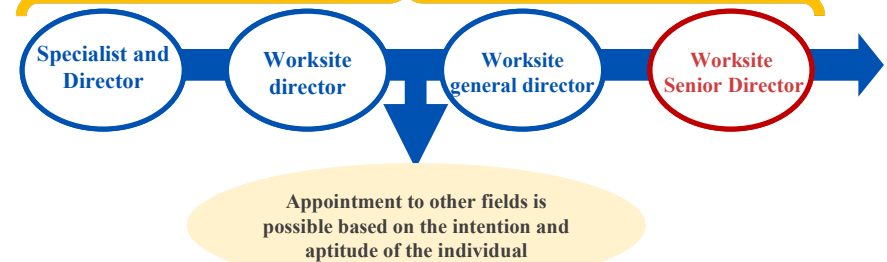

### Promote work efficiency and build a Sustainable execution system

- From the perspective of ECRS \*, each bureau sets effort goals such as thorough implementation of BPR and use of advanced technologies such as generated AI, **establish a sustainable execution system** by systematically promoting to improve operational efficiency
- Priority is given to budgetary and personnel measures to review and improve operational efficiency and technical support is provided to support the efforts of each bureau.

\*ECRS: Eliminate, Combine, Rearrange, Simplify

### < Example of career path of a specialist section manager (image) >

Through **placement management in their areas of expertise**,  
**Advance your career** while honing your expertise!

< Number of persons who passed the selection for chief level position (Type A) >

Average of 737 in the past 5 years

⇒ **2024: Large increase to 841**

\*Clerical work and Four technical works

We further improve the environment in which everyone can work.

### Promotion of Women's Participation

#### TMG Launches “Women in Action”

TMG takes the lead in expanding “Women in Action,” a project to expand the circle of women's advancement throughout Japan to realize a society in which men and women can play an active role without discrimination.

- Employees with motivation and ability, both men and women, actively advance their careers, in order to promote the creation of an environment where the workplace can challenge, **set goals for challenges and career of women employee** advancement and accelerate efforts.
- Employees with motivation and ability can take on the challenge of career advancement with peace of mind, candidates who pass the managerial screening meet their own life plans such as childbirth and childcare and develop a **system to select the timing of promotion**.
- Major **expand career mentors** to respond more closely to employees' career concerns and worries.
- The appointment of Specialized managers (Public Administration Specialists) are **greatly expanded**, while honing their expertise in the field of TMG, expand employment routes that allow employees to advance their careers to general managers. [Republish]

### Changes in the percentage of women who passed managerial examinations

- Significant increase from the previous fiscal year and steady progress in female participation

Selection in Fiscal 2023

14.4%

Up about 10 points

Selection in Fiscal 2024

24.2%

#### < Talk Cafe by Career Mentors >

## We secure talented human resources through flexible review of recruitment methods

### Expand job categories for experienced employees

- Those who have work experience and expertise in private companies etc. and those who are newly employed after raising children, we introduce a **new year-round recruitment screening for experienced employees** in Fiscal 2024.
- It requires no special preparation for the civil service examination and introduction of aptitude tests where can be taken from anywhere in Japan and other screening measures that make it easier for job seekers to challenge themselves.
- Gradually expand the number of jobs covered to further promote the securing of human resources
- Post banner ads on Instagram and other social media sites and conduct PR such as posting for short video collections on the special page of TMG tests

### Review of recruitment examinations for new graduates

- Under Group I B New method for the spring, in order to make it easier for a wide range of people to take the test in fiscal 2024, **introduce of aptitude tests in place of liberal arts multiple-choice examinations.**  
In addition, from Fiscal 2025, **construction, mechanical and electrical occupations are newly added to the target occupations** and secondary and tertiary test are integrated and conducted in one day as secondary test.
- Under Group I B New method in the autumn, **students can take the test from the age equivalent to third grade of university** in Fiscal 2024 and conducted in civil engineering, architecture, machinery, and electrical engineering.  
In Fiscal 2025, **clerical jobs are added to the list of eligible jobs.**
- Aggressive promotion of recruitment examinations through advertisements on trains and digital signage.

### Support for return of scholarships for teachers and technical employees

- By **supporting for return of scholarships for teachers and technical employees\***, secure stable human resources to support the future of Tokyo through human resource development and urban resilience.

\* Civil engineering, construction, mechanical and electrical

### < Details of Selection >

Classification	Contents
First selection	Document screening*, aptitude test *Resume and entry sheet
Second selection	Interview (twice), Certification (Engineering only)
Applicable occupation	Clerical, Civil engineering, Construction, Mechanical, Electrical and Welfare

### < Main contents after revision >

Type	age of entrance examination	Job Type	Contents
Spring Group I B (New method)	22 years of age or more Under 30 years of age	Clerical, ICT, Civil engineering, Construction, Mechanical, Electrical	① Aptitude test • Basic ability test ② Oral examination • Presentation + Interview • Group Work + Interview
Autumn Group I B (New method)	21 years of age or more Under 30 years of age	Clerical, Civil engineering, Construction, Mechanical, Electrical	

## **Chapter 4: Advancing reform through bidirectional communication**

- 1 #SHIN-TOSEI Portal Site, SNS**
- 2 “Digital Suggestion Box Plus”, SHIN-TOSEI Grand Conference**
- 3 Opinion Form for Wards and Municipalities regarding digitization**
- 4 Survey of the citizens of Tokyo and employees regarding the digital environment, etc.**

# 1 #SHIN-TOSEI Portal Site, SNS ~Visualizing reform and thorough Design thinking~

By “visualizing” reform, user opinions are widely collected and reflected in service improvements

- ✓ Through our portal site and SNS, we are advancing reform while "visualizing" the progress of our reforms and thoroughly applying “Design thinking” to reflect the proposals we receive in service improvements

## “Visualizing” reform

From July 2021 (Beta version from May 2021)  
#SHIN-TOSEI Portal Site for the structural reform of the administration of TMG

- ✓ Implementation of "visualizing" our initiatives, such as quarterly updates on the progress of "SHIN-TOSEI" projects

【Number of articles】  
※Cumulative total 858

From October 2020

note #SHIN-TOSEI TMG Structural Reform Promotion Team

- ✓ Providing “face to face” information on the frontlines of the administration of TMG in order to communicate initiatives of "SHIN-TOSEI" in an easy-to-understand manner and to increase the number of fans who support our structural reform efforts

【Number of articles】  
※Cumulative total 116

Providing easy-to-understand information according to the target audience with utilizing various channels such as video, digital signage, SNS, etc.

## Turning user feedback into service improvement

From July 2023

Digital Improvement Post

提言を大募集  
オンライン化してほしい  
HPをもっと見やすく

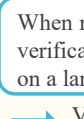

- ✓ We accept proposals for services (including those that are already digitalized) that the citizens of Tokyo find inconvenient and expect to be improved with DX
- ✓ Proposals that have led to improvements are “visualized” on Portal Site for the structural reform of the administration of TMG

### Examples of responses to proposals received

It is difficult to find information about grants on the website, so please categorize the information and make it easier to understand

→ We have reorganized the structure of the pages you pointed out

When registering on the web, 2-step verification can only be done by SMS verification on a cell phone. I would like to be able to authenticate by voice on a landline phone

→ Voice notification authentication by phone has been added to allow authentication using landline phones

Regarding the grant application, some forms had to be mailed in. I would like to be able to complete them online

→ To enable online application completion, forms that used to require mailing can now be attached to the application form as data attachments

## 2 “Digital Suggestion Box Plus”, SHIN-TOSEI Grand Conference

Create opportunities for employees to make suggestions and discussions beyond the workplace, and reflect their ideas in the structural reform of the administration of TMG

- ✓ Through opportunities, such as “Digital Suggestion Box Plus” and the “SHIN-TOSEI Grand Conference” which solicit suggestions from employees, we are working to encourage them to freely propose ideas and generate lively discussions that transcend the barriers of age, workplace, and job level

### Digital Suggestion Box Plus

- ✓ **Call for suggestions for improvement on the structural reform of the administration of TMG** from employees
- ✓ Anyone can participate by “**Comment**” or “**Like!**”
- ✓ All suggestions are **considered and responded to by the department in charge**

Number of proposals

Number of comments

1,439

7,557

(August 2021 to December 2024)

Suggestions moved toward realization/  
Issues resolved  
**Approximately 60% of total**

I want you to create a system that can respond to questions via chat, based on AI that has been trained to learn the content necessary for daily work at the TMG

We are working to verify the use of sentence generation AI using data from specific fields and will work to make it available for daily work in the future

I would like to see the creation of materials that take into account diverse color vision, such as the “Color Usage Guidelines”

We will further promote Color Universal Design so that everyone, regardless of age, disability, nationality, etc., can smoothly access information

### SHIN-TOSEI Grand Conference

- ✓ “SHIN-TOSEI Offline Meet-up” and the “Structural Reform Talk Caravan” were integrated in a progressive manner, and a conference **where diverse employees can discuss issues beyond their workplace, occupation, and job level** was held for the first time in Fiscal 2024
- ✓ Discussed opinions and ideas for reflection in future policies of the TMG
- ✓ In Fiscal 2024, the conference was held 3 times in the first half and 5 times in the second half, with a total of **300 people (including 31 managers)** from all TMG participating

Agenda: What can be done to realize a workplace where employees can demonstrate their abilities and vitality?

#### Opinions and ideas expressed at the SHIN-TOSEI Grand Conference (excerpts)

- To create an open and flat organization, it is necessary to raise awareness from the management level
- In addition to such large-scale initiatives, it is necessary to create opportunities for discussion in familiar workplaces
- It is necessary to create a mechanism for active discussion also online, utilizing digital technology

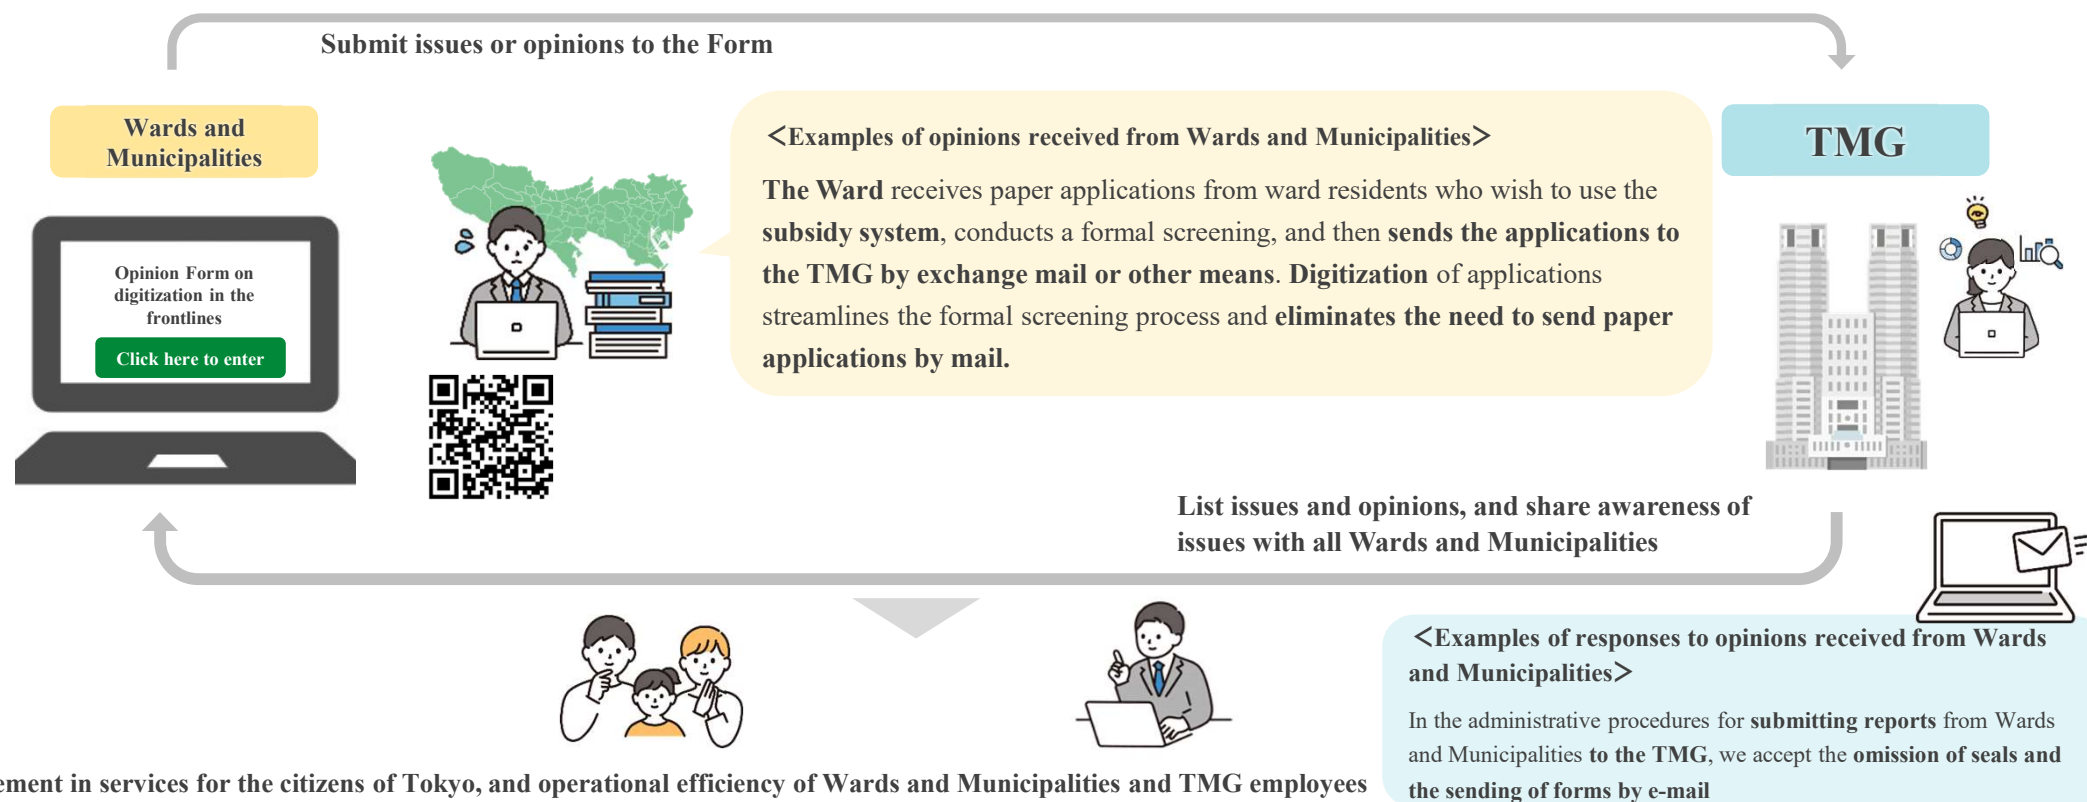

Based on the opinions and ideas expressed here, we will further promote the creation of opportunities for employees to make suggestions and discussions beyond their workplaces

### 3 Opinion Form for Wards and Municipalities regarding digitization ~Connecting frontline feedback to service improvements~

#### Gathering feedback from the frontlines of Wards and Municipalities to improve services and operational efficiency across Tokyo

- ✓ **Gathering issues and opinions of Wards and Municipalities** in promoting the digitization of administrative work originating from the national and TMG systems **through the Opinion Form**
- ✓ The TMG and all Wards and Municipalities share an awareness of the issues, **leading to further improvements in services for the citizens of Tokyo and greater operational efficiency for employees**

## 4 Survey of the citizens of Tokyo and employees regarding the digital environment, etc.

### Survey of individuals and business operators regarding digitization

※Figures in the graphs are rounded off to the nearest unit indicated, so the total of the breakdown may not add up to 100%

- ✓ In order to understand the current status of the structural reform of the administration of TMG, we are conducting a survey to compare Tokyo with overseas cities in terms of satisfaction with administrative procedures, etc.
- ✓ At SHIN-TOSEI X, we aim to further improve the QOS of the administration of TMG by **focusing on the “real feeling” of its residents and business operators**. To this end, we have conducted the **following in-depth surveys** on the actual situation regarding digitalization:

- Conducted a survey of **overseas business operators** in addition to the existing survey of those in Tokyo
- Further detailed survey on the use of digitized administrative procedures
- Satisfaction survey and analysis by delving deeper into the subject, including users of administrative procedures and users of digital procedures

### 【Survey Overview】

#### <Survey of individuals>

Targets: Teens to 70s (500 in each city) living in Tokyo, New York, London, Paris, Singapore, and Seoul

Period: October 31 - December 3, 2024

#### <Survey of business operators>

Targets: 888 business operators with headquarters in Tokyo  
4,242 business operators in the above 5 overseas cities

Period: November 7 - December 13, 2024

### Usage status of digitized administrative procedures

#### Individuals

#### Business operators

- Used digital services
- Knew digitalization but did not use them
- Did not know digitalization
- Were not digitized

## Status of utilization rate and satisfaction (individuals)

- ✓ The satisfaction rate of those who have used the digitalized administrative procedures in Tokyo is about 70%, which is an improvement in both utilization rate and satisfaction compared to last fiscal year (FY2023), but still low compared to other countries

### Utilization rate and satisfaction with digitized administrative procedures

#### Utilization rate of digitalized procedures

#### User Satisfaction

#### User Satisfaction (average of all procedures)

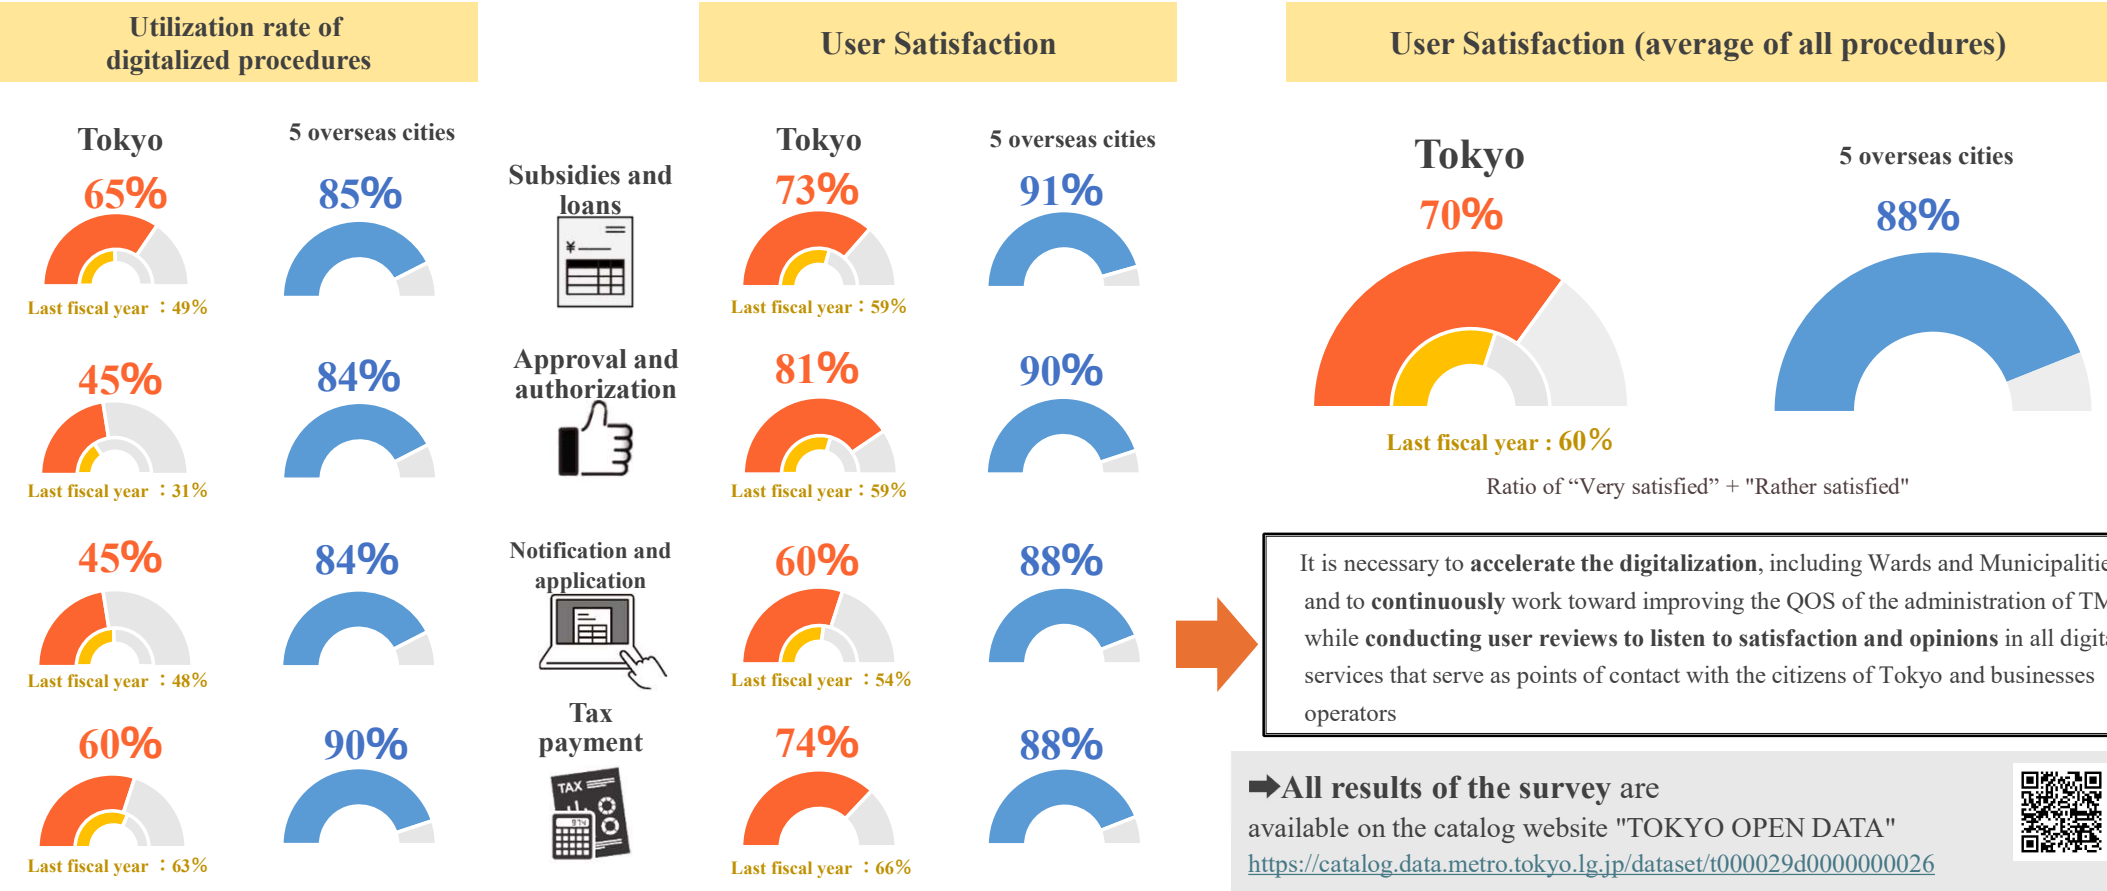

- In Tokyo, **utilization rate and satisfaction with digitized administrative procedures increased overall** compared to the last fiscal year
- In particular, there was a significant increase in utilization rate of "School education" and satisfaction with "Work-related procedures"
- Currently, utilization rate and satisfaction are low compared to other countries, so further initiatives are needed to promote digital procedures, etc.

Status of utilization rate and satisfaction (business operators)

✓ Similarly, in the survey of business operators, the satisfaction rate of those who have used the digitalized administrative procedures in Tokyo is about 70%, which is an improvement in both utilization rate and satisfaction compared to last fiscal year (FY2023), but still low compared to other countries  
※5 overseas cities are surveyed from this fiscal year

Utilization rate and satisfaction with digitized administrative procedures

## Awareness survey of employees regarding the digital environment, etc.

- ✓ In order to understand the current status of DX at the TMG, we regularly survey employee satisfaction with the digital environment, etc.

### Results of the FY2024 Survey

- This time, **32% were satisfied and 25% were dissatisfied**, with **satisfaction far exceeding dissatisfaction** as a result of the progress made in improving the TAIMS environment
- Further initiatives will be made **to realize a highly convenient digital environment**

### Comprehensive evaluation regarding the digital environment

※ Figures in the graphs are rounded off to the nearest unit indicated, so the total of the breakdown may not add up to 100%

### 【Survey Overview】

- Survey conducted on TMG's internal network of employees who were given personal e-mail addresses in TAIMS※, etc.  
(Period | November 7 - December 6, 2024)

※TMG Advanced Information Promotion System (Including TS-NET of the Bureau of Waterworks)

- Number of respondents | 13,650 (Target:56,035)
- Response rate | 24.4%

### Respondent Attributes

#### ■ Work location

#### ■ Age

## Comprehensive evaluation regarding the digital environment (by work location)
